# Introduction

You're about to get all the help you could want in life, thanks to a superintelligent machine that will become your assistant, advisor and all-round workhorse.

In November 2022, Artificial Intelligence, or AI, was made available for public use through the launch of OpenAI's ChatGPT service.

What this service can do is utterly revolutionary.

It allows you to use AI without programming skills or tech know-how.

You can simply chat with it like it's a *real person*.

The AI can remember your conversation, understand what you're trying to achieve, and build on the information you give it to create almost anything you want.

It's ideal for brainstorming, planning, advice and feedback on almost any area of your personal and professional life.

It can come up with ideas, suggest training, research markets, analyse data, summarise books, plan products, create schedules, write copy, recommend strategies, educate you in any missing skills and provide ongoing feedback and analysis.

In short, AI is like having your own virtual team of advisors, marketers, writers and researchers. But they never give you hassle, complain, shirk or make you feel guilty for overloading them with work for zero pay.

Just log on, anytime of day or night, and ask them to produce what you want, for FREE using some basic instructions, and you'll see what you are looking for on screen in a matter of seconds.

AI could be a gamechanger for people who lack skills, experience and time to achieve their greatest goals in life, whether that's writing a novel, saving up for a new house, or changing to your ideal career.

And it's perfect for people who want to start and run successful businesses, offline and online.

In particular it can help with:

- Assessing skills and interests
- Generating ideas and brainstorming
- Planning and scheduling
- Choosing tools and platforms
- Creating content, writing communications and sales copy
- Developing your skills and knowledge
- Budgeting and finance

The goal of this book is to show you how to use AI and ChatGPT to save time, reduce stress and reach your business and personal goals faster than you ever thought possible.

First, let's take a look at the AI itself...

# Introducing Your AI Tools

## ChatGPT

This is the most advanced language based AI tool available at the moment and the primary tool you'll be using.

It's a language prediction model that uses a form of artificial intelligence known as deep learning.

You can ask it questions like you would with any chatbot, and it will produce ideas, research and content to order in seconds.

It's capable of handling a wide range of topics, making it useful for numerous applications, from creative writing and research to customer service and more.

Like all AI tools, the quality of ChatGPT's output depends heavily on what you ask it and how you use it, which is what this book is here to help you with!

To sign up go to [chat.openai.com](https://chat.openai.com) and click on "Sign Up" in the top right corner. Fill out the sign up form to create your OpenAI account.

Once signed up, you will be taken to the ChatGPT interface.

There you can type your prompts into the chat box and ChatGPT will respond.

If you sign up for the Pro version, you will get GPT-4 Pro, a highly advanced version with access to a database of information that goes right up to April 2023. This means it can provide insights, answers, and analysis based on a vast array of recent data, events, developments and trends.

GPT-4 Pro automatically incorporates the following additional AI tools:

- Bing, a well-known search engine created by Microsoft in 2023. This enhances your access to a wide range of recent internet data.
- Dall-E 3, an AI system that creates images from textual descriptions.

- Vision, a tool that enables GPT-4 to analyse and interpret visual data.

Additionally, outside of ChatGPT you can use this...

## **Claude**

Claude.ai is an AI tool that can research and write content, like ChatGPT, but which can also carry out summaries of very long pieces of text and deliver you the crucial points in a simple style.

Claude has the advantage of being the most current in terms of information, as it continuously incorporates the latest data and developments into its knowledge base. Its daily update makes Claude ideal for more up-to-date facts, statistics and information.

Crucially, Claude gives you up to 75,000 words as an input limit. This means you can paste entire chapters, modules and even books into the AI.

You can also upload multiple documents in formats like PDF and text CSV, and it will be able to read them, summarise them and extract key information from them.

## **How to Use This Book**

This book is designed as a practical guide, offering you actionable insights and steps to integrate AI into your personal, creative and business life.

The prompts are designed to be short and simple, so that they're quick and easy to input, and don't require any complicated interactions. Where applicable, suggested follow-up prompts are included, so that you can 'converse' with the AI and get it to drill deeper into details or supply additional information.

To begin, I recommend you sign up with ChatGPT.

Start by going to [chat.openai.com](https://chat.openai.com) and then use an email address or a Google or Microsoft account to sign up.

You need to create an account on the OpenAI website to log in and access ChatGPT, but it is free.

You might find that at busy times you are unable to access the service, or the responses are slow.

This is why I recommend that you sign up for GPT-4 Plus for \$20/£16 a month. It gets you access to the more advanced version of the model, along with Bing, Dall-e and Vision. You'll also get faster responses.

Once you have access to Chat GPT it's really simple.

Look at the contents page of this book and go straight to the section that most applies to you.

There you'll see a list of all the processes that AI can help you with, accompanied by prompts to feed into ChatGPT, (and also Claude when you need the most recent data).

Find the goal you need to achieve and input our prompts to get instant advice, ideas, resources and steps to follow.

Test these prompts out and see what kind of results you get. You can always tweak the prompts to get a result more appropriate for your goals.

Examples include adding a location (e.g., The UK or 'Birmingham') to get results of resources and communities near you or adding your business type or field (e.g. Accountancy, or Etsy handmade goods) so that the AI has an even clearer idea of what you need to know.

If you get a response that seems incomplete or not quite right, feel free to challenge it. Ask ChatGPT to clarify, provide additional sources, or reconsider its response based on new criteria - for instance:

**"Can you tell me more about this?"**

**"Can you expand on that point?"**

**"Please do this again but in simple layman's language."**

**"Please add specific references and links."**

**“Do this again but add specific practical tips.”**

**“I need more detail on this point [paste the section you want embellishing].”**

You can then delve even deeper by adding another instruction.

**“Find me X more examples.”**

**“Give me 3 alternative options to this: [insert relevant line].”**

**“Give me 3 expert quotes and 3 research papers that back this up.”**

**“What further steps should I take?”**

**“Now give me a practical action plan that’s easy to follow.”**

I recommend keeping the same conversation open as you progress so that ChatGPT keeps building on the information and so that it can remember what the core point is

The best part is, you can return to the same chat when you need more info in the future, which means that you can build on the conversation over the long term. AI will have a clearer idea of what you want and why, based on your previous chats. These will be saved on the left-hand column as a menu, so you can dive into them whenever you want more advice and help on that subject.

If you have a new topic or request, then simply open a new chat.

Finally...

### **IMPORTANT LEGAL INFORMATION!**

As you’re about to discover, ChatGPT is a powerful tool for providing information and answering questions across a wide range of topics. However, it’s important to recognise its limitations, especially when dealing with sensitive or critical matters such as tax, finances, medical or legal advice.

While ChatGPT is designed to provide accurate and up-to-date information, it may not have the most current laws and regulations.

Certain advice, especially in legal and medical fields, is subject to regulatory and ethical standards that ChatGPT is not equipped to adhere to.

So, for urgent and important matters in health, law and finance, always seek professional advice.

Right - let's get started!

# Part I: Skill Development

If you want to get ahead in life, skills and knowledge are vital.

In this first part, we delve into a plethora of resources and strategies that ChatGPT can provide, from mastering new languages, grasping complex subjects, to developing technical or creative skills for your professional life and personal fulfilment.

## Identifying Skills

ChatGPT can help you find educational tools, courses and resources to advance your skills and knowledge so that you can achieve goals in every aspect of your life, including:

- Personal (hobbies, interests, family, relationships)
- Financial (saving, budgeting, tax)
- Professional (career, management, leadership)
- Creative (writing, art, design, music, performance)
- Business (industry-specific skills, entrepreneurialism, technology and marketing skills)

### Prompts:

- “How do I identify the skills most relevant to my goals?”
- “What are the emerging skills in [insert field or industry] that I might need to learn?”
- “How can I determine which soft skills will complement my existing skill set?”
- “How can I assess which technical skills will enhance my professional profile?”
- “Can you recommend online platforms for skill development in [insert topic/skill]?”
- “What are the best resources for learning [specific skill] quickly?”

- “How can I find reputable sources for learning [skill] from scratch?”
- “Can you suggest interactive resources for improving my [XXX] skills?”
- “Suggest online courses, tutorials, or workshops that can help me acquire the necessary skills or knowledge in [field or skill]”
- “What online resources are available for developing effective [type] skills?”
- “Can you recommend communities or forums where I can learn from professionals in the [field or industry]”
- “What are some free educational websites where I can acquire new skills?”
- “Give me a list of recommended books that will help me develop my knowledge and skills in [industry/skill/field]”
- “How do I evaluate the quality of online courses or resources?”

ChatGPT can help you practise and refine those skills.

- “What are effective strategies for practising a new skill to ensure retention and mastery?”
- “How do I set realistic goals for skill acquisition?”
- “What are common obstacles when learning a new skill, and how can I overcome them?”
- “How can I apply the "deliberate practice" concept to learning a new skill?”
- “Recommend tools or apps that aid in skill practice and tracking progress”
- “Provide practice exercises for improving my [type] skills.”
- “Offer exercises to enhance my understanding of [field]”

## Customised Learning Paths

Based on your current skill level and goals, ChatGPT can help design a customised learning path.

- “Create a learning path for improving my [XXXX] skills from intermediate to advanced level.”
- “Design a learning pathway for a beginner looking to become proficient in [skill]”
- “Outline a learning plan to enhance my project management skills as an [occupation or role].”
- “Propose a learning path for mastering [skill] as a novice.”
- “Generate a learning path for developing skills in [field or topic] for professional growth.”

## Skill Assessment

- “Suggest tools to assess my current proficiency in [digital marketing].”
- “Recommend assessments to gauge my [programming skills in Java].”
- “Provide tools or tests to evaluate my level in [graphic design].”

## Certification Guidance

Guidance on industry-recognized certifications that can enhance credibility and competence.

- “Suggest industry-recognized certifications for advancing in [field]”

→ “What are the benefits and career advancements associated with these certifications?”

→ “What is the typical cost and time commitment for these certifications?”

→ “Compare the suggested certifications in terms of difficulty, recognition, and examination process.”

## **Quiz Generation**

Quizzes or tests to help you evaluate your understanding and retention of the material.

→ “Generate a quiz to test my understanding of [SKILL OR PROCESS].”

→ “Create a test to evaluate my knowledge in [specific thing].”

### **Follow Up Prompts:**

→ “Provide answers and explanations for the generated quiz.”

→ “Suggest resources for reviewing the areas I struggled with in the test. Here are the elements I got wrong: [INSERT WRONG ANSWERS]”

## **Progress Tracking**

→ “Suggest tools to track my learning progress in [skill].”

- ➔ “Recommend methods for tracking my skill development in [subject or field].”
- ➔ “How can I track my progress in [subject] learning?”
- ➔ “Suggest tools or methods to track my progress in mastering [skill]”

### **Follow Up Prompts:**

- ➔ “How can I adjust my learning path based on the progress tracked in [skill]?”

# Part II: Productivity

In this part, we'll show how ChatGPT can help you manage your time better, plan effectively, and use technology to make tasks easier.

We'll tackle how to beat procrastination, set up a workspace that works for you, and organise your tasks for smoother sailing.

With ChatGPT by your side, you'll be on your way to getting more done in less time, bringing you closer to your goals than you ever thought possible.

## Goal Setting Guidance

A SMART goal is a tool you can use to plan and achieve goals. While there are variations of what SMART stands for, the essence is this: goals should be:

1. **Specific:** Clear and well-defined, not vague. Knowing exactly what is expected, why it is important, who's involved, where it is going to happen, and which attributes are important.
2. **Measurable:** You should be able to track the progress and measure the outcome. A SMART goal should have concrete criteria for measuring progress and reaching the goal.
3. **Achievable:** Attainable and not impossible to achieve. The goal should stretch your abilities but still remain possible.
4. **Relevant:** It should matter to you and align with other relevant goals. A SMART goal must be important to you and align with other goals. It should also be the right time for you to pursue this goal.
5. **Time-bound:** With a clearly defined timeline, including a starting date and a target date. The purpose is to create urgency and prompt action.

ChatGPT can help you set up your SMART Goal Framework:

 "Assist me in crafting SMART goals for my [overall objective]."

- ➔ "Help me set SMART goals for improving my skills in [subject]"
- ➔ "Guide me in setting SMART goals for my [skill] improvement."
- ➔ "Help me craft SMART goals for my [type of] project."

### **Follow Up Prompts:**

- ➔ "Provide examples of measurable metrics for my SMART goals."
- ➔ "Suggest tools or methods to track progress towards achieving my SMART goals."
- ➔ "Provide examples of relevant objectives for my SMART goals."

Next, it can help you break down that larger goal into smaller goals and steps.

- ➔ "Help me break down my long-term goal of mastering [subject] into short-term objectives."
- ➔ "Assist in breaking down my long-term goal of [achieving result] into short-term tasks."
- ➔ "Help me break down my long-term goal of becoming a [Career goal] into manageable milestones."

Next, it can help you schedule those steps...

- ➔ Help me create a X-month schedule for achieving my goal of mastering digital marketing, based on the short-term objectives we outlined."

### **Follow Up Prompts:**

- ➔ "Provide a weekly breakdown of tasks and activities for this schedule."
- ➔ Provide a daily breakdown of tasks and activities for this week's schedule."

### **Habit Tracking:**

ChatGPT can identify undesirable habits and their triggers.

Habits are recurrent, often unconscious patterns of behaviour that are acquired through frequent repetition e.g.

- Procrastination: Delaying or postponing tasks.
- Overeating: Consuming food in quantities greater than needed.
- Nail Biting: Biting the nails, often due to stress or anxiety.
- Excessive Screen Time: Spending an excessive amount of time on digital devices.
- Smoking: The act of inhaling and exhaling the smoke of tobacco or a drug.
- Excessive Caffeine Intake: Consuming too much caffeine, often from coffee or energy drinks.
- Impulsive Spending: Buying items on a whim without necessary planning.
- Skipping Exercise: Neglecting physical activity or exercise routines.
- Late Night Snacking: Eating snacks late at night.
- Ignoring Health Check-ups: Not attending regular health check-ups.

ChatGPT can suggest strategies for developing new beneficial habits and providing tools for tracking and maintaining them. You can also ask it to supply strategies for replacing negative habits with positive ones.

## **Identifying Bad Habits**

Initial Prompt:

 "Help me identify my bad habits."

Input Tips: Provide a description of your daily routine, and any known bad habits you are aware of.

# Part V: Money

Navigating the financial landscape is crucial for a stable and prosperous life.

In this section, we'll explore how ChatGPT can manage your personal finances and help you budget.

## Budgeting:

ChatGPT can help you track income, expenses, and savings, facilitating better financial planning and management.

Start with a questionnaire:

➡ "I am new to budgeting and would like personalised advice.  
Can you provide a questionnaire to better understand my financial situation and budgeting needs?"

You'll get something like this to fill in:

-----

### Personal Information

Age:

Marital Status:

Number of Dependents (if any):

Employment Status (e.g., full-time, part-time, self-employed, unemployed):

### Income Details

What is your monthly take-home income (after taxes)?

Do you have any other sources of income (e.g., side gigs, rental income)? If so, please list them and their average monthly amounts.

### Expense Details

List your fixed monthly expenses (e.g., rent/mortgage, utilities, insurance, car payments):

List your variable monthly expenses (e.g., groceries, dining out, entertainment, shopping):

Do you have any outstanding debts (e.g., credit card, student loans, personal loans)? If so, please list them with their total amounts and monthly payments.

# Part VIII: Home enterprise

Starting a home enterprise journey is an important way to bring yourself financial freedom and a lot of fulfilment, too.

In this segment, we'll unveil how ChatGPT can pinpoint trends, find profitable niches, assess your goals and skills, and match you to the right kind of part time or full-time enterprise,

## Assessing Skills and Interests

ChatGPT can provide a questionnaire to help you assess your skills, interests, and experiences. Based on your responses, it can suggest suitable business ideas.

### Questionnaire:

➡ "Provide a questionnaire to help me assess my skills and interests for a home business."

### General Skills and Interests Analysis:

➡ "Help me analyse my skills and interests to suggest some home-based business ideas."

FOLLOW UP:

### Specific Skill Assessment

➡ " I have a skill in [AREA]. Can you suggest home business ideas based on this skill?"

### Exploration of interests.

➡ " I am interested in [SUBJECT]. What home-based business opportunities align with this interest?"

### Experience-Based Suggestions:

➡ " I have X years of experience in [AREA, FIELD, INDUSTRY]. What home enterprise opportunities could leverage my experience?"

➡ " I am skilled in [SPECIALITY] and love [ACTIVITY OR SUBJECT] What business ideas could combine these?"

### **Market Alignment:**

➡ " I am skilled in [SPECIALITY]. What are the market trends for home-based woodworking businesses?"

### **Creative Business Ideas:**

➡ Can you suggest creative home business ideas for someone skilled in [AREA] and loves [SUBJECT or ACTIVITY]

### **Transferable Skills Assessment:**

➡ " I have been a [JOB ROLE] for X years. What transferable skills do I have for starting a home-based business and what business ideas would suit these skills?"

### **Hobby-Based Business Ideas:**

➡ "My hobby is [SUBJECT]. Can you suggest how I could turn this hobby into a home-based business?"

### **Local Market Opportunities:**

➡ "I live in a small town/village and am interested in starting a local home-based business. Can you suggest business ideas considering a smaller local market?"

## **SWOT Analysis**

ChatGPT can give you a SWOT (Strengths, Weaknesses, Opportunities, Threats) analysis to evaluate personal and external factors that might affect the success of a home-based business.

➡ "Assist me in performing a SWOT analysis for the following home-based business idea: [INSERT BASIC DESCRIPTION]"

### **Strengths Assessment**

➡ "What consumer behaviour trends are affecting home-based businesses in this area [INSERT DETAILS]?"

➡ "Provide an analysis of competitive trends in the [INSERT TYPE OF] industry?"

## Exploration of Niches:

ChatGPT could help explore various niches within a broader field based on trending demands or less saturated markets.

Start with a broad category that interests you. For example, if you're passionate about fitness, that's your starting point. But remember, 'fitness' is a vast field with lots of competition, so you'll need to dig deeper.

Ask ChatGPT to generate ideas for niches based on your areas of interest, or the field you want to go into.

- ➡ "Act as my home business advisor and researcher. I'm interested in [field, industry or product type]. Could you suggest some potential niches within this field?"
- ➡ "I want to create a [product type] based on [subject]. Could you suggest some potential niches within this field?"
- ➡ "I want to make money from [product or service type]. Can you come up with as many niches as possible?"
- ➡ "List potential niches within the [insert broader field] industry."
- ➡ "Identify emerging niches in the [insert broader field] market."
- ➡ "What are the less saturated niches in the [insert broader field] sector?"

### **Follow Up Prompts:**

Now get ChatGPT to break its suggestion down into even smaller niches:

- ➡ "Break the following niche into sub niches: [INSERT NICHE]"

By the time you've drilled down to this level, you've found an ultra-specific niche with low competition.

More Prompts:

### **Unique Angle Identification:**

- ➡ "Suggest unique angles or approaches for a business in the [insert niche] market."
- ➡ "How can I differentiate my [insert niche] business from competitors?"
- ➡ "Provide examples of successful businesses in the [insert niche] market *that have unique selling propositions (USPs).*"

### **Profitability Analysis:**

- ➡ "Provide methods for analysing the profitability potential of a [insert niche] business."
- ➡ "What are the common revenue streams for businesses in the [insert niche] market?"
- ➡ "Suggest pricing strategies for products/services in the [insert niche] market."

### **Exploration of Niche Business Models:**

- ➡ "Describe various business models suitable for a solo or part-time enterprise in the [insert niche] market (e.g., dropshipping, affiliate marketing, info publishing, etc.)."
- ➡ "Compare the pros and cons of different business models in the [insert niche] market."
- ➡ "Provide case studies of successful solo or part-time enterprises in the [insert niche] market."

## **Sales & Marketing**

Target Market Identification – ChatGPT can help with identifying and analysing target markets based on demographic, psychographic and behavioural factors.

First, ask:

- ➔ "Give me a checklist of information that I need to collect in order for you to analyse my demographic."

ChatGPT will give you something like this:

-----

### **Demographic Analysis Checklist:**

#### **1. Basic Demographic Information:**

- Age Range
- Gender
- Location (City, State, Country)
- Ethnicity

- Language(s) Spoken

## **2. Socioeconomic Status:**

- Education Level
- Occupation/Industry
- Income Level
- Homeownership

## **3. Family and Lifestyle:**

- Marital Status
- Number of Children (if any)
- Pets Owned (if any)
- Hobbies and Interests
- Lifestyle Preferences (e.g., active, sedentary, urban, rural, etc.)

## **4. Behavioural Traits:**

- Shopping Preferences (online, in-store, brands preferred, etc.)
- Communication Preferences (email, phone, text, etc.)
- Purchasing Frequency in your Product Category
- Preferred Social Media Platforms

## **5. Product or Service Usage:**

- Awareness of Your Product/Brand
- Usage of Your Product/Brand
- Satisfaction Levels with Your Product/Brand
- Competitor Product/Brand Usage and Preferences

## **6. Psychographic Information:**

- Values and Beliefs

- Challenges or Pain Points that Your Product/Brand Addresses

#### 7. **Market Segmentation:**

- Any existing segmentation of your market (e.g., by behavioural traits, usage occasions, etc.)

#### 8. **Competitive Landscape:**

- Awareness and Perception of Competitors
- Market Share Information

#### 9. **Historical Sales Data:**

- Sales Trends
- Customer Retention Rates
- Customer Lifetime Value

#### 10. **Customer Feedback and Reviews:**

- Common Praises or Complaints
- Suggestions and Requests from Customers

-----

If you can fill this in and paste it back into ChatGPT with all the answers, it can help you analyse and understand your demographic.

Here are some prompts you could use to gather and analyse the necessary information:

First...

 "I am going to give you some information about my business so you can analyse my demographic."

Then feed into ChatGPT:

- The specific industry and niche your business operates in.
- Detailed descriptions of the products or services you offer and what sets your product/service apart from competitors.

- Any information on the kind of customer you are aiming for (age, gender, location, status, location).
- Any customer feedback, and other relevant data you have collected.

Now you use these prompts....

- “How can I determine the education level of my target market?”
- “What occupations or industries are most common among my target customers?”
- “Estimate the income levels of my target market.”
- “How can I find out the homeownership status among my target audience?”

### **Family and Lifestyle:**

- “How can I gather data on the marital status of my target market?”
- “What hobbies and interests are common among my target customers?”
- “Can you provide a method to analyse the lifestyle preferences of my target market?”

### **Behavioural Traits:**

- “How can I determine the shopping preferences of my target market?”
- “Can you suggest a way to analyse the communication preferences of my target audience?”
- “How can I find out which social media platforms are preferred by my target market?”

### **Product or Service Usage:**

- ➔ “How can I measure the awareness of my product/brand among my target market?”
- ➔ “What methods can be used to assess the satisfaction levels with my product/brand?”
- ➔ “How can I analyse the usage of competitor products/brands among my target market?”

### **Psychographic Information:**

- ➔ “Can you help me identify the values and beliefs common among my target market?”
- ➔ “How can I find out the challenges or pain points my product/brand addresses for my target customers?”

### **Market Segmentation:**

- ➔ “Can you help me segment my market based on behavioural traits or usage occasions?”
- ➔ “What methods can I use to further segment my target market to better tailor my marketing efforts?”

### **Competitive Landscape:**

- ➔ “How can I assess the awareness and perception of competitors in my market?”
- ➔ “Can you assist in analysing the market share information within my industry?”

### **Historical Sales Data:**

- ➔ “Can you help me analyse the sales trends based on my historical sales data?”
- ➔ “How can I calculate the customer retention rates, and customer lifetime value based on my sales data?”

### **Customer Feedback and Reviews:**

➡ "How can I systematically gather and analyse customer feedback and reviews?"

➡ "Can you help me identify common praises or complaints from customer reviews?"

## **Talk to Your Ideal Customer**

One of the key steps in setting up any business is to work out exactly who your customer is likely to be - your avatar. You need a clear idea of what kind of person they are. That means knowing about what lifestyle they lead, what they dream about, what they fear, what they like and what they dislike. This way, you can target your product and service more accurately.

In the old days, this took some research – you’d need to go on forums, read Amazon reviews, check out people’s social media posts and talk to people you knew who might fit the bill.

But now you can use ChatGPT:

First make sure you have the following details, based on the demographics analysis (see previous entry).

- ☐ Who are they?
- ☐ How old are they?
- ☐ Gender
- ☐ Typical Occupation
- ☐ Household Income
- ☐ Education Level
- ☐ Location
- ☐ Primary Goals?
- ☐ Primary Fears?
- ☐ Negative Experiences
- ☐ Obstacles

Write it up as notes like below and feed it to ChatGPT.

EXAMPLE PROMPT:

*John is 65, retired, with savings in the bank, but not enough to live the kind of life he wants. His money is being eaten up by low interest rates and the high cost of living has made him significantly poorer. His view is that the state isn't there to look after you, it's up to you to control your destiny and look after your family. So, he would like a way to earn extra income, from home, in his spare time, so that he doesn't have to worry about bills, and can afford to take regular holidays with wife. Ideally, he would like to pay off what remains of his mortgage and help his grown-up children get on the property ladder.*

*John has always been interested in the idea of investing and trading. He has a few stock market investments but they're not earning him enough. He currently reads the online versions of Investors Chronicle, MoneyWeek and The Motley Fool. He has signed up to a few Forex Trading email services and follows a few Facebook and Twitter experts. But he's worried about trusting a stranger, and has read bad reports on a forum of people losing money on Forex systems,*

*He is interested in finding a trading system that's controlled, and low risk, and with good returns. But he's not great with computers and would prefer to avoid anything too technical.*

Once you have established who you are talking to with ChatGPT you can probe it for more information.

PROMPT:

➡ ***Tell me about the deepest fears that X (your buyer) might have when it comes to [achieving goal].***

Even better, you can chat to an ideal customer using a free AI programme called character.AI.

Simply sign up by going here: [character.ai](https://character.ai). Give yourself a username, then click on 'create'. Enter the name of your customer (make one up) and then describe them in the 'greeting' box.

Here's a screenshot example.

The screenshot shows the 'Create' interface of the character.AI website. On the left is a dark sidebar with icons for Home, Feed, Create, Chats, and Community. The main area is titled '1. Name' with the instruction 'The name can include first and last names.' Below this is a text input field containing 'Alan Jones'. The next section is '2. Greeting' with the instruction 'What would Alan Jones say to introduce themselves? For example, "Albert Einstein" could say: "Hello I am Albert Einstein. I was born in March 14, 1879, and I conceived of the theory of special relativity and general relativity."' Below this is a large text area where a detailed character description has been entered: 'I am Alan Jones, a married 48 year old father of two children who have just left home. I work as an office manager in an IT firm in Swindon. I am looking for a home based side income to fit around my job so that I can afford a sports car, play more golf, renovate our house, and enjoy more holidays with my wife,'. The bottom of the screen shows the start of section '3. Toggle Image Generation'.

Next, select 'private', so it's just a chat for you. You can click on 'advanced details,' so that you can add more detail like this:

**Short Description**  
In just a few words, how would Alan Jones describe themselves?

Sport obsessed, fun loving, energetic

**Long Description**  
In a few sentences, how would Alan Jones describe themselves?

I am a sports obsessed man who loves golf and motorsports (and other sports if they are on TV). I don't have many qualifications and my salary is poor. I am disappointed that I've not made a lot of money, and would like to have a better lifestyle for me and my wife so that we can enjoy our later years now that the kids have left home. It's hard to stick to projects, have poor focus and tend to flit. I am also very cynical about business opportunities and regulations.
