

The Branch Brothers Design & Build Process

1 Let's Talk + Walk the Space

Every project starts with a quick phone call to get an idea of your goals and vision. From there, we schedule a site visit to see the space in person, talk through ideas, and better understand your needs. Most times, we can give you a rough idea of budget ranges and discuss potential next steps during that visit.

2 Getting Started Agreement

If things feel like a good fit, we'll move forward with a Planning Agreement. This includes a deposit to kick off the design work and begin developing a more detailed plan.

3 Design + Planning

Here's where your ideas start taking shape. We'll explore the possibilities through feasibility reviews, define the scope of work, and create your design and budget.

4 Detailed Budgeting

Once the design is finalized, we move into the costing phase. Our Pre-Construction Manager gathers pricing through site visits with trade partners and suppliers.

5 Permits + Scheduling

With your thumbs-up on the budget, we'll handle any required permits and approvals. At the same time, we'll map out the project schedule so you know what's happening and when to expect progress.

6 Final Touches + Walkthrough

Once everything's built and looking great, we'll walk through the space with you to make sure every detail is dialed in. After that, it's time to enjoy your remodeled space.

Rest Assured

We stand behind our work. We offer a one year warranty on everything we do.
