# MOUTHING BEYOND THREE

Many neurodivergent, disabled or chronically ill children continue mouthing objects well beyond age 3, yet toy safety regulations are designed for typical development – assuming mouthing stops at 36 months.

Mouthing Beyond Three offers free training sessions this October for families navigating this challenge.

# PUBLIC EVENT

## About Our Event

Join us for a free, supportive event created by families, for families. These events bring together real expertise, lived experience, and practical strategies to help you feel more confident in keeping your loved ones safe while honouring their sensory needs.

**7 Oct 2025 (10am)**  
St Helens

**14 Oct 2025 (10am)**  
Liverpool

## Event Highlights

### Meet families ◀

Hear Andrea's story that reminds us that vigilance matters at every age

### Learn strategies ◀

Learn to assess toys beyond age labels and identify hidden risks

### Gain confidence ◀

Practise emergency response with hands-on first aid training
