

How Anyone Can Create Short 5-7 second Viral Videos On A Brand New Instagram Account To Make Money On The Internet From Anywhere

Hey - It's Bo Lee.

I am SUPER EXCITED that you got your hands on this document before attending the free live class hosted by my partner Grant.

What you're about to learn in the upcoming class is what I (and many others) believe is the **best way** for an absolute beginner to start finally making money online (seriously) so they can work whenever they want, wherever they want. It involves the simple skill of learning how to make short 5-7 Instagram videos for brands that are already selling really popular & expensive digital products for \$3,000+...

And it can be learned very easily even if you hate tech stuff or have never even posted on social media before!

Why Do I Think It's The Best Money Making Opportunity Available Right Now?

There are a few reasons.

Reason #1 is because the main struggle most people have when it comes to making money online (and this might be you) is **they don't have a product to sell.**

And reason #2 is even if they did have a product to sell, they don't really know how to sell it because they've never sold anything to anyone before - and even if they did - they REALLY don't want to come off as salesy/pushy/cringe.

Let's be honest - nobody wants to sell something that is stupid/scammy/cringe because if they did they would just feel terrible about themselves. They want to sell something that's AMAZING & actually helps people so they can feel really good about how they're making money.

And that's exactly why I love this. Because this new method **solves** all of those problems for you.

...So what's the method?

Well - there are not only brands that are already **selling expensive, highly-rated/reviewed digital products for \$3,000+...**

But these brands will also **SELL** the actual products **FOR** you! Which is both crazy & awesome.

The cool thing is - these brands already have both the product AND the sales people ready to go for you. And what's crazier is that VERY FEW people even know that these types of brands (that have both products and salespeople ready to go for you) even exist. But they 100% do. And even better is that these brands are HOPING to get regular people just like you to post short 5-7 second videos for them. Why? **because the more people they get to make them videos, the more views they get, and the more money they make. It's a total win-win.**

**Ok, That Makes Sense.
But Are You Sure I Can Learn How All Of This Works
In The Free Class? What Am I Learning? I'm Super
New To All Of This!**

Yep! That's actually PERFECT that you're new to everything because it means we don't have to fix any bad habits.

Anyone who puts some effort into this CAN make it work for themselves, and having someone with a "clean slate" who doesn't have any previous experience is actually exactly who this works best for.

There will be 3 core topics we'll cover in the class:

- 1) How to get paid to create short 5-7 second viral videos from anywhere on earth with a brand new**

Instagram account (with or without showing your face)

2) Why brands will happily pay you \$500+ per sale from sales they make from your videos (while they do all of the selling for you)

3) How to use AI to come up with infinite viral video ideas & shorten your workload to about 10 hours per week (while controlling your schedule & being able to work from anywhere)

During the class, Grant will cover all of the basics with you & you'll have a great understanding of exactly how you can get started with this method ASAP (if you end up deciding you want to) & will also be receiving a free gift at the end.

We're super excited to see you in there!

FAQ:

Can I actually do this from anywhere?

Yes. Doesn't matter if you're in New York, Miami, Bali, Mexico, Europe, London, whatever. It actually BENEFITS you to travel, because recognizable locations do tend to go viral more often. So in a way, you are actually getting paid TO

travel. And because the products are expensive, making just 1-3 sales while you're there could pay for the whole trip.

What's in it for the brands?

Money. And no risk. They only pay you if you make a sale with your videos (which we show you how to do EXTREMELY effectively) so there is no risk on their end. Once you make a sale, they make money & you make money. Very aligned incentives. And again (and this is important for me personally, you are probably the same) it's also great because they are LEGIT products that people LOVE. So you feel VERY satisfied when the cash hits your bank account.

I have a full time job & a busy schedule. Is it still possible to do this?

Definitely. We have all the templates / systems dialed in so it really doesn't take that long at all. Plus you can "batch" stuff & do like a 1-3 hour work sprint & that feeds you with content for a long time. We said "about 10 hours per week", but in reality if you are ambitious you can 100% cut that down significantly more.

I've never posted on social media before and don't have any followers. Is that a problem?

Not at all! Again, that's actually a good thing. Instagram came out with an update that said it will begin favoring new / smaller accounts so you can just start up a brand new one (we show you how to set it up) & you will be good to go.

I'm shy & am unsure about posting myself on the internet. What's the solution there?

Totally normal, and most people are when they start. There's a couple solutions here. The first one is you can "run a temporary experiment on yourself" and make the DECISION to push yourself out of your comfort zone for a set period of time & experience how freeing yourself from the chains that you feel are holding you back, is. I'd ask the question "is allowing my perception of other people's judgement of me (and I say perception because in reality nobody really cares what you're doing or is even paying attention or even knows you are doing this anyway because you can just make a new account that's separated from your personal one) worth more to me than my dream life?". And you may find the answer to that question is no. You're so much bigger than your fears & hesitations, i genuinely promise you that. You CAN, at any

moment, choose not to let your anxieties stop you from what you really want (and honestly deserve), and you can always choose to make choices that stretch you out of your comfort zone & push you in the direction of your higher self. It's all just a commitment away. But at the same time, there are also MANY faceless content styles & many very successful faceless creators. So either way, not a problem at all. Just do what your intuition tells you to go with.

How do I actually get paid?

The brands will deposit payments of \$400+ (or more, sometimes up to \$1,000 depending on what the product is) into your bank account like any normal job. You will have custom links created for you specifically - so when someone buys from your videos, everything gets tracked & organized automatically. You just post cool/fun stuff, get paid.

I don't own a fancy camera & have also never edited a video. Is this a problem?

Nope. It's actually a good thing because smartphone content actually feels more "real" than stuff that's overproduced. And don't worry about editing difficulty. Grant was actually able to get his own dad to go viral lol (who is 60 and hates social media).

I've never thought of myself as creative. What if I run out of ideas?

Even if you consider yourself the most “uncreative person on planet earth”... You'd still be able to generate infinite ideas because of ai. Ai is VERY simple & easy to use (complete beginners with no tech experience can use it with zero issues), so don't even break a sweat worrying about it. You literally just type 1 sentence into ai (and we have the prompts for you), and 50 video ideas come out. It's honestly insane. And even more insane that people don't use it to make money!!!

Those were some of the most common questions that we get.

Any other questions you have will be answered by Grant himself, in the class.

And as you can see, it's a very straightforward opportunity & anyone with a little ambition & drive can make it work & make \$\$\$ traveling, having fun, doing whatever. It's literally just learning 1 skill, and that skill is one of THE most important skills available right now in the world, because once you get it (by practicing with some help & guidance) you genuinely become an INSTANT hyper-valuable asset to any brand or business in the world. Literally.

Oh and quickly before I forget - make sure you set a REMINDER on your calendar for the free class so you DO NOT miss it!!! These classes are live, don't happen all of the time & there isn't a recording - so make sure you take a little time right now & do what you need to do so you don't forget! (happens to the best of us).

Anyways - if you read this far down, I already know you're going to be successful with this. Seriously. Most people (as in 9 out of 10) don't even read a 9 page document out of laziness, lol. Which is crazy to me. But you did, so you're exactly who can crush with this. And we seriously want that for you. That's why we're here.

See you in the class.
