Jitt Entertainment, LLC

Professional Quick Start Guide

I. Overview

Jitt Entertainment is the ultimate mobile application platform built for businesses, institutions, organizations, influencers/creators, entrepreneurs, and visionaries.

You're not just buying code—you're buying ownership:

- **Fully developed and customizable white-label app**
- **Launch in weeks in the App Store and Google Play**
- **Get it for just 33% of the original build cost**
- **Experienced team of developers to assist you**
- **The admin platform controls all functions of the app**
- **Financing is available for purchasers of the Jitt White Label App**

II. Introduction to the Product

This section provides a brief overview of the product, including its purpose and primary benefits.

Product Purpose:

Jitt empowers YOU to run your own digital arena - where anyone can upload, compete, and win. Whether you are targeting Gen Z creators, building a branded talent hunt, or launching a monetized challenge app for niche. Jitt delivers infrastructure.

Key Benefits:

- Create custom-branded competitions.
- Create city vs. city, state vs. state, or country vs. country challenges and competitions.
- Access users, track user activity, view vote totals, and manage admin-created challenges.

III. Getting Started

This section covers the basic steps to begin using the product. It includes initial setup and configuration details.

Setup

To get started, follow these steps:

1. Introductory Call.
2. Initiate White Label Agreement.
3. Connect with Development Team.
4. Identify customization priorities.
5. Overview of Admin Portal and operations of the App.
6. Launch and initiate challenges through Social Media and Digital Marketing.

Configuration

Configure the product by:

- Updating logos, app name, and colors.
- Enabling the in-app payment processor.
- Running tests, making updates, and securing approvals.

IV. Key Features

Explore the standout features of the product that enhance its usability and performance.

Feature Highlights

Feature	Description
Start A Challenge / Competition	Create a challenge in the app by setting up an electronic event notice that includes the event name, photo, start and end dates, location, age range, and a brief description.
Code Monetization System	Application is designed to support an integrated payment processing.
Voting and Share Engine	All users can vote and participate in challenges, with votes counted automatically and features designed to encourage viral sharing.
Video Upload System	Video viewing is designed to scroll just like on Facebook, TikTok, and other major platforms.

IV. Key Features

Feature	Description
White Label UI	Turn your own branded challenge app into reality.
Launch and Monetize	Deploy your branded app, run challenges, and earn through in-app purchases, ads, or any monetization method you choose.

V. Troubleshooting

This section provides solutions to common issues you might encounter.

Feature	Description
Users are not starting competitions	Acquire partner organizations, collaboratives, sponsors, create challenges or competitions within the Admin portal, and promote continuously.
Limited Number of Users	Promote with Facebook Ads, Google Ads and Social Media Marketing.
