

Bethany Stone

Mindset & Life Skills Coach · Curriculum Developer · Keynote Speaker

Talks that go beyond inspiration and give your audience something they can actually use.

After 23 years in Montessori education — owning a school, developing curriculum, and speaking internationally — Bethany Stone discovered what most leadership programs completely miss: the skills that determine whether a person truly thrives are almost never explicitly taught. Not in schools. Not in business programs. And their absence is almost always what's underneath a team that can't communicate, a leader who's burning out, or an organization that keeps hitting the same wall.

Bethany built the **Five Domains of Human Skill** — a framework of 54 foundational life skills — to address that gap directly. Her sessions are research-backed, curriculum-based, and immediately applicable. Audiences don't just leave inspired. They leave with a framework they can return to.

KEYNOTE & WORKSHOP TOPICS

1 The Invisible Burn

Why high performers are quietly burning out — and how to reverse it before it becomes a crisis.

2 Leadership Is an Inside Job

The missing link in organizational growth: the internal patterns driving every leadership behavior.

3 Communication That Actually Works

Not more talking. Better understanding. Eliminating miscommunication and building real alignment.

4 From Reactive to Intentional

Building emotionally intelligent teams as a core organizational competency — not a soft skill.

5 Happiness Is a Choice

How to shift perspective, cultivate hope, and lead from a place of genuine well-being.
