A man with a shaved head and sunglasses, wearing a light blue polo shirt and dark shorts, is sitting on a wooden log stump on a deck. He is looking to his right. The background features a tropical landscape with palm trees, a wooden fence, and a mountain range under a blue sky with light clouds.

HOW ENGINEERS USE ONLINE INCOME SYSTEMS

A Practical Guide Based on Real Experience

Oliver Staudenmann

- 01. The Problem**
- 02. About**

- 05. What I did**
- 06. The Steps**
- 07. Early Results**
- 08. What This Means**
- 09. Income Systems**
- 10. Start Your Journey**

01 «THE PROBLEM»

Most engineers don't have an income problem.

They have a **time and dependency problem.**

The salary is often good.

But it comes with hidden constraints:

- Income is directly tied to time
- It depends on your role, skills, and availability
- There is always a ceiling

More responsibility doesn't create more freedom.

It usually creates more dependency.

That's how it felt for me.

On paper, everything looked fine.

But in reality, I didn't control my time, location, or income.

I started questioning that model years ago -
after being introduced to the idea that income
could come from systems, not just work.

I tried to act on it.

**But for a long time,
I didn't find something that actually worked.**

02 ABOUT THIS GUIDE

PERSONAL SPEC WHEN I STARTED:

My “goal”: “Make income online (>\$200K/Year)”

(I needed also to see if something was scalable over this amount).

My own requirements/values: No scams

(no social media posting daily or “OnlyFans” - stuff).

I wanted to show how to do this, to show my daughter (29y/Nurse).

How: No clue..

(I was spectiptical after 2,5 years research

– but still willing to try again – I needed to

find proof for my daughter).

**I found the solution according to my requirements - and now
I show others how to they can do the same.**

I will show you the exact steps I took.

But first, let me induce myself..

03 «MY STORY»

Oliver Staudenmann (51) – Proud dad & grandpa - from Norway.

Born in Switzerland, raised in Norway, previous living in Brazil & Angola. Former Senior Welding Engineer, Welding- & Material Teacher, Inspector & Welder. Specializing both on structures & piping.

Building, testing & controlling - Subsea (underwater) equipment - manifolds, compressors, FPSO (ships) and rigs (platforms) for the global energy sector. Working in Europe, Americas, Asia, Africa & North Sea.

The screenshot shows a LinkedIn profile for Oliver Staudenmann. At the top, there is a navigation bar with icons for Home, My Network (14), Jobs, Messaging (13), and Notifications. Below this is a search bar and a banner image for Aker Solutions with the text "We Solve Global Energy Challenges for Future Generations". The profile picture is a circular portrait of Oliver. The name "Oliver (Oliver Staudenmann) Staudenmann" is displayed, followed by his current role "Welding Lead JIC AEG (IWE/IWT/IWI) QA/QC at Aker Solutions" and location "Norway". He has "500+ connections". Two companies are listed: Aker Solutions and Technologic Institute.

«MY STORY»

In 2021, I was accepted into a 4-year Executive MBA program in Norway.

Cost: \$35,000.

At the time, I already had a stable engineering career. But I was tired of the cycle — projects, travel, pressure. And I had ongoing health challenges.

I had also tried building something on my own before. That attempt failed.

It cost me years — and around \$300,000. So I wasn't excited about taking on another “risky” path.

Then a fellow engineer asked me a simple question:
“Is another degree really the solution?”

He suggested something different:

**What if we focused on building income outside the job?
Something not tied to location... or time?**

I laughed at the idea at first.
“Laptop lifestyle” didn't sound realistic to me.

But later that day, I thought about it more seriously.

Had I completely given up on that idea?
Or had I just accepted the default path?

I decided to find out.
I turned down the MBA.

And started researching how online income actually works.

«MY STORY»

What followed:

- 2.5 years of testing
- ~\$25,000 invested in different models and courses
- Multiple failed attempts

We tried:

- Affiliate marketing
- Drop shipping
- YouTube automation

Most of it created more complexity...
Not more freedom.

Then in August 2023...

A few days after we finished building a new system:

I had a brain stroke.

I lost my ability to read, write, and speak.

All five languages I knew.

Life as I knew it — stopped.

«MY STORY»

When I came home from the hospital:

I had to relearn basic things.

- Using a phone
- Making coffee
- Paying bills

At the same time...

The system we had built was still there.

Running.

That was the first time I saw — this wasn't dependent on me anymore.

That's when I realized:

This wasn't just theory anymore.

In 2024, I was diagnosed with Multiple Sclerosis (MS).

Looking back, it had likely been developing for years.

In 2026, I was officially out of the workforce.

No job.

But something had changed:

I wasn't dependent on one anymore.

04 «THE SHIFT»

The biggest shift wasn't tactical.

It was structural.

I stopped thinking:

Time → Money

And started thinking:

Systems → Income

Instead of being paid for hours worked...

I focused on building something that could operate without constant involvement.

That shift became very real after the stroke.

Because I didn't have the option to rely on work anymore.

The question changed to:

How can I create value... without depending on my time or previous skills?

That's when everything became clearer.

05 «WHAT I ACTUALLY DID»

During those 2.5 years, I tested multiple approaches.

Most didn't work the way I expected.

Not because they were "scams"...

But because they were incomplete.

They required:

- Constant input
- Too many moving parts
- Or created another "job" instead of a system

Eventually, I found an map **that brought everything together.**

A structured way to:

- Build a system
- Connect the right pieces
- And create something scalable

High overview: traffic → simple funnel → automated follow-up → offer.

I started building it step-by-step alongside my job. Later, I refined it with feedback and support.

After a few months, I started seeing results. Not massive overnight success.

But something more important:

Proof that the system actually worked.

«WHAT I ACTUALLY DID»

As an engineer, this approach made sense to me for another reason.

In my career as a Welding Engineer, I didn't rely on fixed instructions.

I built procedures based on research, testing, and real-world conditions.

Every new project required adjustments. Refinement. Iteration.

This is very similar.

Instead of following rigid “methods” that quickly become outdated...

I focused on understanding a system — and how to adapt it (with QUICK support).

That's also why I'm not trying to teach everything inside this guide (others teach).

Things change.

Platforms change.

Tactics change.

What matters is understanding the STRUCTURE — and learning from a source that stays up to date.

Now, I realised that I can sell any product or service globally (without providing my own) — I had learned the **system**, the **foundational structure** — **this is the key to online income streams.**

Here are the details or “how-to” steps I used:

06 «THE DETAILED STEPS I DID»

PERSONAL SPEC:

How: No clue..

Step 1: I watched the video and got access for \$37.

Step 2 – 3: I watched the 7 day fast start videos, got to know Stuart and his lifestyle. Then I watched other people who had build their own systems.

Step 4-5:

I watched the ecom and Affiliate courses.

Step 6: Particiate on a “New members” zoom call.

Step 7: Partipiacted on a “Super Affiliate “ zoom call.

I watched these over a two week periode, and I had several “a-ha” moments (I saw some missing pieces in my previous attemps). I felt kind of stupid.

Since I had two weeks left on the 30-day guarantee on my \$37 I paid, I had a decision to make.

1: Get my \$37 back, or
2: start building my own online business.

4-5

«THE DETAILED STEPS I DID»

I had seen a lot that made sense the Modern Wealthy way to earn with an online business.

How ever, I had no clarity what "I" should build or sell..

I had no "passion" or my welding engineer expertise, what not so very "easy sold".

I was looking for ecom products and network marketing products I knew, but nothing was something interesting for me.

The solution, was to schedule a "vision call". I didn't know what this was, but it was stated such a free call could help.

On the call I told (mostly) what I didn't want to do.

But I asked what "Tim Low" started to replace his lawyer salary (I had seen his video) – I assumed it was not by selling his guitars..

So I decided to launch my business with Affiliate Marketing, as this could be the fastest for me as a newbie.

«THE DETAILED STEPS I DID»

The screenshot shows a video player interface. The main video area displays a man in a striped shirt sitting at a desk with a laptop. Below the video is a blue button labeled "Start Now" with a red arrow pointing to it. To the right is a sidebar menu with the following items:

- Download The e-book
- Lesson 1 The Modern Wealthy Way
- Lesson 2 Hyper Profitable Business Models
- Lesson 3 Six & Seven Figure Niches
- Lesson 4 Send Email, Make Money
- Lesson 5 Multiple Income Streams
- Lesson 6 Authority Marketing Secrets
- Lesson 7 Autopilot Traffic, Sales & Income

Then I decided to launch my online business with «LaunchPad».

There are different options available how to start:
DIY – «Do it Yourself» (with or without Mentoring).
DFY – «Done For You» (they build your business for you).

Since I chose DIY option, I used most time.
I used all my spare time, but managed to launch within 60 days (tech wasn't a big challenge for me). Then I added mentoring options.

If starting today, I would choose a smarter option, to save time.

07 «EARLY RESULTS»

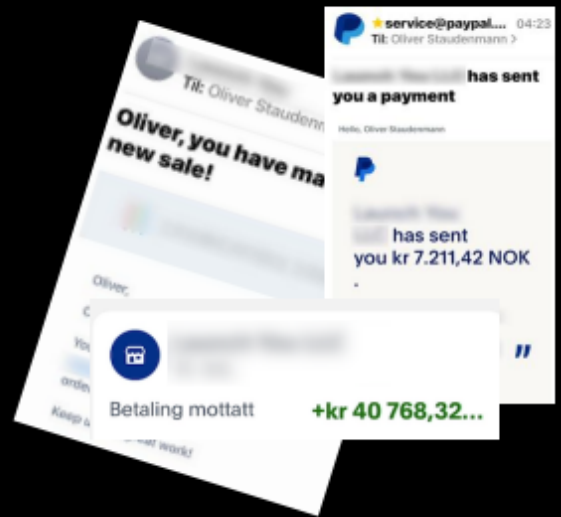

What happened after I built the system

After setting everything up, I started testing it.

These results came during the first testing phase — while I was still learning and refining the system.

These are examples of early results over the following months:

DATE ↓	SOLD BY	COMMISS
Jan 2, 2024	Oliver Staudenmann	\$4,000
Dec 24, 2023	Oliver Staudenmann	\$100
Dec 14, 2023	Oliver Staudenmann	\$30
Nov 30, 2023	Oliver Staudenmann	\$200
Nov 24, 2023	Oliver Staudenmann	\$100
Nov 24, 2023	Oliver Staudenmann	\$400
Nov 24, 2023	Oliver Staudenmann	\$30

For date range (11/1/2023 - 1/31/2024)	
Commissions	\$4,860
Clawbacks	\$0

Example transactions from Nov 2023 – Jan 2024 during initial testing phase

This isn't a "get rich quick" story.

These results showed me something more valuable:

That it was possible to generate income not directly tied to my time.

That was the breakthrough.

«EARLY RESULTS (OTHER PEOPLE)»

At the time I started, I noticed other people on the same journey and started at the same time as me.

There was just two differences of me and her;

1. **She was smart** (asked for help faster than me, since she **wasn't so stubborn as me** who wanted to build all self).
2. **She could refine after audits** (while I had to learn to point on pictures and learn to drive again after the stroke).

Here is her facebook post

She: \$100K in 5 months, not bad as a newbie!

Me: different, but also big wins.

08 «WHAT THIS MEANS»

This is not about quitting your job overnight.

And it's not about chasing hype.

It's about understanding a different model:

- Where systems do part of the work
- Where income isn't fully tied to hours
- Where you build something alongside what you already do

For me, this became **essential**.

But for many engineers, it simply becomes an **option**.

And **options change everything**.

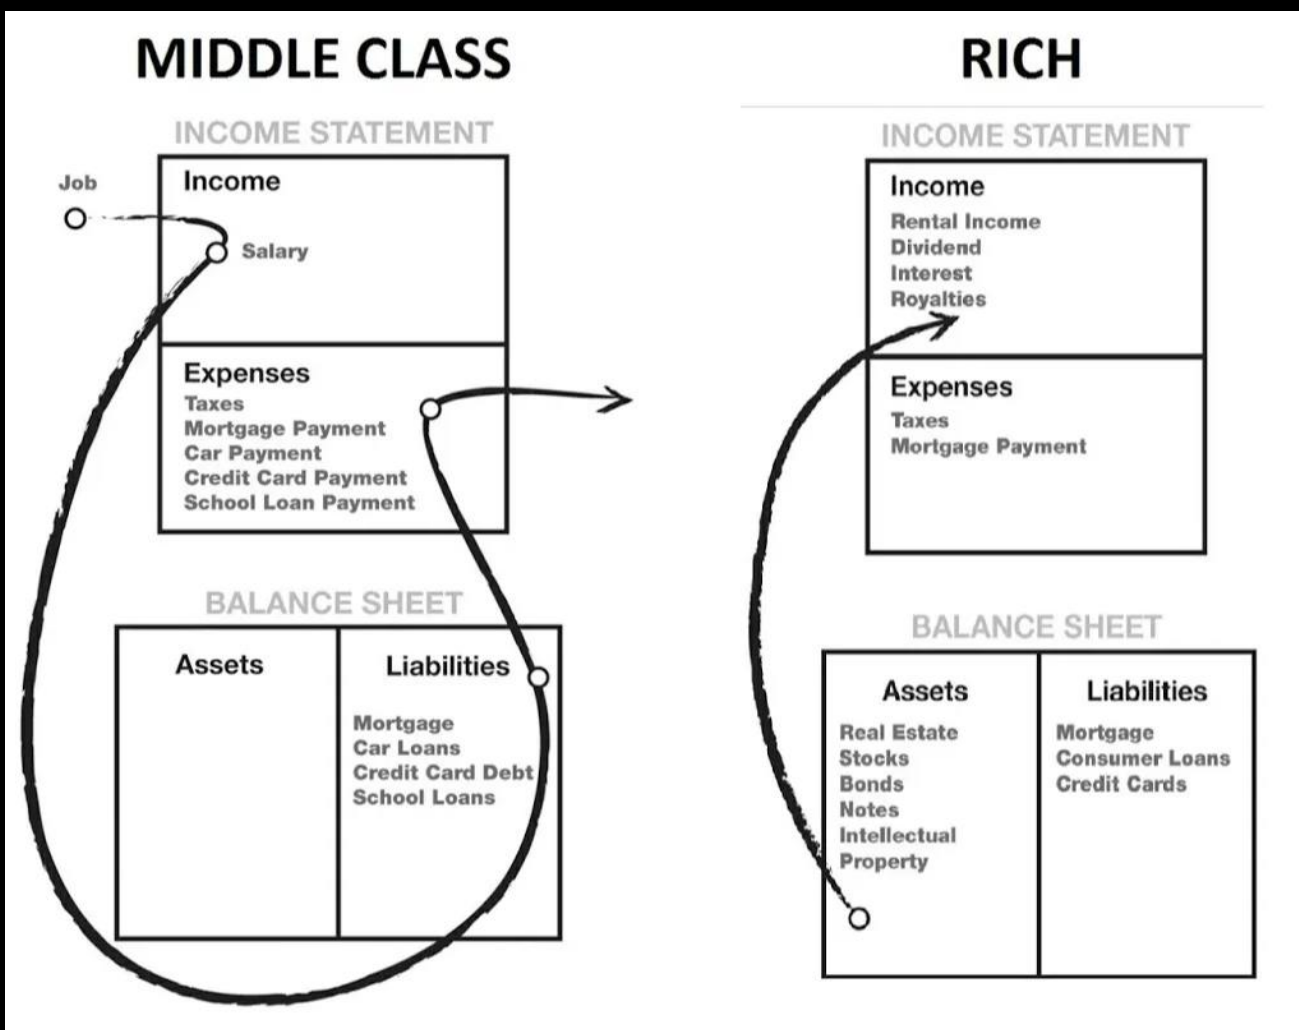

09 «INCOME SYSTEM»

How I use the system (Assets - System – Investor)

In short, I **invest** in **my own** digital **assets** (Intellectual property), put in a online **system**) that creates **income** (royalties/commissions) – and I lets other people sell "stuff"
(I am not interested in selling or a job).

In 2004 I learned from "Rich Dad" to live a independent (rich) life, I should be an business owner (get cash flow from a **system**) and transit over to become an **investor** and acquire more **assets** that make **cash flow** (income). Just like I operate now...

Now, even though it took me 20 years to find a proper system for me, doesn't mean that other people need to search so long. So, let's look how at the steps on a online income system I use – and where you can get one for yourself.

10 START YOUR JOURNEY

The next step is to look at the system I used - and still use.

But I want to be clear upfront:

This is **not** a push-button or “get rich quick” model.

When I first saw it, I was skeptical.

But digital assets made sense to me,
after seeing my own results. Enjoy!
