TUTORIAL

CUT ALL THE CARDSTOCK, DIE CUT & DSP ACCORDING TO THE RECIPE!

DIE CUTTING

See recipe for ALL die cutting cardstock. (see photo sample)

HYBRID INK EMBOSSING WAVES / HEAT EMBOSSING SILVER ONTO WAVES

Using the 2 ½ x 6 Basic White CS & the Hybrid Embossing folder. Open folder with SU logo on your R) lay flat on surface and apply Coastal Cabana ink to the L) inside bottom only. Place your Basic White CS inside folder on the R) side bottom covering only the waves. Carefully close the folder-Run through machine. Take paper out set aside to dry. Take folder to sink and simply rinse with warm water and towel dry. Now die cutting the waves time. I used both wave dies which one to place on top is up to you. Place first wave die facing down just under the boat impression from the embossing folder. Take the second wave die and place facing down ½ inch down further. (see photo sample) run through the cutting machine. NOW place paper back inside Hybrid Embossing folder / line it up exactly where it was before. (YOU CAN DO THIS) You can see right where it was embossed. Run it through the machine AGAIN and RE-Emboss the pieces. THEN take it to your paper cutter and cut off the circle wave holes section from the bottom piece. This will leave you with 2 Beautiful sections with waves on one side and a straight cut on the other. AWESOME!

HEAT EMBOSSING TIME

Using your VersaMark: If you have the refill, put a few drops onto an **old** clear block. IF you don't then just use your VersaMark pad. Wipe with the Embossing Buddy! Select some random white waves and apply a **light coat** with your small artist brush (DON'T GO heavy on this, it will NEVER DRY) Sprinkle with WOW Metallic Silver Embossing Powder-Tap Off-Heat set. If you find you crave more waves, you can do this multiple times. Just don't overheat prior sections done! It's simply the WOW factor these waves deserve! **(Don't stress if you don't want to do this or don't have the powders yet, just do the DIRECT-INK-TO-PAPER ON THE WAVES)**

NOW Stamp 1-Large sailboat with Basic Gray onto Basic White. Let's get to embossing the **two mainsails** for our boats. 1-Lg sailboat we just stamped, 1-Med Peach Pie mainsail CS. Using the TALL wave stamp and VersaMark. Wipe CS with Embossing Buddy, Load the stamp and lay it down where you want the pattern to show. I had to mask / cover the big sail on the (Right) side, stamp (Left) side. Then Mask/ cover (Left) side stamp (Right) side. (Practice on copy paper with a stamped sailboat) The Med mainsail will cover with one stamp. Sprinkle with WOW Metallic Silver Embossing Powder-Tap Off-Heat set.

SILVER LINING ON THE CLOUDS / HEAT EMBOSSING

I put a silver lining on the bottom of 1-Lg white cloud and completely silver lined my Lg Coastal Cabana cloud. * This is optional! (Heat Emboss till your content)

DISTRESSING / DIRECT INK TO PAPER / HYBRID EMBOSSING / COLOR BLENDING

FRONT- PANEL / DSP- Run it through hybrid embossing folder, Ombre white towards the top for the sky with center the boat in the middle. Take out of folder- **NOW DIRECT INK TO PAPER-** Drag the Coastal Cabana ink pad at an angle across the embossed wave section on the bottom ONLY. Glue onto the Coastal Cabana Mat. **COLOR BLENDING TIME-** Use Daffodil Delight with your blending brush and swirl onto both white circle sun die cut pieces. Use Peach Pie ink around the edges with a separate brush. (until desired blended look is achieved)

Do a dry layout of all die cut pieces! I always do this and then take a picture of what you like and exactly where everything is placed. Remove all die cut pieces and start assembly from back to front. (see photo sample) ALL pieces are glued down & together using liquid glue. When that is complete, we will place the NEW WAVE SECTION WE MADE!!

Cut the ½ x 6 strip down to 4 inches. Put 1 LG dimensional on each end place down to cover the cut bottom circle and to put your sailboats in the waves. I also had to slip 2 small dimensionals under waves (see photo sample) Place 3-Black Seagull's where you desire. Stamp Sentiments on Basic White in Tuxedo Memento Black. 1-LG Stylish Shapes Banner die #4. POP up Sentiment banner with dimensionals to even up with the beautiful waves you made!

MIDDLE- PANEL / DSP- Ombre white towards the top for sky. Ink distress with Coastal Cabana, sides and All-over entire panel. (to your liking) Glue down onto the Coastal Cabana mat. Take the Basic White sailboat embossed with silver and place it inside the Hybrid Embossing folder with the die snapped into place. Run through machine to emboss and cut sailboat out. Glue the Silver Foil sailboat to the back of the Embossed White sailboat. Off-Set and shift it to the Left side, so you can see a reflection behind the sailboat. Same as before. Do a dry fit run and place all dies onto mat, take a picture. Remove and start assembling from the back to the front. (Sun, Cloud, Sailboat, Waves) Glue Seagull's where desired. Stamped Sentiment Ahoy! Directly onto the DSP on the right side.

BACK PANEL / Basic White 4 x 5 ¼. I used the **STAMP-OFF** technique stamping for a lovely very light background on the back panel. You can write your message right over the top. Stamp LONG waves with Coastal Cabana, LG Sailboat in Basic Gray, Seagull's I went with Cloud Cover. (use the Ink colors you have) I stamped the Sentiment in Tuxedo Memento Black full strength!

ASSEMBLY Take your Basic White Card Base, Crease good with your bone folder. Start with the back panel first, Glue with equal borders around. Next Glue Middle panel right past and onto the 2 ¼ score line. This is where the card starts to LINE UP.. Make sure the Middle mat is exactly lined up with the back panel. Apply glue to the front of the card base, place Front panel onto base **LINING UP** with both panels underneath. Hold and adjust anything off alignment. Close card base and set LG clear block on top, leave to dry. The card is complete. Congratulations!! You have made a Beautiful Double Flap Z fold.
