

Your VCE exam revision calendar

Two mocks. Individual marking. Clear next steps.

All dates: 2026 | Melbourne time | Exam: 12 November

ON ENROLMENT

Start as soon as you enrol

Enrolment closes 9 October. If you join then, Mock 1 is due two days later, on 11 October.

UNTIL 10 OCT

Diagnose and practise

Open your course and study guide. Target weak topics with videos and questions; begin Mock 1 once available.

11 OCT

Submit Mock 1

Sit the full paper under its stated exam conditions. Email one readable PDF to Dan.

BY 16 OCT

Use your marking

Read the individually marked result and top-three fixes. Plan what you will practise next.

17 - 25 OCT

Fix, then join the clinic

Reattempt errors on 17-24 October. The 60-minute online group clinic is on 25 October; time and link to follow.

26 OCT - 1 NOV

Retest with Mock 2

Apply your fixes under exam conditions. Submit Mock 2 by 1 November.

BY 4 NOV

Review your progress

Compare both mock attempts. Use your new top-three fixes to focus the final week.

5 - 7 NOV

Check final answers

Send up to two short written answers for checking. This final-answer check closes 7 November.

8 - 12 NOV

Consolidate and prepare

Use 8-11 November for targeted review and familiar questions. VCE Physics exam: 12 November; confirm venue and timing with school.

Your repeatable revision routine

Adapted from Dan's How to Study Physics guide. Start with a focused 20-40-minute block, then take a break.

1

Recall first

Close your notes. Explain the idea, sketch a diagram or write down what you remember.

2

Fix one gap

Watch the relevant short video or review the explanation. Say why the method works.

3

Solve, then check

Attempt related questions yourself. Check your working and name the mistake to avoid.

4

Revisit later

Try the question again without notes. Revisit within 24 hours, a few days later and the following week.

Access and support

Use the email entered at checkout to find your course access email. Check spam or promotions if it is missing. If a parent purchased, start with that parent's inbox. For student access under a different email, contact Dan; do not purchase again.

Submit a mock in one email

Email dan@learnphysics.com.au from the checkout email, or identify that email in your message. Attach one PDF with every page in order. Include the student's full name and Mock 1 or Mock 2 in the filename.

Subject: LP2026 - Mock 1 - Student name
For Mock 2, replace Mock 1 with Mock 2.

Before you send

Check every page is readable and correctly rotated. Keep your original. For the final check, send up to two short written answers by 7 November using subject LP2026 - Final answers - Student name.

Clinic: 25 October, 60 minutes online, replay included. The joining link and exact time will be sent separately. Mock-paper availability will also be communicated separately.
