ARBCORE

OPEN CRYPTO ARBITRAGE

– Local broadcast of **TXID** transactions

– Arbitrage trading overview via **API**

– Deposit confirmation through an **invoice**

– **Profit** withdrawal through a trading smart contract

– **Legally** compliant operations

1. TRANSPARENCY

AUTOMATED AND LOGICAL

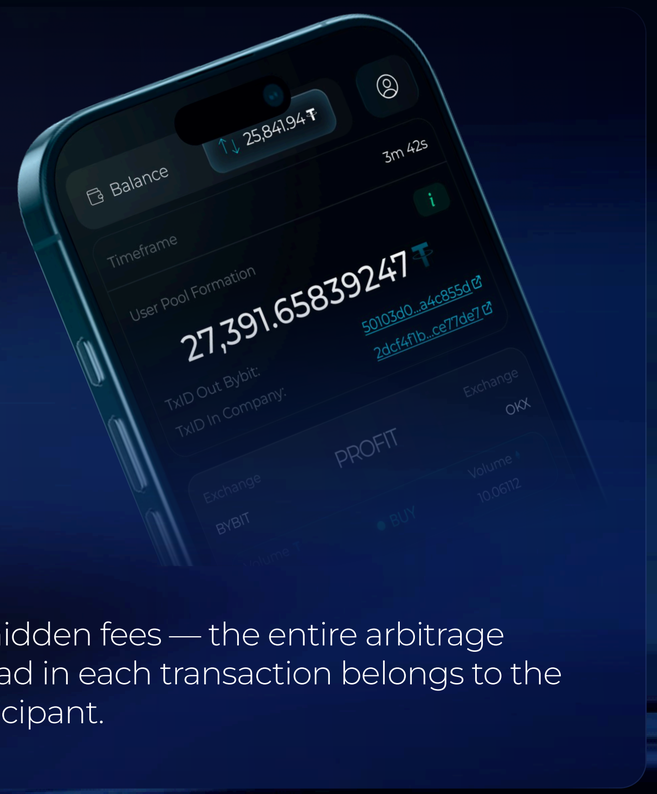

(TXID) arbitrage transactions are displayed in the public blockchain registries.

ARBCORE crypto-arbitrage transparency

Guaranteed by Public Blockchain

Blockchain ensures security and trust — any ARBCORE participant can verify (TXID) transactions of arbitrage operations.

No hidden fees — the entire arbitrage spread in each transaction belongs to the participant.

ARBCORE

THE MOVEMENT OF CIRCULATING ASSETS IS FULLY AVAILABLE FOR MONITORING THROUGH EVERY (TXID) TRANSACTION.

Real-time (TXID) transaction broadcast.

2. EXCHANGE TRADING.

OPEN AND PUBLIC API

Through a public API key, we provide a full picture of order execution inside the order book across two crypto exchanges simultaneously:

BUYING AND SELLING — INTER-EXCHANGE ARBITRAGE

- Clients can see at what price and what portion of the pool is being sold or bought.
- Clients can see when counter orders are used and at what prices.
- Clients can see the overall execution result and their actual spreads.

WE MADE OUR SYSTEM CLEAR AND TRANSPARENT.

3. STABILITY

ARBCORE ARBITRAGE IS A RELIABLE SOURCE OF INCOME

Based on mathematics and price differences — not market volatility.

A systematic approach to security measures and a thorough check of every trade.

Significant arbitrage volumes ensure consistent, high-quality arbitrage returns.

Using matched P2P orders for exchange execution guarantees fast selling and buying.

Simultaneous buys and sells, verified accounts, and low fees eliminate all risks.

We earn as market makers.

We create the market.

We don’t engage in speculation or "catching pumps."

We are the ones who place orders and control our own trade flow.

THIS ENSURES FLEXIBILITY AND CONTROL.

4. PROFIT

THE ARBITRAGE SPREAD IS CONSISTENTLY PROFITABLE.

WE DON’T RELY ON MARKET VOLATILITY — WE SIMPLY CHOOSE THE BEST OFFER AVAILABLE ON THE MARKET.

This is a systematic approach: we analyze the market, filter orders, place profitable listings, minimize risks — and scale the results.

The difference between buy and sell prices can be as high as 0.25%, and with repeated trades this becomes a significant and stable source of income.

ARBCORE

AFTER OPENING THE TRADE CONTRACT:

from **1.07%**

Net spread per day

from **33%**

In total per month and above

from **50$**

Amount to start working in the pool

from **10$**

Amount for automatic withdrawal

The trading smart contract automatically sends all received spreads to personal wallets.

EASILY JOIN AND RECEIVE HIGH PROFITS EVERY DAY!

5. LEGALITY

ARBCORE

INVESTMENT CONFIRMATION VIA INVOICE

- The invoice specifies the investment amount and outlines the timeframe for fulfilling obligations.
- This document confirms the company's commitments to the investor.
- Any amount invested into arbitrage is verified and documented through an invoice.

REGULATION

The ARBCORE.CAPITAL app and website operate under the management of Capital Co. Ltd.

This is a private limited company regulated under Hong Kong law and authorized to conduct cryptocurrency exchange activities.

Among other things, it is licensed to exchange up to 10 types of digital assets, including the buying and selling of crypto through licensed pricing providers (cryptocurrency trading platforms). This fully complies with the requirements for legal arbitrage operations conducted through ARBCORE.

TRADING CONTRACT

The trading contract defines the terms of the arbitrage partnership. Clients participate in arbitrage using assets such as USDT, ARBCORE tokens, ETH, and others.

Contract obligations: clients receive profit totaling **250% of the amount** that is under management and involved in arbitrage operations.

Obligation timeframe: based on the calculation of average arbitrage returns, the obligations under the contract will be paid in full within a period of three to five months.

Resources for fulfillment:: Profit is generated from the results of open arbitrage trading and is sent daily to clients' personal wallets.

A CLIENT MAY TERMINATE THE TRADING CONTRACT AT ANY TIME AND RECEIVE PAYMENT OF THE AMOUNT DUE, ACCORDING TO THE TERMS OF THE OBLIGATIONS STATED IN THE INVOICE.

6. ACCESSIBILITY & SECURITY

EASY ACCESS TO THE ARBCORE MINI-APP

1. Automatic authorization through your Telegram account.
2. Fast and convenient instant access, no installation required.
3. Support for built-in cryptocurrency payments.
4. Integration with other services, encrypted data exchange.

SECURE SERVICE

- Server-side validation of Telegram WebApp InitData.
- JWT sessions inside the Mini App, verified hosting.
- CRM data protection through a proxy server and tokenization.
- Protection from XSS, injections, CSRF, and secure API interaction

SECURE FUNDS

- Multi-layer smart-contract auditing.
- Replication of “hot” and “cold” wallets.
- Decentralization and financial verification through zkml.
- Multisignatures and cyclical turnover on the blockchain.

7. PARTNERSHIP

WHY PARTNERS CHOOSE ARBCORE

ARBCORE HAS CREATED AN OPEN MODEL FOR GENERATING FINANCIAL RESERVES.

Arbitrage — stability and confidence for the investor.

- ✓ An ARBCORE investor always knows exactly when and in what amount they will receive the full volume of invested assets according to the invoice. The total return generated by the arbitrage strategy amounts to **250%.**
- ✓ ARBCORE consistently receives financial benefits and the ability to accumulate arbitrage turnover assets, which in turn leads to active growth of arbitrage spreads.

Invite partners and earn additional profit.

Partner reward **5%**

From the deposit amount of your direct partner.

AUTO-EARN PROGRAM

This is the period during which Arbitrage Profit is accumulated in the Company's wallets.

The profit received stabilizes the economy and compensates for marketing expenses and partnership program costs.

Clients also earn during this time.

8. NETWORK REWARD

THIS IS A SIMPLE AUTOMATED SYSTEM

Progression in development is stable.

The program uses a ranking model that determines the depth of levels from which you receive daily accruals. Upon closing each rank, you will receive rewards.

You earn

10%

of your network's income

What rank advancement provides:

- Opening new levels deeper.
- Increasing the accounted volume of the network.
- Growth of potential daily income.

Example of how the program works:

Suppose you have the SILVER level open, and your structure has gathered 22,454 USDT. You have 2 active partners, a personal deposit of 1,000 USDT, and up to 112 partners at depths of 4–6 levels.

The system tracks the full amount of profit earned by your partners and automatically credits you with 10% of that total — roughly 35 USDT per day.

As your structure grows, new ranks unlock, giving you access to deeper levels of the network. More levels counted means higher daily earnings and an increased withdrawal limit.

8. STRUCTURE SYSTEM

RANKING TABLE

RANK	Personal Deposit	Total Volume of Personal Partners	Personal Partners	Maximum Partners	Maximum Withdrawal/24h
BRONZE (level 1-3)	250 USDT	500 USDT	2	14	1,000 USDT
SILVER (level 4-6)	1,000 USDT	2,500 USDT	2	112	2,000 USDT
GOLD (level 7-9)	2,500 USDT	5,000 USDT	2	896	3,000 USDT
PLATINUM (level 10-12)	5,000 USDT	10,000 USDT	2	7,168	4,000 USDT
DIAMOND (level 13-15)	10,000 USDT	25,000 USDT	2	57,344	5,000 USDT
ROYAL (level 16-18)	25,000 USDT	50,000 USDT	2	458,752	6,000 USDT
INFINITY (level 19-21)	50,000 USDT	100,000 USDT	2	3,670,016	7,000 USDT

9. CASHBACK PROGRAM FOR PARTNERS.

ARBCORE

SYSTEM OF ADDITIONAL REWARDS

Cashback is an additional reward for network partners. Cashback is awarded only to those partners who have met the conditions of their network activity.

2%

of the network volume

Each day, the system analyzes the total volume of your network and determines which cashback level you qualify for.

Example of how the cashback program works

Suppose your structure has reached a volume of 200,000 USDT. The system records that you have met the conditions for this level of cashback and credits you:

2% of the volume — 4,000 USDT cashback.

Cashback table

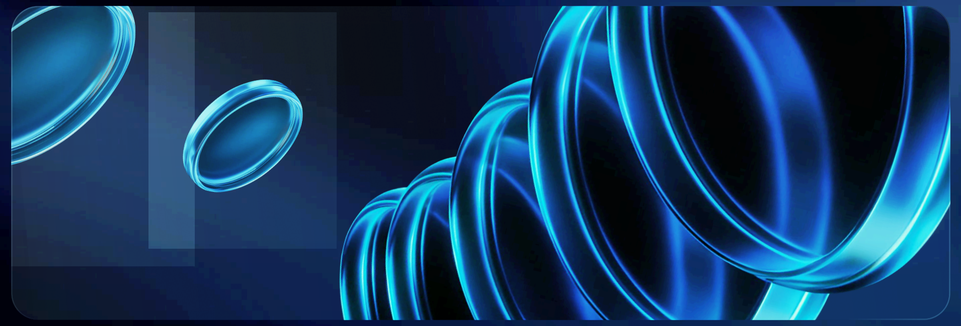

Network Volume	Cashback
10,000	200
25,000	500
50,000	1,000
75,000	1,500
100,000	2,000
150,000	3,000
200,000	4,000

In the world of financial management

Leads as a strong, open, well-balanced, and stable strategic player!
