

Useful information

Teamwork and Interdisciplinary Collaboration

Participants will work in interdisciplinary and international teams throughout the Summer School. The program encourages collaboration between students from different academic backgrounds, including STEM, humanities, social sciences, languages, education, and communication studies. Openness to dialogue, teamwork, and intercultural exchange is considered an essential component of the learning experience.

Networking Opportunities

The Summer School will provide opportunities for networking with students, researchers, and lecturers from multiple European universities participating in the HUMANISTA network. Participants will be encouraged to establish future academic and professional connections, including potential collaborations in mobility programs, research initiatives, and international projects.

Code of Conduct / Inclusive Environment

The HUMANISTA Summer School is committed to fostering a respectful, inclusive, and collaborative international learning environment. Participants are expected to demonstrate professional and respectful behavior toward fellow students, lecturers, organizers, and local communities throughout the duration of the program.

Dissemination / Visibility Clause

Selected participants may be invited to contribute to dissemination activities related to the Summer School, including short testimonials, photographs, reflective reports, or participation in promotional and academic dissemination materials prepared by the HUMANISTA network.
