## Passive Survey Income System

Once you set up these passive apps and platforms, they will allow you to earn \$10-\$40 per day without doing anything additional. When your passive stack is running, you'll be able to wake up to money in your account before you've even started your active session. That's when the daily income starts to feel real and consistent in a way that changes everything.

---

## What Is Passive Survey Income?

Passive survey income comes from apps and platforms that collect data from your devices in the background. You install them once, set them up once, and they run quietly in the background of your phone or computer. No daily effort. No surveys to complete. Just money added to your balance while you live your normal life.

On its own this adds \$300-\$1,200 per month with zero daily effort. Stacked on top of your active survey income, it pushes your totals significantly higher without adding a minute of work.

---

## Tier A: Pure Passive -- Install Once, Never Touch Again

- \* Nielsen Computer and Mobile Panel ([nielseniq.com](https://nielseniq.com)) -- \$50 per device per year. Install the app on your phone, tablet, and computer. Tracks anonymous usage data silently in the background. A one-time 15-minute setup across 3 devices pays you \$150 per year for zero ongoing work. Start [here first](#).
  - \* MobileXpression -- Similar to Nielsen for smartphones. Install on your phone, verify your account in 3 minutes. Monthly PayPal payments begin within 30 days of installation.
  - \* SurveySavvy Connect ([surveysavvy.com](https://surveysavvy.com)) -- Background internet tracking app. Adds passive income to your SurveySavvy balance every month. Combine with SurveySavvy active surveys to stack your earnings.
  - \* Data.ai Consumer Panel -- Anonymous app usage tracking from your smartphone. Pays via gift cards monthly. 5-minute setup, no maintenance ever.
-

## Tier B: Low-Effort Passive -- 5-10 Minutes When You Feel Like It

- \* Surveys On The Go (surveysonthego.com) -- Push notification surveys on your phone. Usually 1-3 minutes each, pays \$1-\$3 instantly via PayPal. Just tap yes when a notification comes in during a commercial break or waiting in line. Fastest payout of any app in this list.
- \* Perk TV -- Watch short video clips and earn points in the background while watching your normal TV shows. Set your phone next to you and let it run. Points convert to PayPal cash or Amazon gift cards.
- \* Swagbucks TV Passive Mode -- Similar to Perk. Video watching earns points that convert to PayPal cash. Passive mode runs without requiring interaction.
- \* S'more Lock Screen (Android only) -- Earn money just for having ads displayed on your lock screen. No interaction required. Completely automatic income for Android users.

## The One-Time Passive Stack Setup

Set these up in order. The whole process takes about 45 minutes once. After that, you never touch them again.

- \* Step 1 (15 min): Sign up for Nielsen Computer and Mobile Panel. Install on your phone first, then your tablet, then your computer. Verify each device. This is your biggest annual passive earner.
- \* Step 2 (5 min): Install MobileXpression on your smartphone. Verify your account. Done.
- \* Step 3 (10 min): Install Surveys On The Go on your phone. Enable push notifications. Complete the profile so you get relevant survey notifications.
- \* Step 4 (10 min): Sign up for SurveySavvy and install the Connect app. Link your account. Done.
- \* Step 5 (5 min): Set up Perk TV. Open the app and let it run while you do other things. It doesn't need your attention.

Total setup time: 45 minutes one time. Your first passive payments start appearing within 7-14 days of setup. After the first month, you have a consistent \$300-\$800 monthly passive income running completely on autopilot while you sleep, work, or spend time with family.

## Maximizing Passive Income Over Time

- \* Add every device you own to Nielsen and MobileXpression. Phone, tablet, laptop, desktop -- each one adds income. The more devices the more you earn.
- \* Keep your passive apps updated. Outdated apps get removed from tracking networks and stop earning. Check for updates monthly.
- \* Respond to Surveys On The Go notifications immediately when you see them. These are quick and are the fastest-paying passive income in the stack.
- \* Let Perk TV run while you sleep. Phone on the charger, app open, earning all night. This alone adds \$5-\$10 per day with zero effort.
- \* Don't cash out too often. Let balances accumulate to hit better payout tiers where applicable. Weekly or bi-weekly cashout is optimal.

Combined passive income target once fully set up: \$300-\$800 per month. Stack this with your active survey income (\$1,500-\$3,000 per month at \$50-\$100/day) and you have a total income stream of \$1,800-\$3,800 per month from surveys and passive income combined -- all from a 15-minute daily routine plus a one-time 45-minute setup.
