

Light the Church Initiative

A Community-Funded Permanent Roofline Lighting Program for Churches

Our Mission

The Light the Church Initiative helps churches enhance their visibility, beauty, and community presence through professionally installed permanent roofline lighting—funded by the people and businesses who support them. Churches are landmarks. They deserve to shine.

What This Means for Your Church

This program allows churches to receive permanent exterior lighting without allocating funds from ministry budgets. We help organize a community-supported fundraising campaign that covers the full cost of professional design and installation.

What's Included

- Permanent, low-profile roofline lighting
- Custom lighting design to match your building
- Energy-efficient, long-life system
- Year-round control for holidays and events
- Professional installation by Tec Arm, LLC

Participation Details

Participation is optional and obligation-free. Churches are selected through a nomination process, and installation begins once the community fundraising goal is reached. We install a limited number of churches each year to ensure quality and care.
