5-STEP CRYPTO QUICK-START

STEP 1 — ON-RAMP

Turn your cash into digital value using a trusted exchange.

STEP 2 — BUY CRYPTO

Purchase your first Bitcoin, Solana, or Base ecosystem asset.

STEP 3 — SELF-CUSTODY

Move your crypto to your own wallet and control your keys.

STEP 4 — GO ON-CHAIN

Send, receive, and use crypto with dApps and Web3 tools.

STEP 5 — SECURE & GROW

Protect your wallet, avoid scams, and build long-term with DCA.

How to Use This Guide

HOW TO USE THIS GUIDE

This guide is designed to help you orient yourself, not rush you into action.

Crypto can feel overwhelming because many resources assume you should already know what you're doing — or move faster than is comfortable. This guide exists to slow things down and provide context.

You don't need to complete all five steps right away.

You don't need to act just because a step exists. Think of these five steps as a reference, not a checklist.

They show the order things tend to matter in crypto — not what you should rush to do.

Most people move through these steps over time, not all at once.

You may recognize yourself in one or two steps right now. Others may not be relevant yet.

That's normal.

If something here feels unclear, you can pause.

If something feels familiar, you can stay with it.

There is no finish line implied.

This guide is meant to reduce pressure — and help you make decisions on your own terms, when you're ready.

A simple reminder

You don't need to know everything to start.

You just need to know what matters now — and what can wait.
