INSECT SCREENS

KEEPING PESTS OUT & FRESH AIR IN

Enjoy open spaces without the frustration of insects, heat, or constant interruptions.

Anchor & Oak Projects supplies high-performance insect screening systems designed to keep unwanted pests out while maintaining airflow and visibility. Built using durable, precision-engineered materials, our screens create a reliable barrier without compromising the look and feel of your space.

The result is a more comfortable, usable home - where indoor and outdoor living work together seamlessly. Designed for South African conditions, our systems combine durability, functionality, and clean architectural finishes, making them a practical choice for both modern homes and residential developments.

Service Area

Anchor & Oak Projects serves homes and developments across all of KwaZulu-Natal, providing expertly crafted blinds with professional installation. Supply and installation can be arranged anywhere in the province.

ANCHOR & OAK SCREENS

Comfort, Control, and Protection

Maximise your space with screens that blend functionality and style. Our retractable concertina designs allow windows and doors to open fully, bringing in fresh air and natural light - without letting in pests.

Choose the right protection for your home or business:

- Insect Screens – keep out mosquitoes, flies, snakes, monkeys, and other intruders.
- Blockout Screens – enjoy complete privacy, reduced glare, and total light control.

Anchor & Oak screens offer a smart, seamless solution for a comfortable, secure, and pest-free environment.

Proudly South African, Expertly Crafted

All Anchor & Oak screens are designed and manufactured locally, ensuring exceptional quality, precision, and durability. Our skilled team follows strict local standards, delivering products that combine reliability, style, and long-lasting performance. We take pride in supporting local craftsmanship while providing our customers with the best value and service

Material Excellence

Anchor & Oak Screens are manufactured with premium materials, ensuring durability and longevity.

Screens feature:

- 25mm frame providing structural strength and resistance to corrosion
- Honeycomb mesh offering durability and resistance to tears and punctures.
