The Inbox2Sale – User Guide

What It Does:

Inbox2Sale turns your product or link into a story-driven email that sells.

Instead of dry pitches, it writes emails built around lessons and stories that readers remember. With a library of 365 story titles drawn from history, fables, business, psychology, and pop culture, every email is designed to capture attention, convey a useful message, and naturally lead into your offer.

Inbox2Sale helps you send emails people actually enjoy reading — and that guide them straight to your call-to-action.

How to Use It:

Step 1: Start a Conversation

You can begin with:

 **"Story first, offer second."**

 **"Turn this link into an email."**

 **"Teach with a story, sell with my product."**

 **"Find the right story hook for this email."**

Step 2: Provide Your Offer Info

The GPT will ask you:

- Do you want to share a **URL** or **describe the product**?
- Do you want to **pick a story category** or let the AI choose?

- What's your **preferred tone** (casual, professional, humorous, etc.)?
- How long should the email be? (**Short**, **medium**, or **long**?)
- Do you want **1 email**, **a 3 email series**, or **a 5 email sequence**?

Step 3: Review & Revise

- The Inbox2Sale will write an email that starts with a **story**, teaches a **lesson**, and flows naturally into your **product promotion**.
 - You can ask for tweaks—tone changes, different stories, or more punch in the CTA.
-

What Makes It Different:

- Story-based selling that *feels human*, not robotic.
 - Draws from a **rich, categorized library** of stories (fables, myths, failures, pop culture, psychology, and more).
 - Avoids cliché AI phrases and keeps your message *natural and engaging*.
 - Built-in variety, so emails don't repeat the same stories or style.
-

Words It Won't Use:

To keep emails natural, the Inbox2Sale avoids robotic buzzwords like:

"delve," "holistic," "tapestry," "revolutionize," "unlock," "realm," "pivotal," "skyrocket," and over 100 more.

It speaks like a human—not a press release!
