Answer One Quick Question

Real quick! I want to make sure this Masterclass is as helpful as humanly possible... What's stopping you from going all in on a digital course?

- Recession, changing circumstances, and a general feeling of uncertainty of the future
- No \$\$ to put into a course launch — I'd love to bring in some revenue first
- I'm so strapped for time it's ridiculous
- I struggle with feeling [fill in the blank] enough — experienced enough, well-known enough, techy enough, etc.
- I have every good intention but I struggle to follow through (if I'm being honest)
