

THE LOST TEDDY IN SMART CITY

In a big smart city, a little girl dropped her teddy bear.

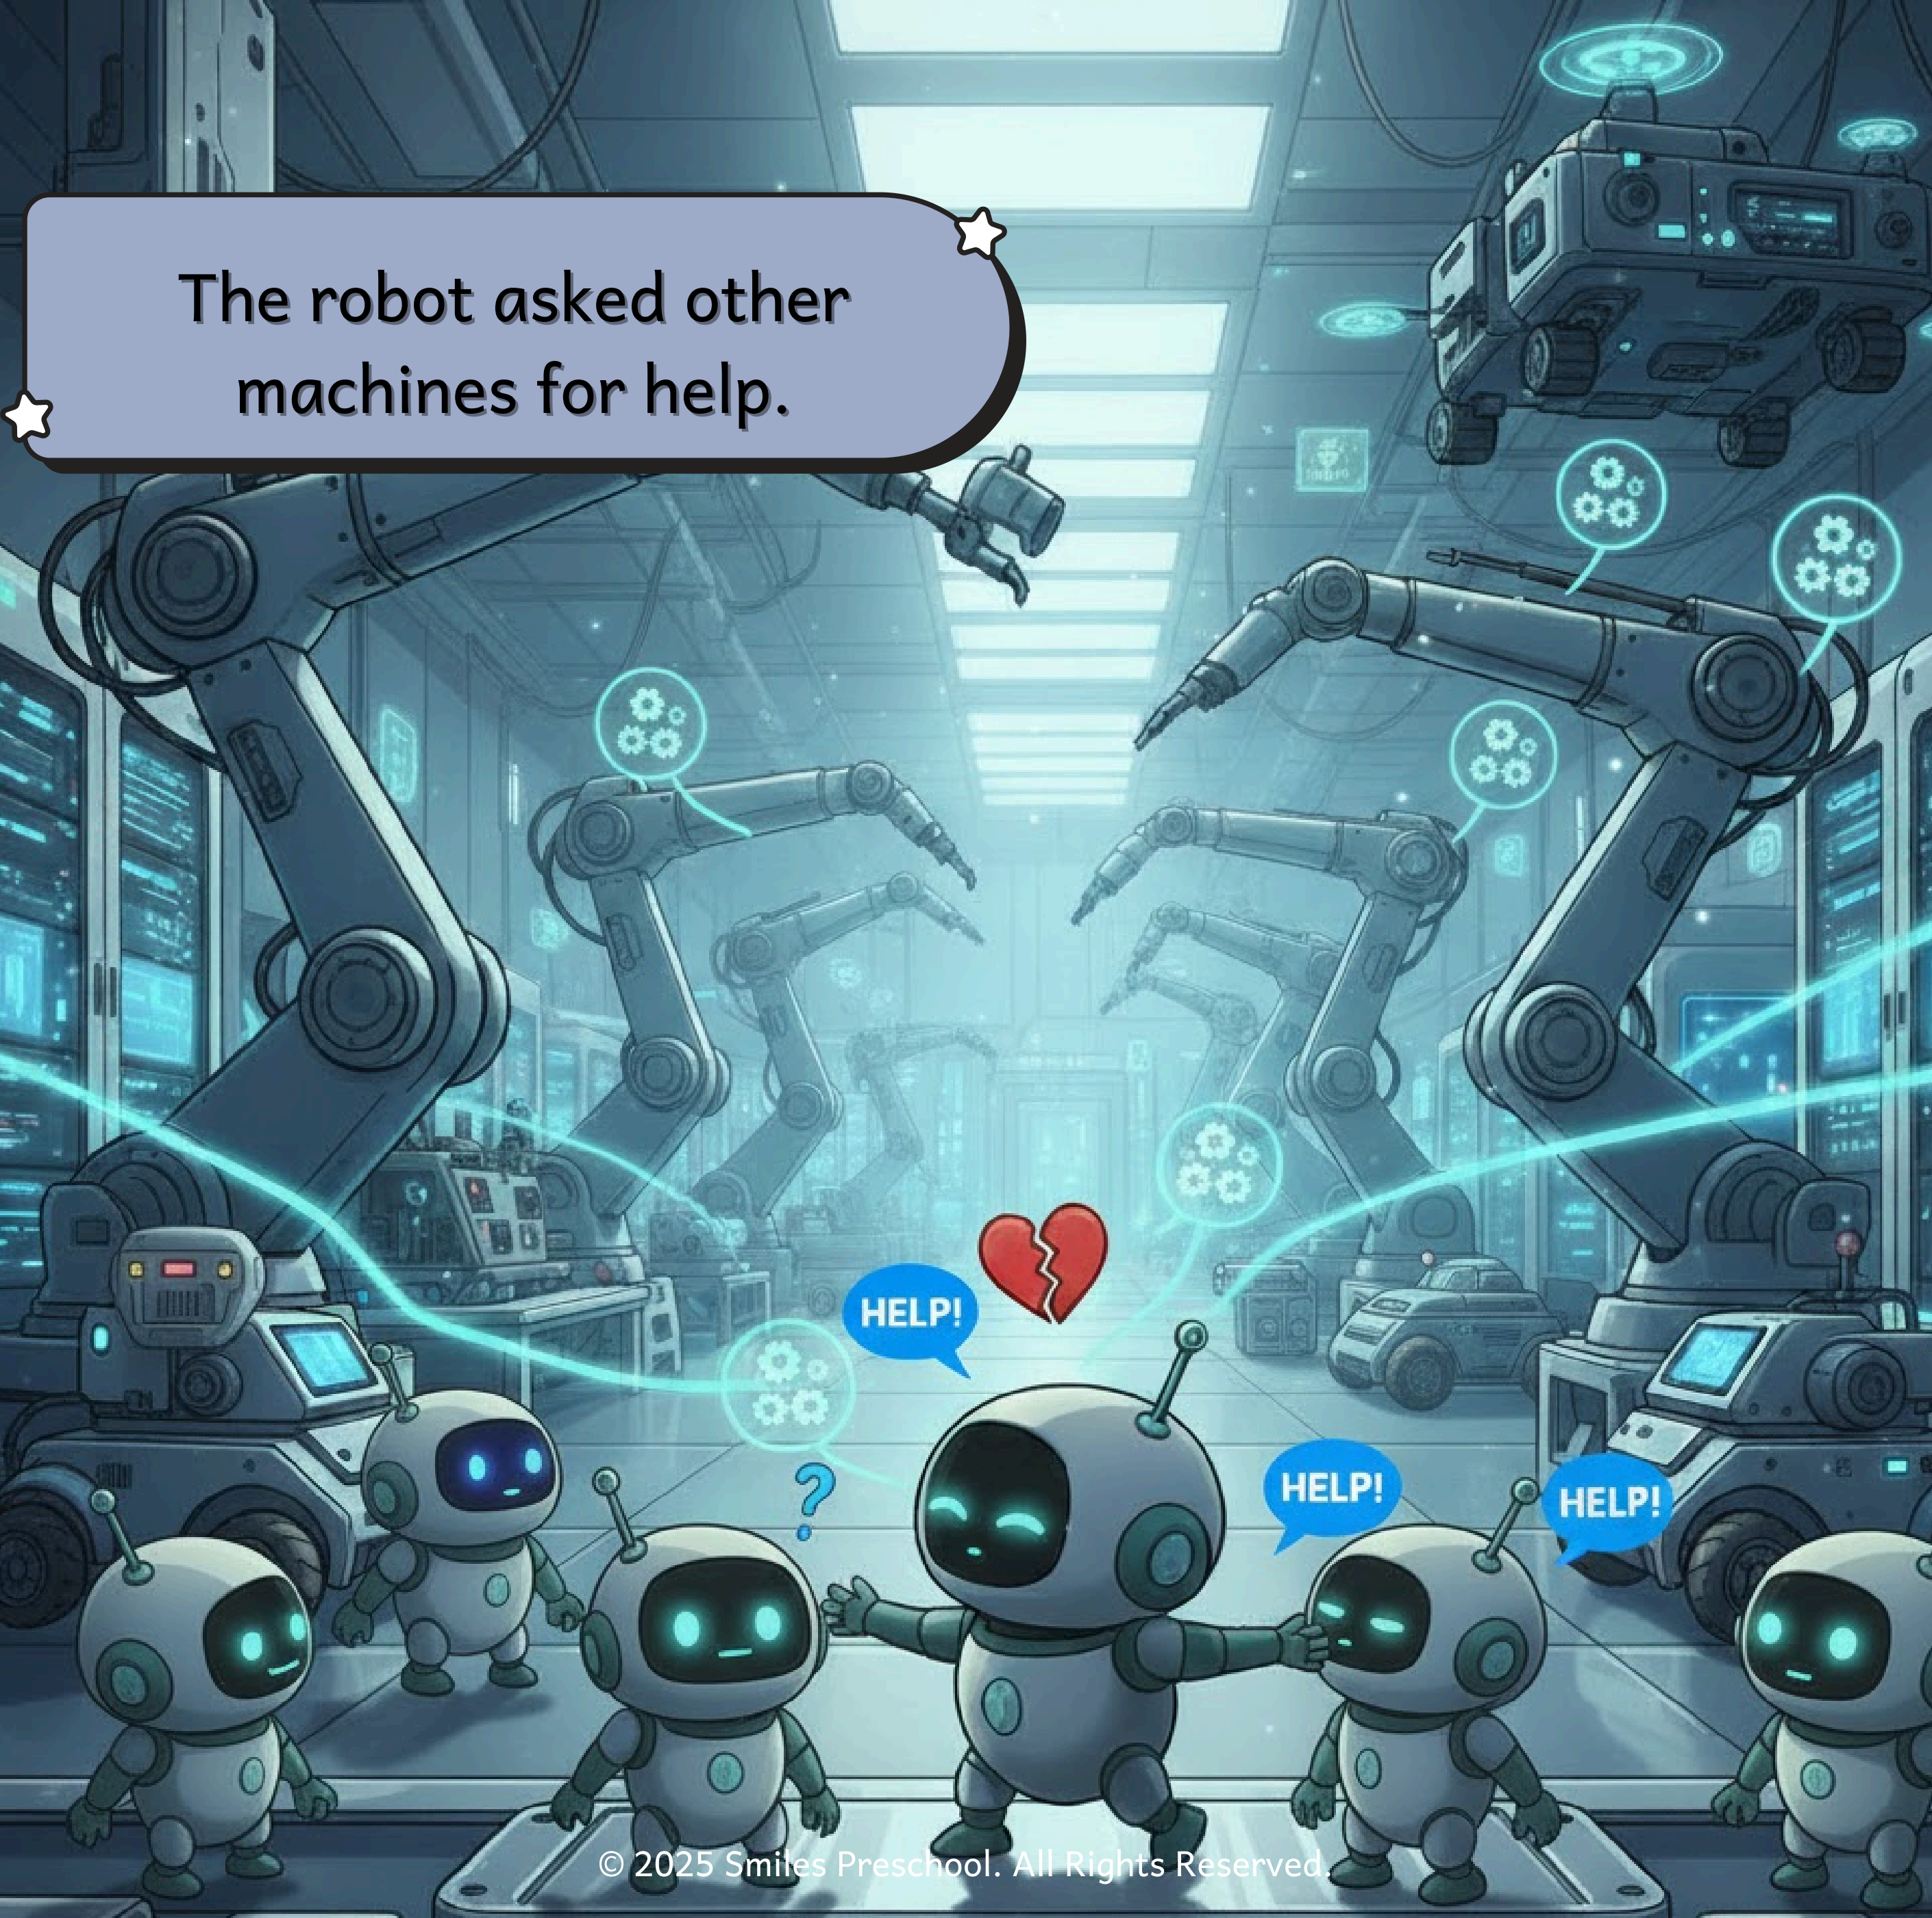

It sat by the road as cars zoomed past.

A delivery robot noticed it and beeped sadly.

The robot asked other machines for help.

Drones searched high,
scooters searched low.

Soon, the teddy was safe at the Lost & Found hub.

LOST & FOUND

The girl ran in and hugged it tight.

“Thank you, robot friends!”
she said.

LOST & FOUND

Thank you,
robot
friends!

The robot's lights blinked
like a smile.

LOST & FOUND

Kindness makes every city
shine brighter. THE END.
