

The Unicorn Who Loved Science

Sparkle the Unicorn loved rainbows and robots alike.

Other unicorns laughed at her wires and tools.

“Magic is better than science,” they said.

Sparkle believed both could shine together.

She built a rainbow-maker
that cleaned the air.

Clouds turned into colorful mist above the forest.

The unicorns gasped at her invention.

“Science is magic too!”
Sparkle smiled.

**Science is
magic
too!**

They joined her in creating
new wonders.

Believing in yourself creates the
brightest rainbows. THE END.
