

# The Three Green Pigs

Three little pigs wanted homes  
in the eco-friendly city.

# The first built a plastic straw house.

# The second built cardboard walls.

The third used solar bricks and recycled materials.

**The Big Bad Wolf came  
with his powerful leaf blower.**

The plastic house melted in the sun.

The cardboard house blew away in the wind.

The solar brick house stayed strong and bright.

The pigs shared solar power with the whole village.

The wolf learned that going green makes everyone win.

THE END.
