

TOMMY AND THE TIME-TRAVELING TABLET

Tommy found an old tablet in the attic.

When he turned it on, it showed pictures from history.

Suddenly — whoosh! — he was in the past!

He met people planting the first trees in his town.

He helped them build a library of stories.

Then the tablet brought him home again.

Tommy realized how good the past was.

He started a reading club to keep history alive.

The tablet blinked and said, 'The past teaches us how to make tomorrow better.' he said.

Believing in yourself creates the brightest rainbows.
THE END.
