PAGE 1

High on a sunny hill stood
Rapunzel's tall, beautiful
tower—covered in solar
panels!

Rapunzel loved reading,
painting, and charging her
gadgets with clean energy.

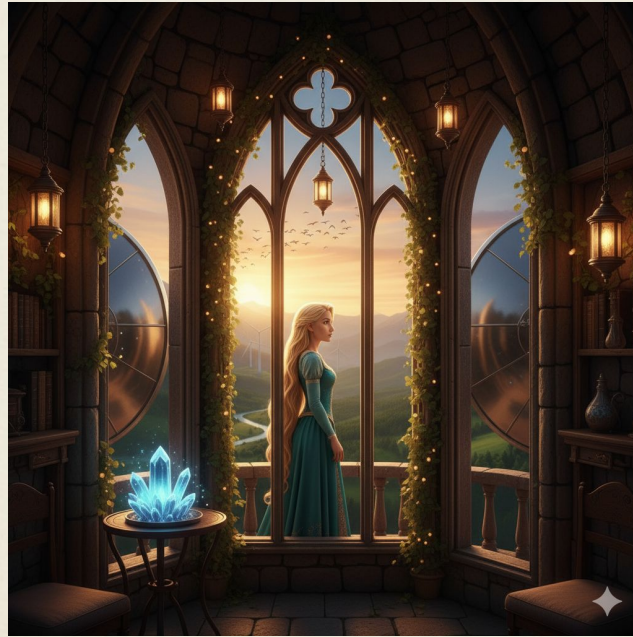

But her tower's Wi-Fi wasn't great. "Ugh! It drops every time a cloud passes!" she sighed.

Her teacher, Mother Gothel,
liked keeping things “quiet.”
“No updates or calls!” she
said sternly.

But Rapunzel dreamed of exploring the world beyond her solar balcony.

One day, her panels stopped working! “Oh no—my battery’s empty!”

PAGE 7

She grabbed her broom and
climbed to the roof to clean
them herself.

Just then, a boy named Flynn
rode by on his e-scooter.
“Cool tower!” he said. “Need
help fixing your solar?”

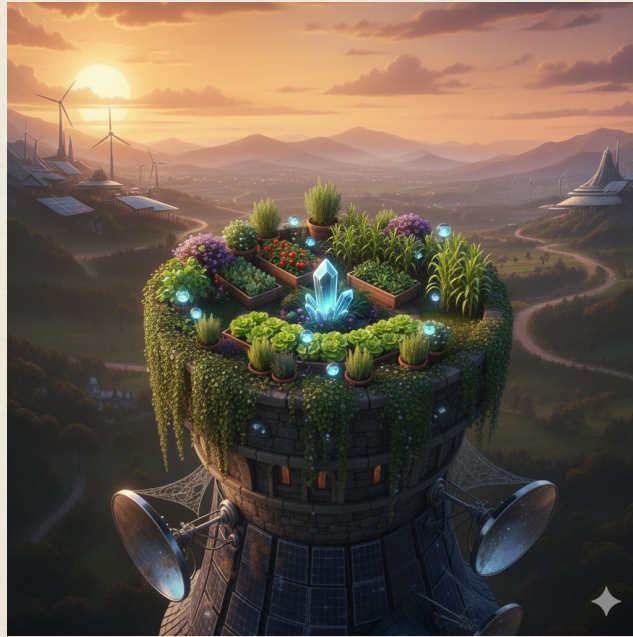

Rapunzel smiled. “Yes,
please! The panels won’t
charge.”

Flynn climbed up using a smart drone ladder. “Wow! You really live up here?”

Rapunzel laughed. “I even grow my own veggies on the solar deck!”

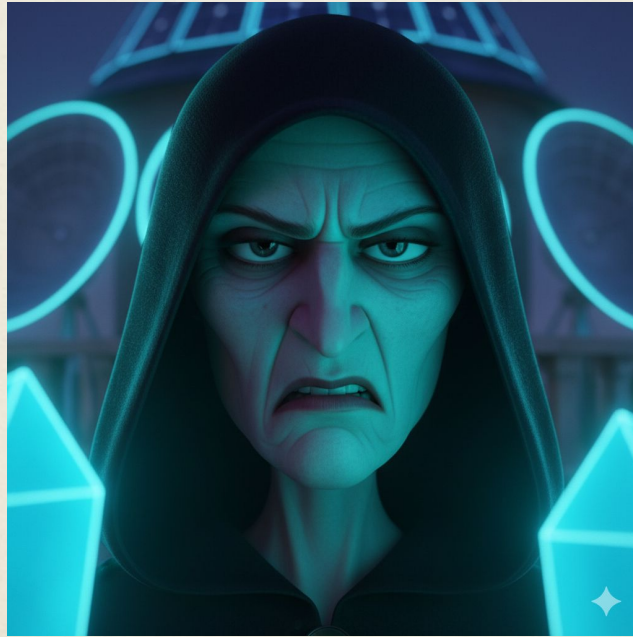

They cleaned the panels
together until they sparkled
again.

As soon as they finished, the power came back on! “It’s working!” Rapunzel cheered.

Mother Gothel stormed in.
“Who fixed this without me
knowing?”

Rapunzel said kindly, “We just wanted more light, not trouble.”

Gothel sighed. “I guess teamwork isn’t so bad... if it saves electricity.”

Flynn smiled. “Would you like to see the solar fair in town tomorrow?”

Rapunzel looked at Gothel
hopefully. “Can I go?
Please?”

Gothel nodded slowly. “Fine...
but be back before sunset!”

The next morning, Flynn
arrived on his solar scooter.
“Ready?”

Rapunzel slid down her long golden hair, which had fiber-optic strands glowing in the sun!

At the solar fair, kids were building model windmills and planting trees.

Rapunzel joined the contest
for “Best Green Idea.”

Her idea? “Solar lights for
villages with no power!”

She won first place! The crowd cheered, and Gothel even smiled from the audience.

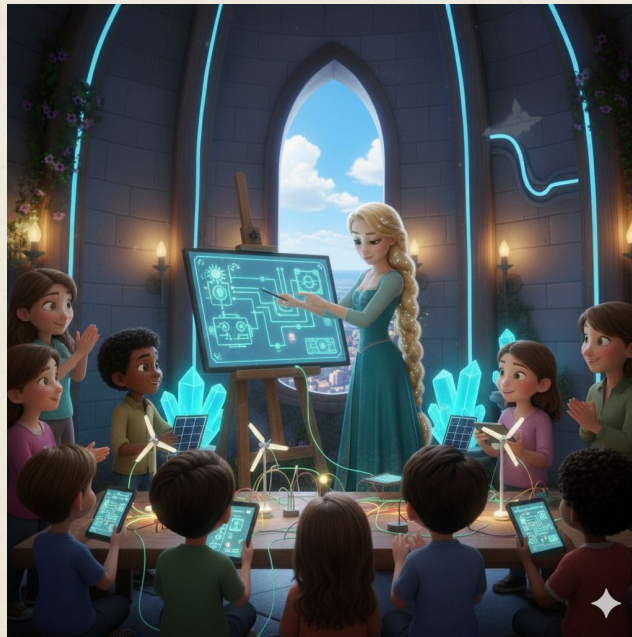

“Your project could help many families,” said the mayor.

Gothel whispered, "I'm proud
of you, my bright girl."

Rapunzel's tower became a solar school for kids to learn about energy!

Flynn helped her teach others
how to build clean gadgets.
