

Sunny the Solar-Powered Scooter!

Mia loved to ride her scooter everywhere – to the park, to school, even around the garden!

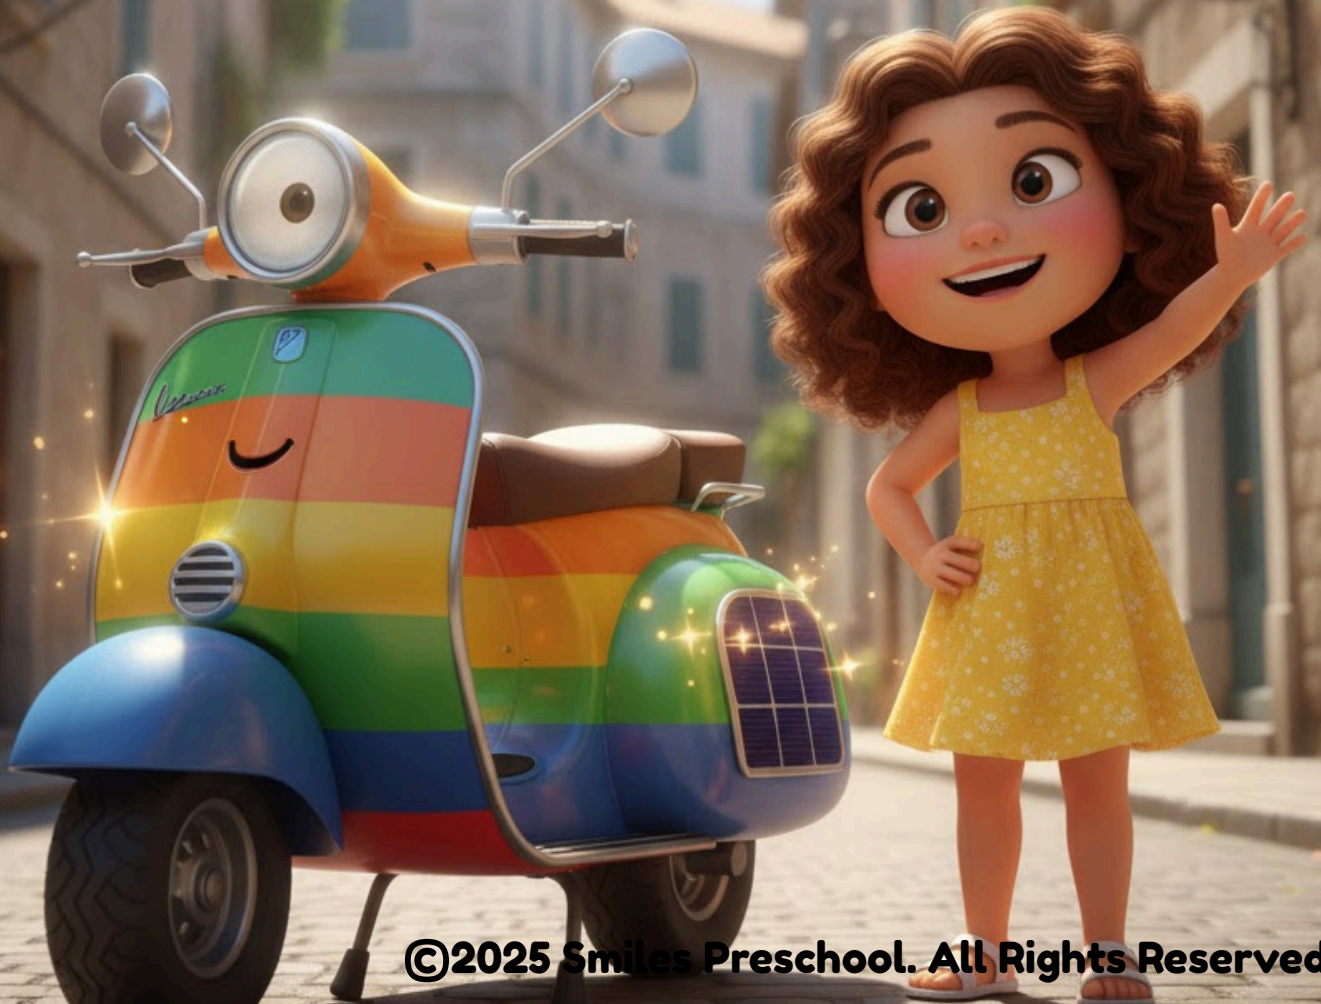

But her scooter wasn't just any scooter. It was Sunny the Solar Scooter!

Sunny's panels sparkle

Sunny ran on sunshine! "Wheee!
Let's go, Mia!" it beeped cheerfully.

Every morning, Sunny would charge up under the sun before their adventures began

**Hello!
I'm Mia!**

Hi, I'm Mia!

One day, the sky turned gray. The sun hid behind the clouds.

**“Let’s ride, Sunny!” said Mia, hopping on.
Sunny beeped sadly. “Beep... I’m low on
sunshine power!”**

“Oh no! You’re tired!” said Mia. “How can I help?”

Sunny replied softly, “I need sunlight to charge again.”

Mia looked up. "But it's all cloudy today!"

Mama called from the porch, “Why not find something else fun to do while you wait?”

**Mia thought for a moment.
“Okay! Let’s play indoors!”**

Mia

She built a racetrack for her toy cars, pretending they were scooters too.

Sunny watched from the window and beeped happily. “Vroom-vroom! Good job, Mia!”

The next morning, the sun peeked out again!

**“Yay! Sunshine’s back!” cheered Mia.
Sunny’s panels sparkled. “Charging up!”**

**Soon, Sunny's battery was full.
"Beep! Ready to roll!"**

**They zoomed down the street together,
laughing and singing.**

They stopped by the park and saw other kids on scooters, bikes, and skateboards.

Mia proudly said, "My scooter runs on sunshine! It helps the Earth!"

SUNNY

“Wow!” said one boy. “I want a scooter like that too!”

Sunny beeped proudly. “The more we use the sun, the cleaner our world becomes!”

That night, Mia patted Sunny gently. “Good job saving energy today.”

Sunny blinked softly. "Thank you, Mia. Let's shine again tomorrow."

**Mia whispered, "Goodnight,
Sunny the Solar Scooter."**

Mia

Sunny and Mia
waving!
