

BATTERSEA PARK CLINIC

Integrative Wellness for Serious Health Challenges

Energy Enhancement System · HBOT · Red Light Therapy · Targeted Supplements

Silver Package (100 hrs) & Gold Package (200 hrs)

Tonight's Agenda (20 Minutes)

01 The Challenge of Cancer & Conventional Care

05 Red Light Therapy – Cellular Rejuvenation

02 What is the Energy Enhancement System (EESystem)?

06 Targeted Supplements to Amplify Results

03 The Science: How EESystem Supports the Body

07 Silver & Gold Packages – Your Roadmap

04 Hyperbaric Oxygen Therapy (HBOT) & Cancer

08 Next Steps & Q&A

01 Cancer & the Case for Integrative Wellness

The Limits of Conventional Oncology — and What's Missing

The Problem

- Chemotherapy & radiotherapy are toxic to healthy cells as well as cancerous ones
- Treatment side-effects often reduce quality of life severely
- Immune suppression leaves patients vulnerable to secondary infections
- Chronic fatigue, pain and inflammation persist long after treatment ends
- Conventional medicine rarely addresses root-cause energetic or cellular dysfunction

The Integrative Solution

Cellular Recharge

EESystem scalar fields support the body's own energy production at a mitochondrial level

Oxygen Saturation

HBOT floods tissues with oxygen — cancers thrive in hypoxic environments

Photobiomodulation

Red light therapy reduces inflammation & supports cellular repair

Nutritional Synergy

Targeted supplements address deficiencies that impair immune function

02 The Energy Enhancement System

What Is the Energy Enhancement System?

24

UNIT CENTRE

London's leading
EESystem facility

15 reclining chairs
7 single beds
1 double bed

Alkaline water included
Detox salt bath facility

Scalar Wave Technology

- Generates bio-active scalar fields that interact with the body's own electromagnetic energy
- Used worldwide by wellness centres, doctors, therapists and veterans' groups
- Non-invasive — clients simply relax in comfortable chairs or beds
- Sessions typically 2 hours; overnight stays available
- Strict no-electronics environment for maximum immersion
- Complementary alkaline water (pH 9.5) provided at every session

Reported Wellbeing Support Areas:

Fatigue · Inflammation · Pain · Depression · Immune Function · Detoxification · Tumour Support · Nerve Pain

How EESystem Supports Cancer Patients

Mitochondrial ATP Production

Scalar fields are reported to stimulate mitochondrial activity, increasing cellular energy (ATP) — essential for repair, detox and immune activation.

Cellular Voltage Restoration

Healthy cells hold ~70–90 mV membrane potential. Diseased cells drop to ~20–25 mV. EESystem exposure may help restore normal voltage gradients.

Detoxification Support

Enhanced cellular energy supports the liver and lymphatic system in clearing toxins, including chemotherapy metabolites.

Reduced Inflammation

Scalar environments have been associated with reduced inflammatory markers — a key driver in cancer progression and treatment side-effects.

Pain & Nerve Support

Multiple client testimonials report significant reductions in pain, including chemotherapy-induced peripheral neuropathy.

Psychological & Emotional Balance

Deeply meditative sessions support mental clarity, reduce anxiety, and restore a sense of hope and empowerment.

03

Hyperbaric Oxygen Therapy (HBOT)

HBOT — The Oxygen Advantage in Cancer Support

KEY FACTS

Pressure

Sessions delivered at elevated atmospheric pressure, saturating tissue with oxygen

Mechanism

Cancer cells are anaerobic — oxygen-rich environments are hostile to tumour growth

Synergy

HBOT after chemo/radio helps repair healthy tissue damaged by treatment

Immunity

Stimulates white blood cell activity and enhances immune surveillance

Wound Healing

Accelerates healing of radiation wounds and post-surgical recovery

Warburg Effect & Oxygen

Cancer cells preferentially use glycolysis (fermentation) for energy even in the presence of oxygen — a phenomenon known as the Warburg Effect. HBOT creates a high-oxygen microenvironment that disrupts this metabolic pathway, potentially impairing tumour energy production while simultaneously supporting healthy tissue repair.

Reported Benefits in Oncology Settings:

Reduces tumour hypoxia

Sensitises cells to radiotherapy

Reduces chemo-related fatigue

Supports neurological recovery

Anti-inflammatory effects

Stem cell mobilisation

04 Red Light Therapy

Red Light Therapy — Photobiomodulation for Cellular Health

What It Does

Near-infrared and red wavelengths penetrate tissue and are absorbed by mitochondrial chromophores, stimulating cellular energy production.

Pain Relief

Proven to reduce chemotherapy-induced mucositis, joint pain and peripheral neuropathy through anti-inflammatory pathways.

Skin & Wound Healing

Particularly valuable for patients with radiation burns, surgical scars or compromised skin integrity.

Immune Modulation

Studies show modulation of cytokine release and enhancement of natural killer (NK) cell activity.

Fatigue Reduction

Improves mitochondrial efficiency, directly addressing the profound fatigue associated with cancer and its treatment.

Brain & Mood

Red Light Therapy Helmet delivers photons to cranial tissue, supporting cognitive function affected by 'chemo brain'.

Lymphatic Support

Stimulates lymphatic flow and reduces oedema — common in post-surgical and post-radiation patients.

At BPC

Full-body panels, targeted devices and our specialist Red Light Therapy Helmet — all included in packages.

05 Targeted Supplements

Supplements — Amplifying the Healing Environment

Our AYA Biome range of fermented botanical supplements provides bioavailable postbiotic compounds that work synergistically with clinic therapies.

Fermented Turmeric (PURE)

Bioavailable curcuminoids with potent anti-inflammatory and anti-tumour properties. Supports NF-κB pathway suppression and reduces inflammatory cytokines.

Gut Restore

Addresses gut microbiome damage from chemotherapy and antibiotics. 70% of immune function originates in the gut — restoration is critical.

Antioxidant Blend

High-potency antioxidants neutralise free radicals generated by both cancer metabolism and treatment-induced oxidative stress.

Immune Support Formula

Adaptogenic botanicals and immune modulators that enhance NK cell activity without contraindication with standard oncology protocols.

Liver Detox Support

Supports phase I and II detoxification pathways, essential for clearing chemotherapy metabolites and reducing toxic burden.

Menopause & Prostate

Particularly relevant for hormone-sensitive cancers. Fermented botanicals support healthy oestrogen metabolism and detoxification.

Aloe Vera Juice 1L
£19.99

06 Silver & Gold Packages

Your Integrative Wellness Programme — Silver & Gold

Intensive programmes designed for clients managing serious health challenges, including cancer.

SILVER PACKAGE

100 HOURS

Contact Us for Pricing

- ✓ 100 hours of EESystem sessions
- ✓ Access to HBOT sessions (schedule permitting)
- ✓ Red Light Therapy sessions included
- ✓ AYA Biome supplement protocol
- ✓ Detox salt bath access
- ✓ Alkaline water at every session
- ✓ Personalised session scheduling

GOLD PACKAGE

200 HOURS

Contact Us for Pricing

- ✓ 200 hours of EESystem sessions
- ✓ Priority HBOT scheduling
- ✓ Unlimited Red Light Therapy access
- ✓ Full AYA Biome supplement protocol
- ✓ Detox salt bath access
- ✓ Alkaline water at every session
- ✓ Priority & personalised scheduling
- ✓ Dedicated case management support

07 Why Battersea Park Clinic?

A Truly Integrated Approach — Under One Roof

London's Largest EESystem Centre

24-unit facility in Battersea — the most comprehensive EESystem centre in the UK, with 15 chairs and 9 overnight bed spaces.

Hyperbaric Oxygen on Site

HBOT sessions bookable alongside EE sessions — no need to travel between multiple clinics for your integrated programme.

Full Light Therapy Suite

Red Light, Infrared Sauna, SaunaSpace and Blue Light UVB — targeting inflammation, pain, skin and neurology simultaneously.

Fermented Botanical Supplements

Clinically developed AYA Biome range using proprietary fermentation — superior bioavailability compared to standard extracts.

Evidence-Informed Protocols

Our supplement range has generated clinical data showing 22% reduction in inflammatory markers and significant liver enzyme improvements.

Personalised & Supportive

We work around your treatment schedule. Staff are trained to support clients with serious health challenges with compassion and expertise.

What Our Clients Say

"After my second round of chemo I was exhausted. Six weeks at Battersea Park Clinic transformed my energy levels completely. The EE sessions gave me my life back."

— Client with breast cancer

"The combination of HBOT and EESystem sessions alongside my oncologist's protocol helped me recover far faster than expected. Remarkable facility."

— Client with colorectal cancer

"I was sceptical at first, but the infrared sauna and red light therapy genuinely reduced the nerve pain in my feet from chemotherapy. I come twice a week now."

— Client with lymphoma

Important Information & Wellness Disclaimer

All services offered at Battersea Park Clinic are provided for general wellbeing, relaxation, and personal development purposes only. They are not medical treatments, are not intended to diagnose, treat, cure, or prevent any disease, and should not be considered a substitute for medical advice, diagnosis, or treatment from a qualified healthcare professional.

Clients with cancer or other serious medical conditions should always consult their oncologist or GP before beginning any complementary wellness programme. Our integrative approach is designed to work alongside, not instead of, conventional medical treatment.

The information presented in this document reflects client-reported experiences and general wellness literature. Individual results will vary. Battersea Park Clinic makes no specific therapeutic claims regarding the treatment of cancer or any other medical condition.

Ready to Begin Your Healing Journey?

1

Book a free consultation call with Alastair

2

Visit the clinic for a complimentary 2 hour EES orientation session

3

Choose your Silver or Gold package and begin your programme

4

We'll work with your oncology team to align scheduling
