

## FOUNDATION SYSTEM. EXECUTIVE EDITION

### ACCESS YOUR FILES

Before you click anything, read this page in full. It will save you time.

Your Foundation System requires an active Systeme.io account. If you do not yet have one, or if you are currently on the free plan and want to unlock the full functionality this template is built for, go to the next page before clicking any of the access links below. It takes two minutes and ensures everything imports correctly first time.

If you are already on the free plan and staying on it for now, check the following before proceeding. The free plan allows one blog, three funnels, and a limited number of automation rules. If you have already reached any of these limits, the templates will not import successfully. You will need to either remove existing assets to free up space, or upgrade your plan before clicking your access links.

Not sure which plan is right for you? The next page covers your options including the exclusive migration offer available to Alter Edit customers purchasing an annual plan.

Once your account is confirmed and ready, your access links are below. Your full going live checklist, useful links, Canva template guidance, and terms of use can all be found on page 3.

## BEFORE IMPORTING YOUR TEMPLATES SET UP YOUR SYSTEME ACCOUNT

Your Foundation System is built entirely on Systeme.io, the one platform that replaces your website builder, email marketing, sales funnels, course hosting, and digital product delivery. Without it, your templates cannot go live.

While there is a free plan available to explore the platform, to properly automate your business and access the full marketing functionality including email sequences, automation workflows, and advanced funnels, you will need a paid plan. The Annual Startup plan at \$14 per month is where most of our customers start.

- Two months free on any annual plan, save up to \$194
- White-glove migration, Systeme's team will transfer your existing content at no cost (worth \$1,997)
