

Fluxnar

AI Image Pack Generator

Generate dozens of AI images in one click.

V1.0

OVERVIEW

Fluxnar is a powerful Windows application that helps you generate multiple AI images from a list of prompts. Save time, stay organized, and boost your creativity.

QUICK START

1

Add Prompts

Paste your prompts or import them from a .txt file.

2

Configure

Choose your AI provider, model, style, image size and variations.

3

Set Output

Choose your output folder and project name.

4

API Key

Enter your API key and connect.

5

Generate

Click "Create Image Pack" and let Fluxnar do the work.

6

Done!

Your images are ready in an organized folder, with all the files.

FEATURES

- ✓ OpenRouter & OpenAI support
- ✓ Import prompts from .txt files
- ✓ Smart prompt detection
- ✓ Batch image generation
- ✓ Multiple image sizes (9:16, 16:9, 1:1)
- ✓ Variations (x1, x2, x4, x8)
- ✓ Automatic project folders
- ✓ Numbered images
- ✓ prompts.txt for easy reuse
- ✓ metadata.json with generation details
- ✓ Clean and modern interface

OUTPUT

Each generation creates a new pack in your chosen folder.

Inside each pack folder:

image_001.png, image_002.png...
Your generated images (numbered)

prompts.txt
All prompts used for this generation

metadata.json
Generation details and settings

EXAMPLE OUTPUT

Output Folder > Project > Pack_2026-07-20_10-02-21

image_001.png

image_002.png

image_003.png

prompts.txt

metadata.json

TIPS

You can separate prompts with one blank line.

Example in a .txt file:

```
A beautiful mountain landscape, sunset, ultra realistic
A futuristic city at night, cyberpunk, neon lights

A cozy wooden cabin in the forest, morning light, cinematic

A waterfall in a tropical jungle, photorealistic, 8k
```

Each prompt will be treated as a separate image.
