

How Burnt Out TikTok Shop Affiliates Are Making WAY MORE \$\$ **“The New Way”** By Using A Brand New Ai Affiliate System (That You’ve Probably Seen before) That Works Completely Faceless + Actually Gives You Control Of Your Own Audience

Yo Bro. It’s Espindeezy. And if you're a young dude that’s been grinding TikTok Shop Affiliate for a while - I'm super excited that you’re here now reading this - because this is going to hit close to home.

If you're reading this, you've probably already made money with TikTok Shop. You've mastered organic content, got millions of views, put in the reps, and made your first dollar online (plus maybe a hundred thousand more.)

But as you’ve probably seen, there are some SUPER ANNOYING problems most likely getting in your way. Such as...

- 1) Continual random violations dished out by an AI moderator that nuke your account - forcing you to restart from ZERO
- 2) Video styles that used to print... now getting drowned out by BOF slop creators hogging GMV MAX
- 3) Competing with 40 year old stay at home moms that have nothing better to than post all day and relate 10x more to customers
- 4) Getting straight up burnt out from being a dancing monkey on camera because your goal was never to be an influencer, it was always just to make an easy bag

If any of these sounds familiar, you're not alone. They suck, but what i'm about to share with you removes basically all of them.

And by the way - i'm not saying TikTok Shop is dead... There are new winners every single day and the top 1% are STILL, RIGHT NOW hitting record months.

But the platform **IS** getting harder. And the people still grinding the same way they did 18 months ago are starting to feel it.

So here's what almost nobody in the TikTok Shop space knows is happening rn...(and this is why we're winning while they are getting dominated by burnout)

While regular affiliates are fighting thousands of creators for GMV MAX spend, some of your peers (us) have already moved on & are hitting record months without even showing our faces

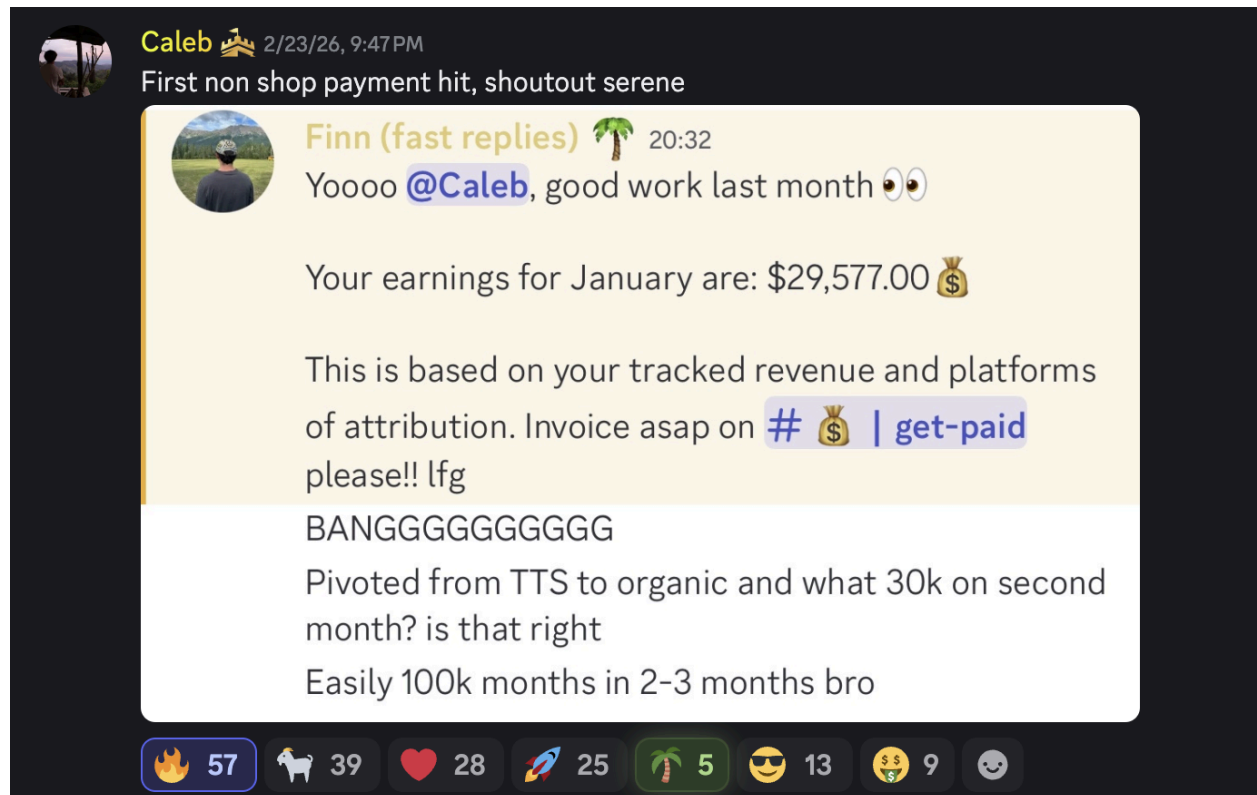

Inside Creators Corner, there's a group of former top TikTok shop affiliates who quietly switched to something totally different, and now they are leading the entire industry without anyone even knowing who they are.

It's not a new business model. It's Not trading, not dropshipping, not something non-affiliate related.. It's the exact same playbook, just in another, brand new format. And it's CRUSHING ridiculously hard right now.

The format? AI Avatar Pages. Running On Meta platforms like FB, IG, and Threads (more people use threads than you'd expect lol)

And some of these are people you'd recognize. TikTok Shop Killers who crushed 30k months for over a year straight.

Guys like Caleb who finally pivoted and in month two, were already back to hitting **30k months**.

And other guys in Creators Corner that never had ANY success on TikTok Shop cause they were bad at filming, not from the USA, or even just chopped, are hitting **100K MONTHS**

 **Leo** 🏆 2/23/26, 10:00 PM
"Send him 2-3 months organic and forget"

 **Finn (fast replies)** 🌴 6:21 PM
Yoooo [@Leo](#), good work last month 🙄

Your earnings for January are: \$98,208.77 💰

This is based on your tracked revenue and platforms of attribution. Invoice asap on [# 💰 | get-paid](#) please!! lfg

🙄 86 🐏 76 ❤️ 60 🔥 56 🏆 16 🌴 15 🚀 33 🏛️ 31 🏆 29
👽 19 💰 17 100 14 🧑 14 🧑 12 😊

Yoooo [@Ollie](#), good work last month 🙄

Your earnings for January are: \$92,237.79 💰

This is based on your tracked revenue and platforms of attribution. Invoice asap on [# 💰 | get-paid](#) please!! lfg (edited)

❤️ 1 😊

Completely faceless. No Filming, No Violations. Not even making the videos themselves cause they outsourced to \$4/hr Filipino VAs.

Now - Here's Why This Model Is Lowkinuinely Cracked ASF

AI content on TikTok Shop converts well, but violations will torch your account the moment you start winning.

AI content on Meta thooooo? It has every infinity stone needed for you to print.

Here are the advantages:

1) You Can Sell To More Customers (more \$\$) - Meta has over 1 billion more users than tiktok, most of which trend older, meaning they have more disposable income to spend AND are more likely to buy from AI.

2) You get Way More Exposure (Easier views for effort you're already putting in)- TikTok Shop Videos are limited to one platform and cant be repurposed. This model allows you to catch the algorithm on all platforms.

3) You Actually Own Your Audience (more control) - Unlike TikTok, when you grow a page on FB or IG you are actually **guaranteed** views on ur vids. Spend one or two months growing your account and you're practically guaranteed 10k commission months. These pages are literally digital real estate.

EXAMPLE:

This is a IG page someone in CC grew to 2.5 million followers relatively fast, notice how every vid is **printing** views?

4) You Get Unlimited Avatars And Unfair Advantages (infinite potential) - You're not one person limited to one niche. Reach every demographic by creating avatars that speak to the audience you're selling to.

5) There's Fewer Headaches (less annoying stuff)- No violations for saying the wrong word. No account bans. No waking up to find your top video removed. Just create a brand new account with zero followers and start posting.

6) You Can Even Scale Without Showing Up (can actually automate stuff and work less while still printing) - Learn the systems, document it,

then hire a VA to manage it and step completely out of the content creation process. That's a business, not a high leverage freelance job

But Here's The Thing: With This "New Way"... Finding The Right Brands Is An Issue For 99% Of Creators. And That's What We've Solved For You At Creator's Corner.

Now - all of the information on **HOW** to make these avatars can be found for free on YT - but it's the "actually getting the green light from the brands that will pay you" part that's hard.

Creators need a **direct connection** to the brands they're promoting for proper sales tracking and higher custom payouts with this new way of doing things. Plus, brands don't want just any random affiliate using AI and making illegal claims about their products trying to make a quick buck. They actually have risks to having people run their stuff, so they obviously need to make sure these affiliates are **credited and vetted by the right people. If you try to do this on your own, you will probably spend months finding & trying to get approved by brands from the outside in. And if you COULD be making even just \$10,000 per month.... Then that 2 month wait period just costed you \$20,000.**

So what do the smart affiliates do?

The smart affiliates partner with already existing networks of brands - and just use their THEIR brands, THEIR systems, and THEIR strategies to put their printing on autopilot, allowing them to step around all the annoying BS that comes with finding brands that actually pay well + will actually pay you.

All of the screenshots i've shown you are people running campaigns **exclusive to Creator's Corner specifically.** The brands, the frameworks,

the conversion strategies, the systems, they exist inside CC and nowhere else.

That's actually why none of the TikTok Shop guru's you're used to seeing are talking about this. It's happening in a closed room, and those that get in are winning. Everyone else is spending a TON of unnecessary time bumbling around, looking for deals, trying to get approved. Wasting precious time when they could be spending that time learning & getting paid.

Now.. you have 2 options:

Option 1 - You take the info i've just shared with you and either do nothing, or do it all yourself. You spend months figuring out how to create ai pages... learning the software... finding the products that work... going through different brands that offer the product and negotiation with them... going through their approval process... getting vetted... dealing with payout or tracking issues if you choose the wrong one... it never ends. And the game is now totally different because the money has shifted away from Tiktok only and towards meta / other platforms. It's a whole new landscape.

Option 2 - You book a call with us down below at creator's corner and we immediately put you on game (as well as bring you into a community who is positive, ambitious, and doing all of the exact same stuff you're doing)..., speeding up your time-to-first-dollar tremendously. We show you how to set up your pages... how to make the content... and not only that, but we already have the brands pre-vetted & ready-to-go FOR YOU with custom tracking & custom-negotiated payouts. Meaning, CC members get extra high commissions, because the brands know that if they come from us, they are legit. Here's a picture of us posted up in Aspen.

Here's the thing bro. You've already put in the reps. You already know how to sell. You already understand what content goes viral. The learning curve for you to make this work is virtually nothing compared to someone starting from zero.

You just need to redirect your skills into a better vehicle, and give yourself more control over the entire process.

So If you see the vision & are ready to jump into this new wave of printing as an affiliate... CC is for you. Book a Call Below.

If you think you might be ready to join a community of printers & get fast-pass access to the best & highest-paying brands, go ahead & [Book a call with me](#) at that link.

No pressure. Just a real convo. We'll talk about your goals and whether this makes sense for you.

But I still say - more and more brands are approaching us every single day with AMAZING offers and super high commissions & are practically begging us to run these campaigns for them. And we keep having to tell them "we got you, we just need to make sure we get the right people so we can give them the best opportunity"

They're waiting for you. And so are your paydays.

[Talk Soon.](#)
