Hi [NAME],

One of the best things about being an info product seller is the fact you can automate your business, so while you're enjoying the festivities your business can still be making you money.

There's no better feeling than earning while you're having fun with family and friends.

Subject: Instantly turn any blog post into a profitable video sales letter

Body:

Hi,

How are you adding video to your blog posts?

I mean, you are using video on your blog right - if not you're missing out on some serious cash!

Most people just embed a YouTube video and

call it a day.

But did you know that's a recipe for bleeding traffic and profit faster than you can say "related videos".

YouTube makes their money by serving ads and by keeping people on YouTube.

That's why your embedded videos will be full of ads and links that will take them away from you and on to your competition.

So how do you fix that?

Previously it was hard and very expensive to host your videos elsewhere.

But now there is a magic solution... WP Magic Video - that allows you to easily add Amazon S3 and Cloudfront hosted videos to any blogs.

=> [Link Here](#)

This way you can unlock the full power of video, with none of the drawbacks. It's 1-click easy and dirt cheap too.

And here's the coolest thing...

This nifty tool allows you to put time delayed

buttons, links and more beneath the videos on your blog.

You can now add any video - even someone else's YouTube video to your blog and turn your post into an instant video sales letter!

Right now you can get access to WP Magic Video at a special early bird price.

=> [Link Here](#)

Go check it out now - the price will start going up fast, very soon.

This is one tool any blogger should have and you want to grab it while it's still cheap.
