

Notes for Parents

This workbook covers a full year of Grade 1 math. Here is how to get the most out of it.

- Keep it light. Short, happy sessions beat long, tired ones.
- Praise effort, not just right answers. Try saying, you worked so hard on that.
- Let your child count on fingers or use real objects. That is real math.
- Mistakes are good. They show the brain is learning.
- Answer keys sit at the back of each unit.
- Every page comes in color and in a printer friendly black and white version.
- Go in any order. Follow what your child is curious about.

You are your child's first and best teacher. Have fun together.
