Alexa + Notion task management by voice

Voice Planner License Activation Info

This free kit does not activate Voice Planner. License activation happens inside the official Voice Planner dashboard during guided setup.

What this free kit is

This free Starter Kit helps you preview Voice Planner before activation. It includes command examples, setup requirements, and a clear explanation of how license activation works.

The Starter Kit is free. The Voice Planner license is purchased later inside the official guided setup.

Launch offer

| Offer | Details |
|-------------------------|---|
| Launch lifetime license | \$29 during the launch offer. |
| Regular price | \$59. |
| Payment location | Inside the official Voice Planner dashboard during setup. |
| Subscription | No monthly subscription for the launch lifetime license. |
| Automation chains | No Zapier chains required for the core Voice Planner setup. |

What the license unlocks

- Alexa Skill access for Voice Planner.
- Connection between Alexa and your Notion task workflow.
- Reading and querying open tasks by voice.
- Creating one new task at a time by voice.
- Completing tasks by setting them to DONE.
- Deleting tasks you no longer need.

Where the license is activated

The license is activated during the official guided setup, not on Gumroad. The expected flow is:

- Create or access your Voice Planner account.
- Connect Notion.
- Purchase the Voice Planner license inside the dashboard.
- Link Alexa.
- Say: Alexa, open Voice Planner.

Why this matters

This keeps the setup clear. Gumroad gives you the free Starter Kit. The official Voice Planner dashboard handles account connection, Notion connection, license purchase, Alexa linking, and activation.

Important limitations

- Voice Planner is not a GPT tool or AI agent.
- Voice Planner does not replace Notion.
- Voice Planner does not make automatic payments or manage banking.
- Voice Planner does not create multiple tasks with one command.
- Voice Planner does not manage long notes or full Notion database editing by voice.

Simple reminder

Keep Notion as your organized backend. Use Alexa as your fast voice interface.

Important: this free kit does not activate Voice Planner. To use the Alexa Skill with Notion, complete the official guided setup and activate a valid Voice Planner license inside the Voice Planner dashboard.
