

HER FREEDOM ABROAD • SEEN & HIRED

The Work Abroad Job Board Vault

Your map of where to actually look, organized by path and by region.

Read this first: you need your own copy

The vault opens in view-only mode, which means you can read it but not type in it. That is on purpose, so every single person gets a clean, untouched version.

To make it yours, you save your own copy to your Google Drive. It takes about ten seconds, and the steps are right below. Once you do, it is yours to edit forever, add notes, highlight the boards you like, and track where you have applied.

How to save your own copy

1. **Open the vault.** Click the button below. It will open in Google Sheets in your browser.
2. **Sign in to Google.** If you are not already signed in, sign in to your Google account. You need to be signed in to save a copy.
3. **Click File, then Make a copy.** Look at the top left of the screen, in the menu bar just under the file name. Click File, and then choose Make a copy from the list.
4. **Choose where to save it.** A small window will pop up. Give it a name, pick a folder in your Google Drive, and click Make a copy.
5. **That copy is yours.** It opens in a new tab, and now you can type in it. Edit it, add your own notes, star the boards you like, and keep track of where you have applied.

No Google account? No problem.

You can download the whole thing as a spreadsheet instead. Open the vault, click File, then Download, then Microsoft Excel (.xlsx).

It will save to your computer and open in Excel or Numbers (iOS), with all the links still working.
