The Scattered Preparation Trap

The goal is not to study everything. The goal is to prepare the right things in a connected order.

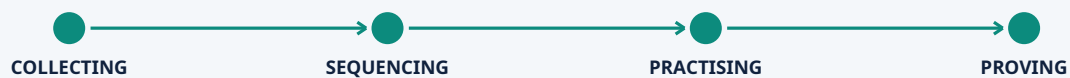

SCATTERED PREPARATION

- Five subjects at once
- A new roadmap every week
- Reading but never speaking
- Applying without tracking
- Resume, LinkedIn and projects disconnected

JOB-READY PREPARATION

- One target role
- One priority sequence
- Interview-ready explanations
- Visible proof through projects
- Applications tracked with next actions

THE SHIFT

DIAGNOSE

Your Job-Readiness Scorecard

Rate each area from 1 (not ready) to 5 (confident and practised).

READINESS AREA	SCORE	NEXT ACTION
Target-role clarity	1 2 3 4 5	Choose one target role.
Technical fundamentals	1 2 3 4 5	List three weak concepts.
Project explanation	1 2 3 4 5	Prepare a 60-second overview.
Resume quality	1 2 3 4 5	Remove unsupported claims.
LinkedIn profile	1 2 3 4 5	Align headline and projects.
HR answers	1 2 3 4 5	Speak five answers.
Mock practice	1 2 3 4 5	Record one session.
Application consistency	1 2 3 4 5	Track every next action.

INTERPRET YOUR SCORE

1-2: begin immediately. 3: you understand the area but need practice. 4-5: maintain it while focusing on weaker sections.

FRAMEWORK

Prepare Present Practice Apply

One connected system for turning study effort into recruiter-ready evidence.

The system is cyclical: applications reveal gaps, practice improves presentation, and evidence strengthens future applications.

DAYS 1-10

Foundation and Direction

Complete the actions in order and adapt them to your target role.

1

Choose one primary target role.

2

Audit current skills against ten job descriptions.

3

Create a priority list: core language, SQL/DBMS, project and HR.

4

Prepare a sixty-second introduction.

5

Revise OOP foundations.

6

Study Java or your main language.

7

Practise core SQL queries.

8

Audit resume evidence and remove unsupported skills.

9

Rewrite LinkedIn headline and About section.

10

Prepare one project overview.

10/30 DAYS MAPPED

DAYS 11-20

Technical and Interview Depth

Complete the actions in order and adapt them to your target role.

11

Revise DBMS concepts and transactions.

☐

12

Practise joins, grouping and subqueries.

☐

13

Review APIs, HTTP methods and authentication.

☐

14

Revise React fundamentals for web roles.

☐

15

Review backend request flow and validation.

☐

16

Revise AI/ML basics when relevant to target roles.

☐

17

Prepare project architecture and contribution.

☐

18

Write five HR answers with evidence.

☐

19

Prepare strengths, weakness and company-fit answers.

☐

20

Record a fifteen-minute mock interview.

☐

20/30 DAYS MAPPED

DAYS 21-30

Execution and Applications

Complete the actions in order and adapt them to your target role.

21

Rewrite weak technical answers.

22

Prepare project-specific follow-ups.

23

Finalise role-specific resume versions.

24

Complete LinkedIn proof and Featured section.

25

Prepare recruiter messages and follow-ups.

26

Apply to relevant roles and record each next action.

27

Conduct a full mock interview.

28

Analyse repeated gaps.

29

Revise the highest-priority topics.

30

Build the next thirty-day plan from real results.

30/30 DAYS MAPPED
