Project 4 source data (3_Build_Source_Data)

These files are a compact copy of estimate fields already described in the Assess packet. They exist so the Issue_Estimates tab in the Master Workbook can show numbers without retyping.

They are **not** a hidden ranking. They do **not** tell you which two initiatives to fund.

File	Contents
review_metadata.json	Freeze and milestone dates
issue_estimates.csv	Engineering point estimates and confidence labels from the packet

Read the Assess evidence (1_Assess_Evidence) first. CSV rows omit narrative caveats on purpose. The packet is the source of judgment.

Do not add a Python script that selects a portfolio from this folder.
