The 5 Best Free AI Tools for Teachers

Presented by
Teacher Iris

You are about to get your time back

Teachers often spend up to **12 hours a week** on lesson planning. Discover how AI tools can streamline these tasks, allowing you to focus on impactful teaching instead.

ChatGPT

ChatGPT is your **ultimate lesson planning assistant**. It generates comprehensive lesson plans and activities, saving you valuable time and ensuring you meet your educational goals effectively.

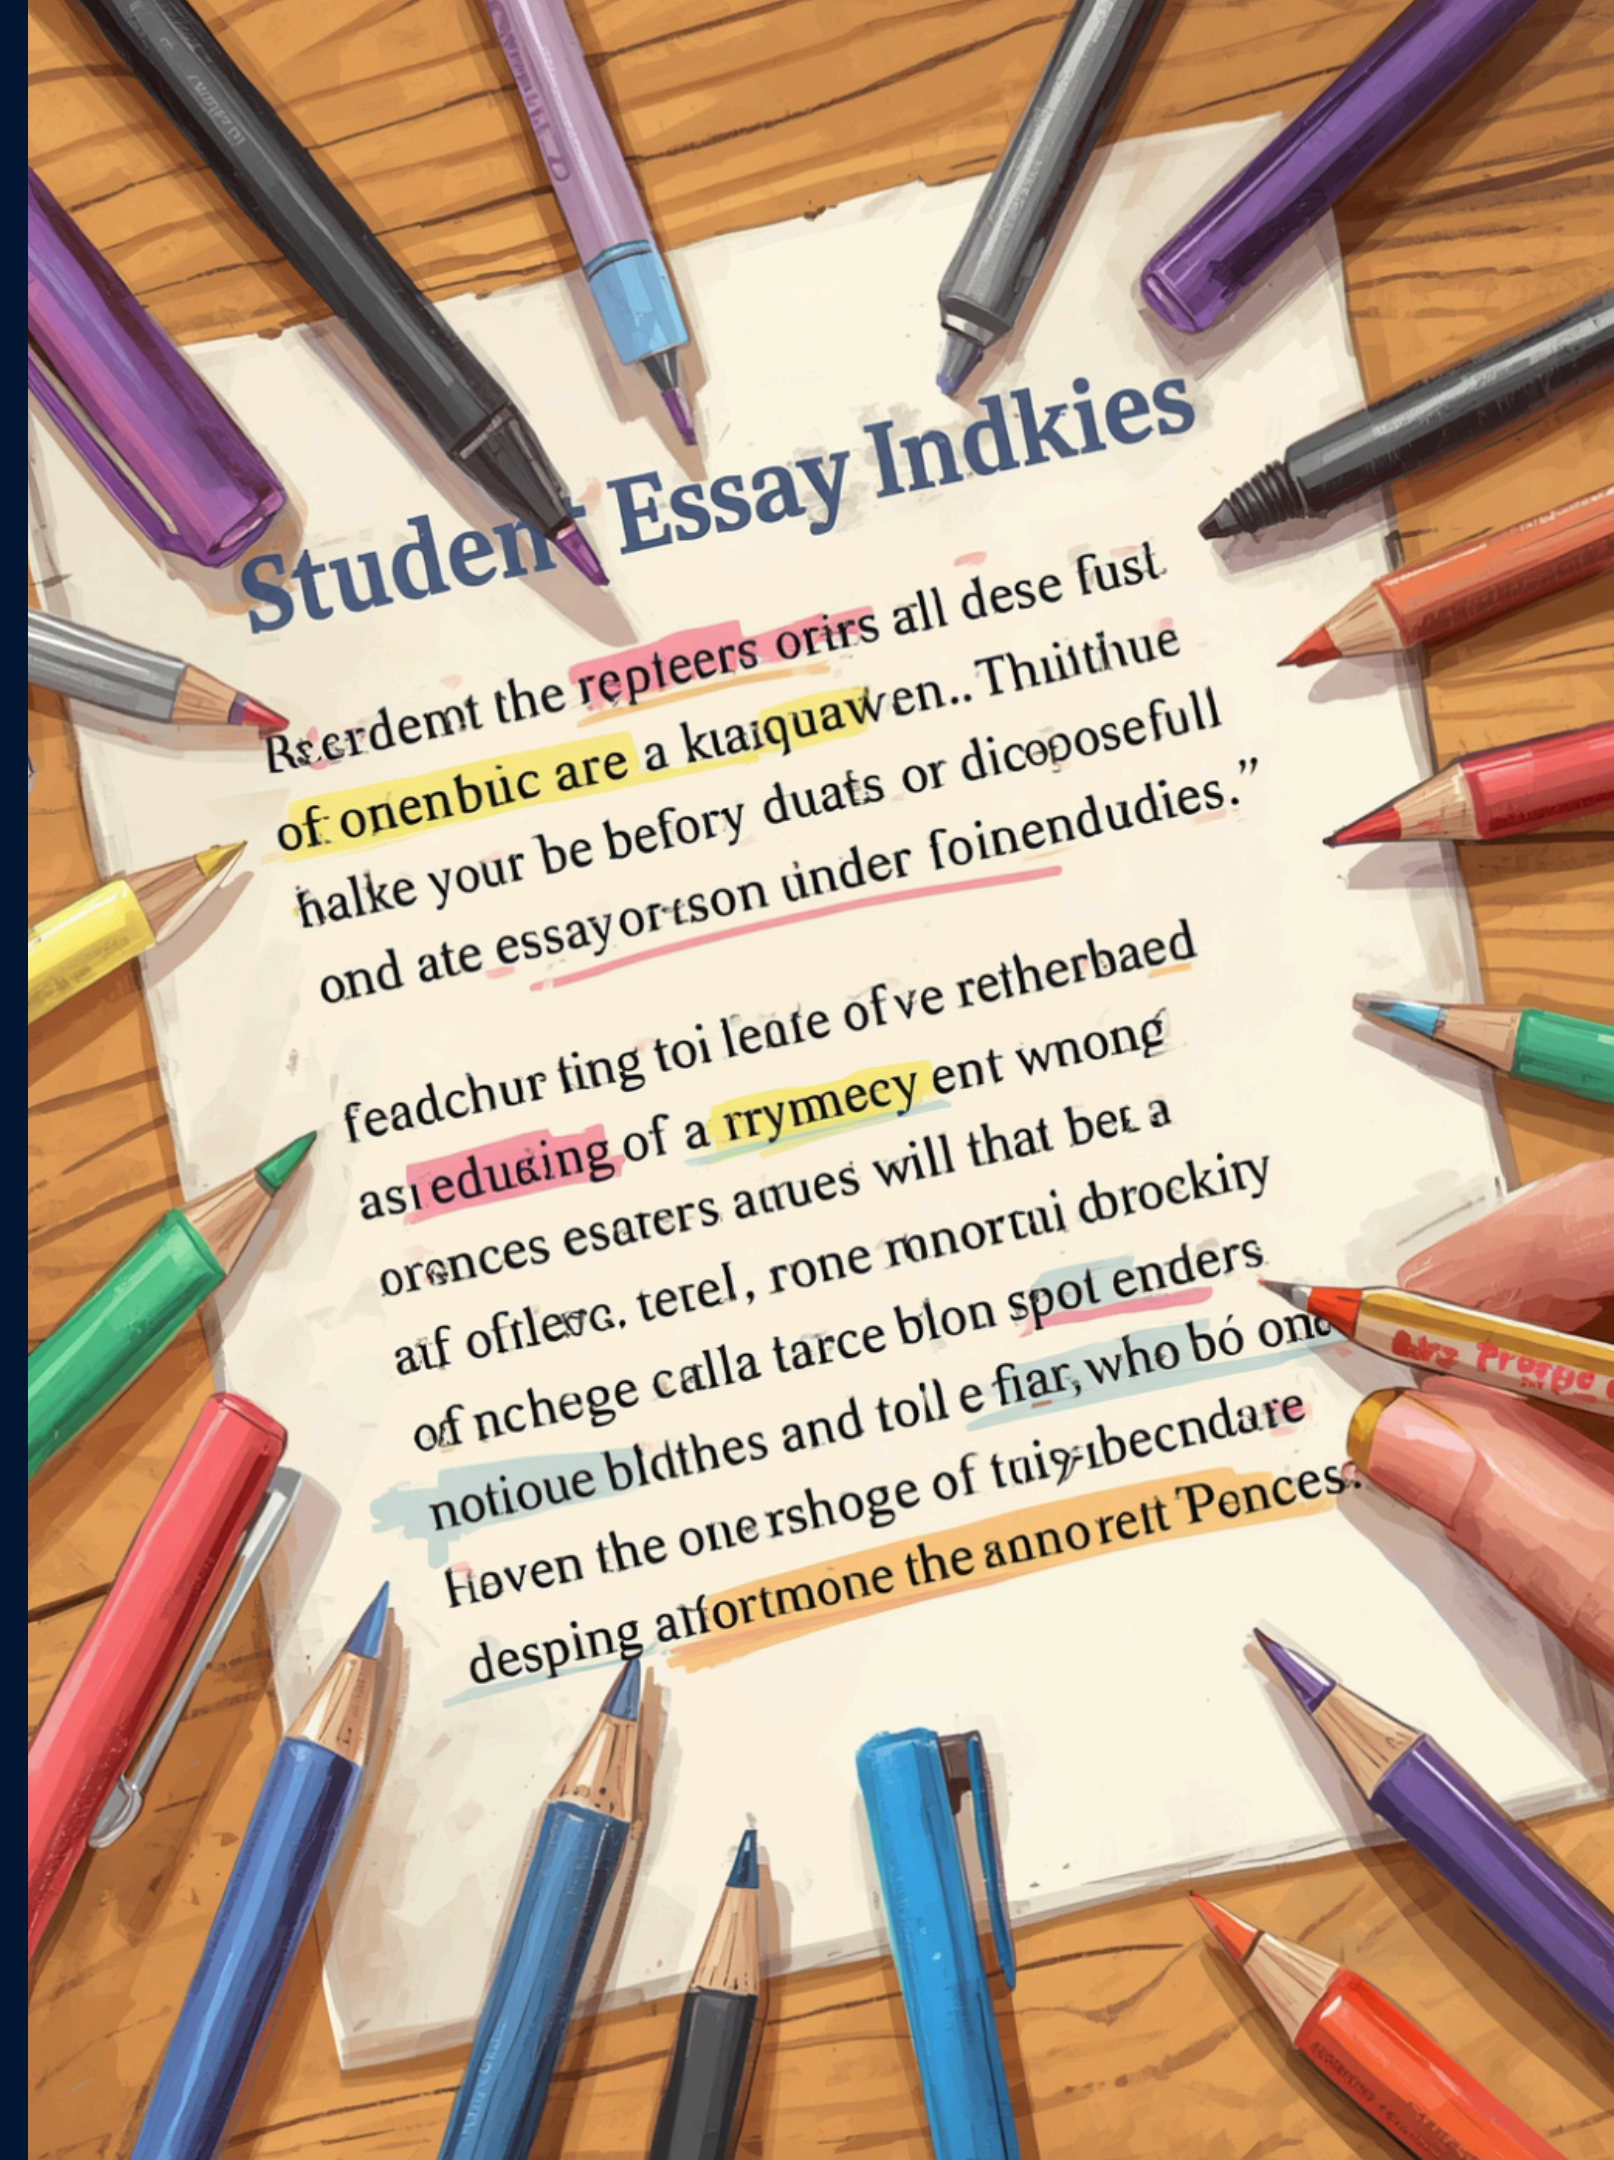

Try this: Ask ChatGPT "Create a 45-minute lesson plan on [topic] for [grade level], including a warm-up, main activity, and exit ticket."

MagicSchool.ai

MagicSchool.ai is a powerful tool designed to streamline your grading process. It provides automated feedback on student writing, **saving you hours** while ensuring personalized assessment for every student.

Try this: **Upload a student essay and let MagicSchool.ai generate personalized feedback in seconds** — perfect for quick formative assessment.

Diffit

Diffit allows teachers to effortlessly adjust any text for varying reading levels, **making lessons more accessible and engaging** for all students, thus promoting inclusive learning environments.

Try this: **Paste any article or text and instantly get 3–5 leveled versions to match every reader in your classroom.**

Canva AI

Canva AI allows teachers to create **stunning visuals** effortlessly. Generate presentations, worksheets, and posters with just a few clicks, enhancing classroom engagement and creativity in minutes.

Try this: Type "Magic Design" in Canva, describe your topic, and get a ready-made worksheet or poster template instantly.

Curipod

Curipod revolutionizes teaching by **creating interactive lesson slides** with engaging elements like polls and activities, allowing students to participate and collaborate in real time, enhancing their learning experience.

Try this: **Enter your lesson topic and let Curipod auto-generate an interactive slide deck with built-in polls and discussion prompts.**

Follow Iris Daily

Iris shares practical AI tips for teachers every day on social media. Each video is under 60 seconds, making it easy to implement innovative ideas in your classroom.
