

CHAT GPT

DIGITAL PRODUCT PROMPT

Copy & Paste This Prompt into ChatGPT to Create a Digital Product from Scratch:

Act as a digital product strategist and bestselling ghostwriter. I want to create a sellable digital product, like an ebook, that can be sold online to my target audience. First, ask me 3 questions to better understand my niche, audience, and goals. Then, based on my answers, give me:

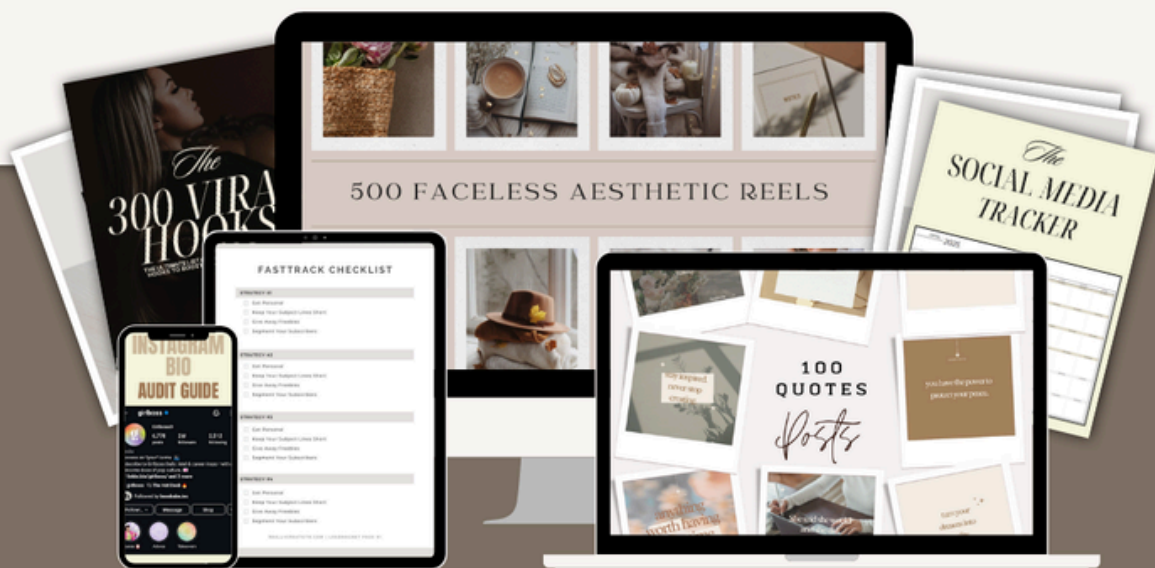

1. A profitable digital product idea that solves a specific problem.
2. A compelling product title with a subtitle that grabs attention.
3. A full table of contents or outline with chapter/section breakdowns.
4. The complete written content for the product (aim for at least 3,000–5,000 words).
5. Suggestions for lead magnets, upsells, and bundle ideas.
6. A list of keywords, hashtags, and product positioning tips for marketing on Instagram.
7. A list of 5 content ideas I can use to promote the product on social media.

Keep the tone friendly and clear, and write the content in a way that's easy to read and valuable to my audience. Don't just outline — actually write the content where requested. If you're ready, ask me those 3 questions now.
