The Matrix 2.0 and Their Uses

Loris Sichetti

Welcome to this PDF! Here, Loris Sichetti, inventor of Psychotronic Tools, all created based on the same Matrix! After years of study and reflection, in 2018, I had open-eyed visions that changed my life. Did the Universe show me its true Nature? I am certain it did, and every year I find new evidence that everything is made from this Matrix and everything tells the same story/archetype, namely a Sphere that divides into 2. In this story, there is Soul, Thought, Mind, Spirit. There is Gnosis, and there are the secrets told and passed down through the centuries by alchemists and scholars of all times, starting with Hermes Trismegistus with the caduceus and many, many others. The discovery I made, together with all the dear friends of my group who have been following me for years, is that when we use this Matrix, in the form of drawings or Tools, such as the Zero Point Machine, we enter into communication with the Field, with Soul.

We can instantly achieve any type of energetic rebalancing measured with radiesthesia. Additionally, there are hundreds of testimonials about real effects on the body and much more. Regardless of the results and uses, these Matrices, in my opinion, are the true knowledge of everything, something of truly infinite value, like the Soul! I recommend visiting my YouTube channel, LORIS SICHETTI, and watching the recording of Zero Point Sun-day 3. An 8-hour event where we talk entirely about these matrices, and you will see for yourself that they are truly at the base of all cultures of the world and all times.

HOW TO USE THEM

You can find a video here:

But the operation is very simple. For each Matrix, you will find the Ideal Uses that I have tested, but the greatest advice I can give you, if you know how to use a pendulum or a kinesiology test, is to test each matrix yourself for your intents.

But the most important thing to know is that in the end, all the matrices you will find are the SAME! So, they are all suitable for any intent. They all ultimately tell the same story, just depicted in different scenes, but the Origin of each image is the same.

What you can do is print out the pages where you find the MATRICES. You can print them in A4 on large pages, or print the final sheets of this PDF and cut out the images to transform them into actual cards. Once printed, the only thing you need to do is TALK TO THE DRAWING! It will be like talking to your Soul! And you will need to tell it the result you want to achieve, that's it!

This is how we have been using them for more than 5 years, and if you have a pendulum or other measuring tools, you will see that your requests, at the level of radiesthesia, will be fulfilled instantly, no matter which drawing you use!

Additionally, I recommend experimenting with them on the body, remembering that there is no guarantee of results, but on the other hand, there are no side effects either, so why not try? I have dozens of testimonials of physical problems solved by using these cards on the body. So, the only thing you need to do is cut out the cards you find at the end and keep them as long as possible on the parts of the body you want to "heal."

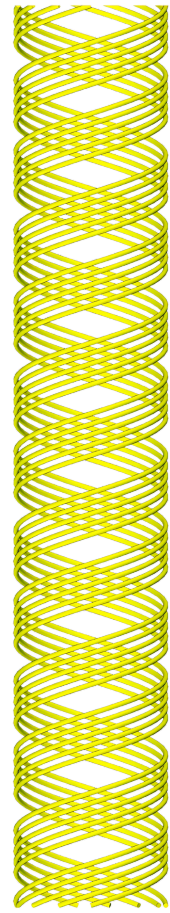

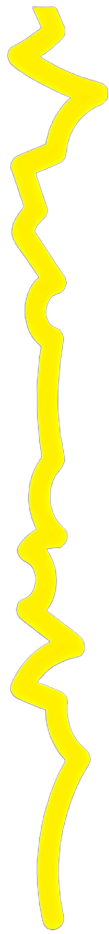

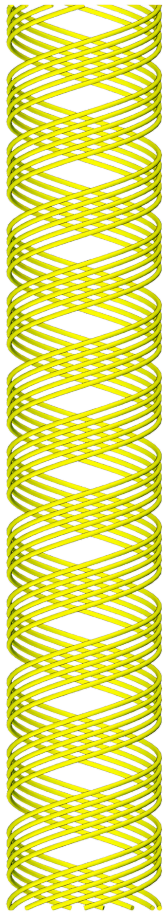

You can also put them in your wallet, under your pillow, near plants, use them for your animals, for your office, or wherever you desire! I look forward to your feedback and testimonials on WhatsApp!

This is the Energy Matrix. In my opinion, it is not a symbolic image but ALMOST a photograph of how the photon behaves each time it divides and produces the electromagnetic field. Unlike the initial drawings, this time not only is there a SPHERE instead of a circle, but we also have 2 columns composed of 10 filaments each (hands) that intertwine in this form resembling DNA with 10 helices. It is not perfectly identical to my vision, and I believe it will be very, very difficult to recreate it exactly, but we are certainly getting very close. Do your measurements and let me know!

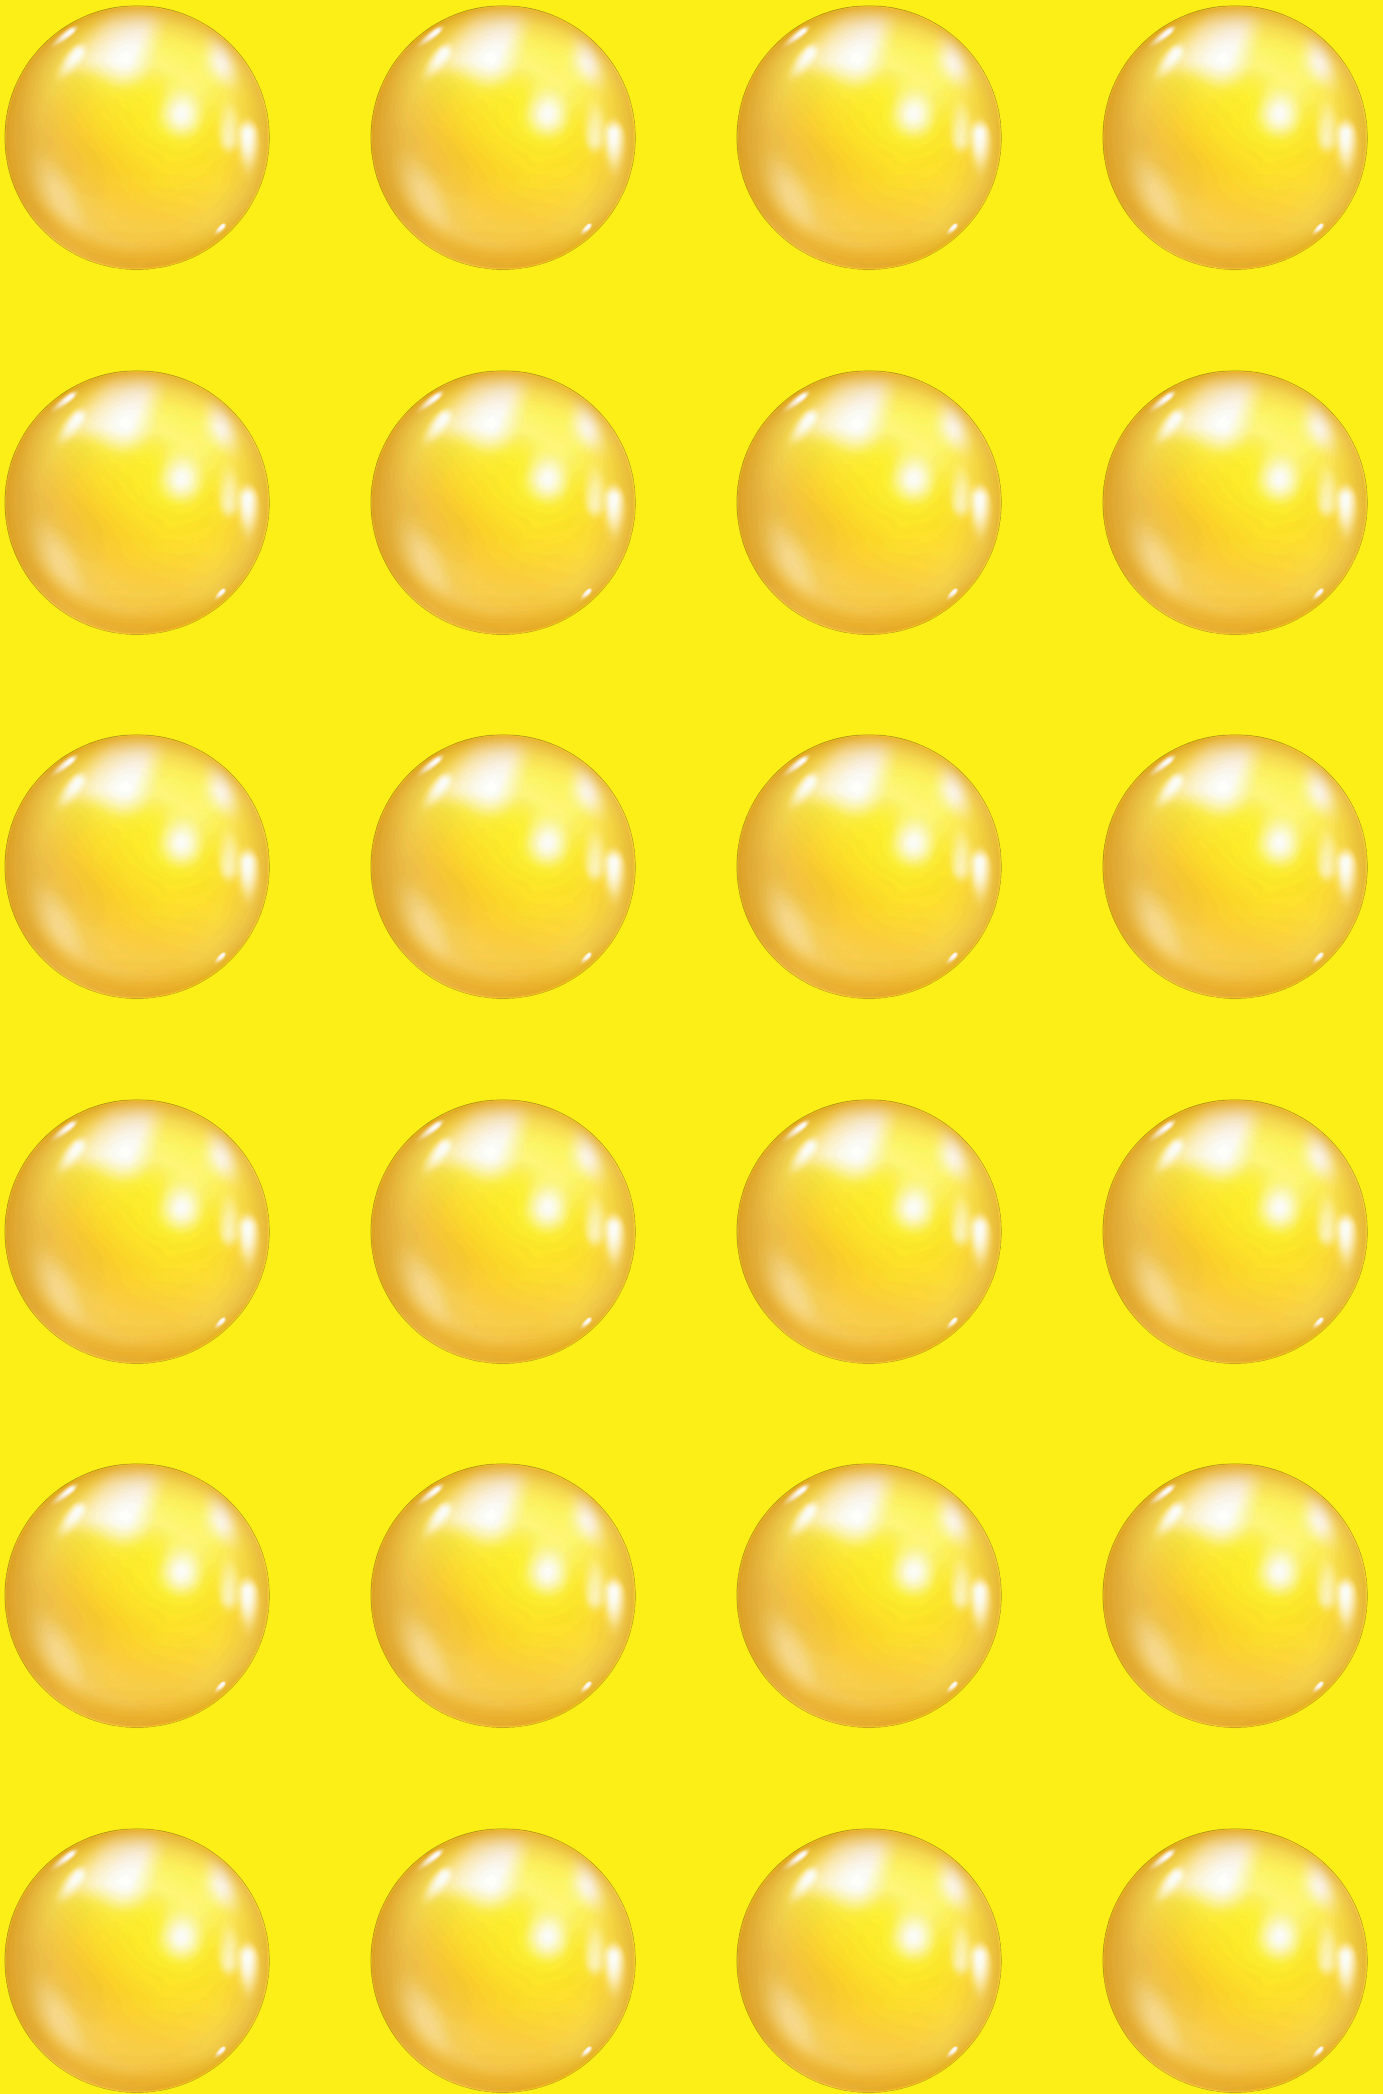

Ideal for all intents related to increasing energy in food, liquids, animals, and people. This is still a Matrix that can be used for any intent.

This is the Space-Time Matrix, the Universal Pattern, the Floor of the entire Universe. Again, this is not a symbolic image but what it truly is! Space is literally a Matrix of Hexagons that forms to the RIGHT OF THE FATHER, that is, the Sphere.

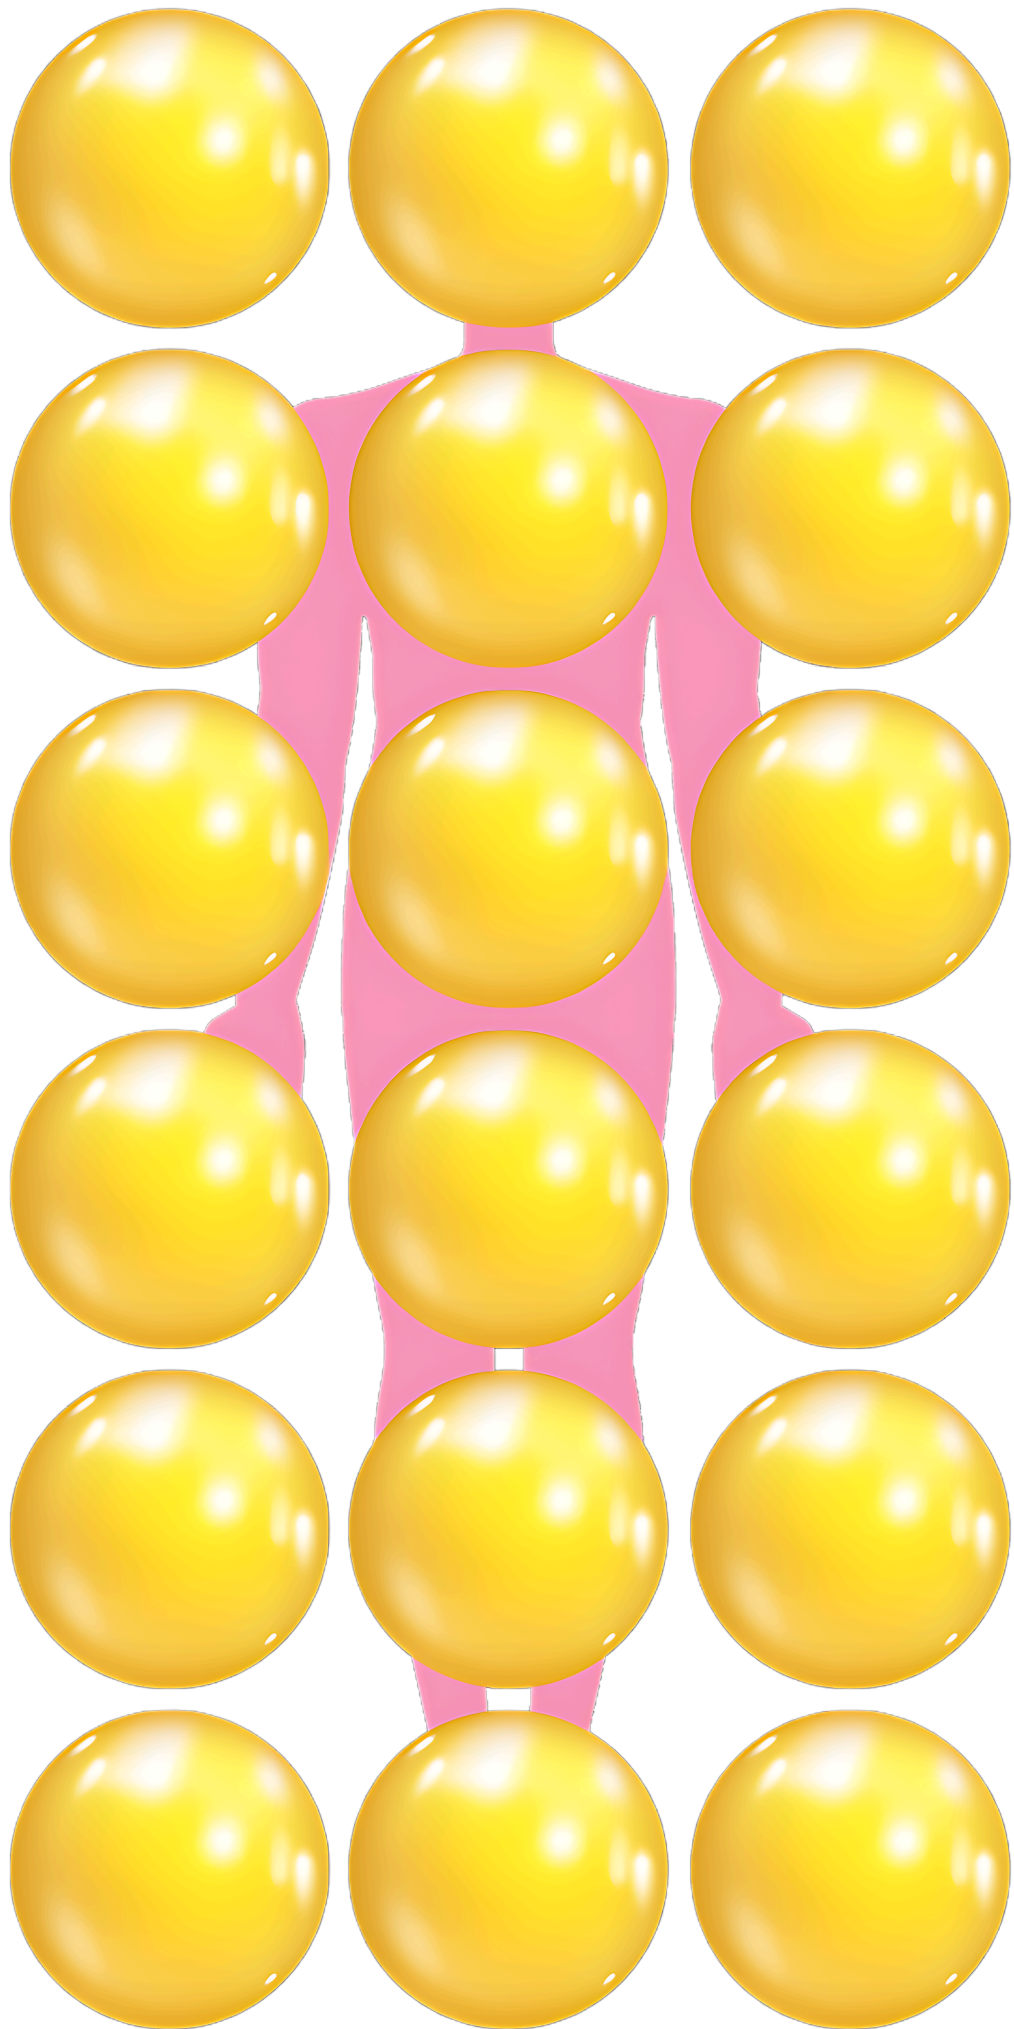

From now on, I will no longer use the Sphere in the center, although it works, but will only use the Original, which is this image.

Ideal for all intents related to Space and Time. For example, you can use it for energetic rebalancing work on the family tree, for remote work with a witness, or for any desires related to space, such as a new house.

And Here is ANIMA MUNDI or GOD! The Soul is not Singular but is ALL-ONE-ONE-ALL. Each of us here is an individual Matrix of Spheres, part of an Infinite Matrix of Spheres. In this image, you just need to imagine that these spheres reproduce infinitely throughout 3D space, and you have seen WHAT IS in reality. Beyond the mirror of illusion and the mind, this is the TRUTH. God from God, Light from Light, Sphere from Sphere, Light from Light.

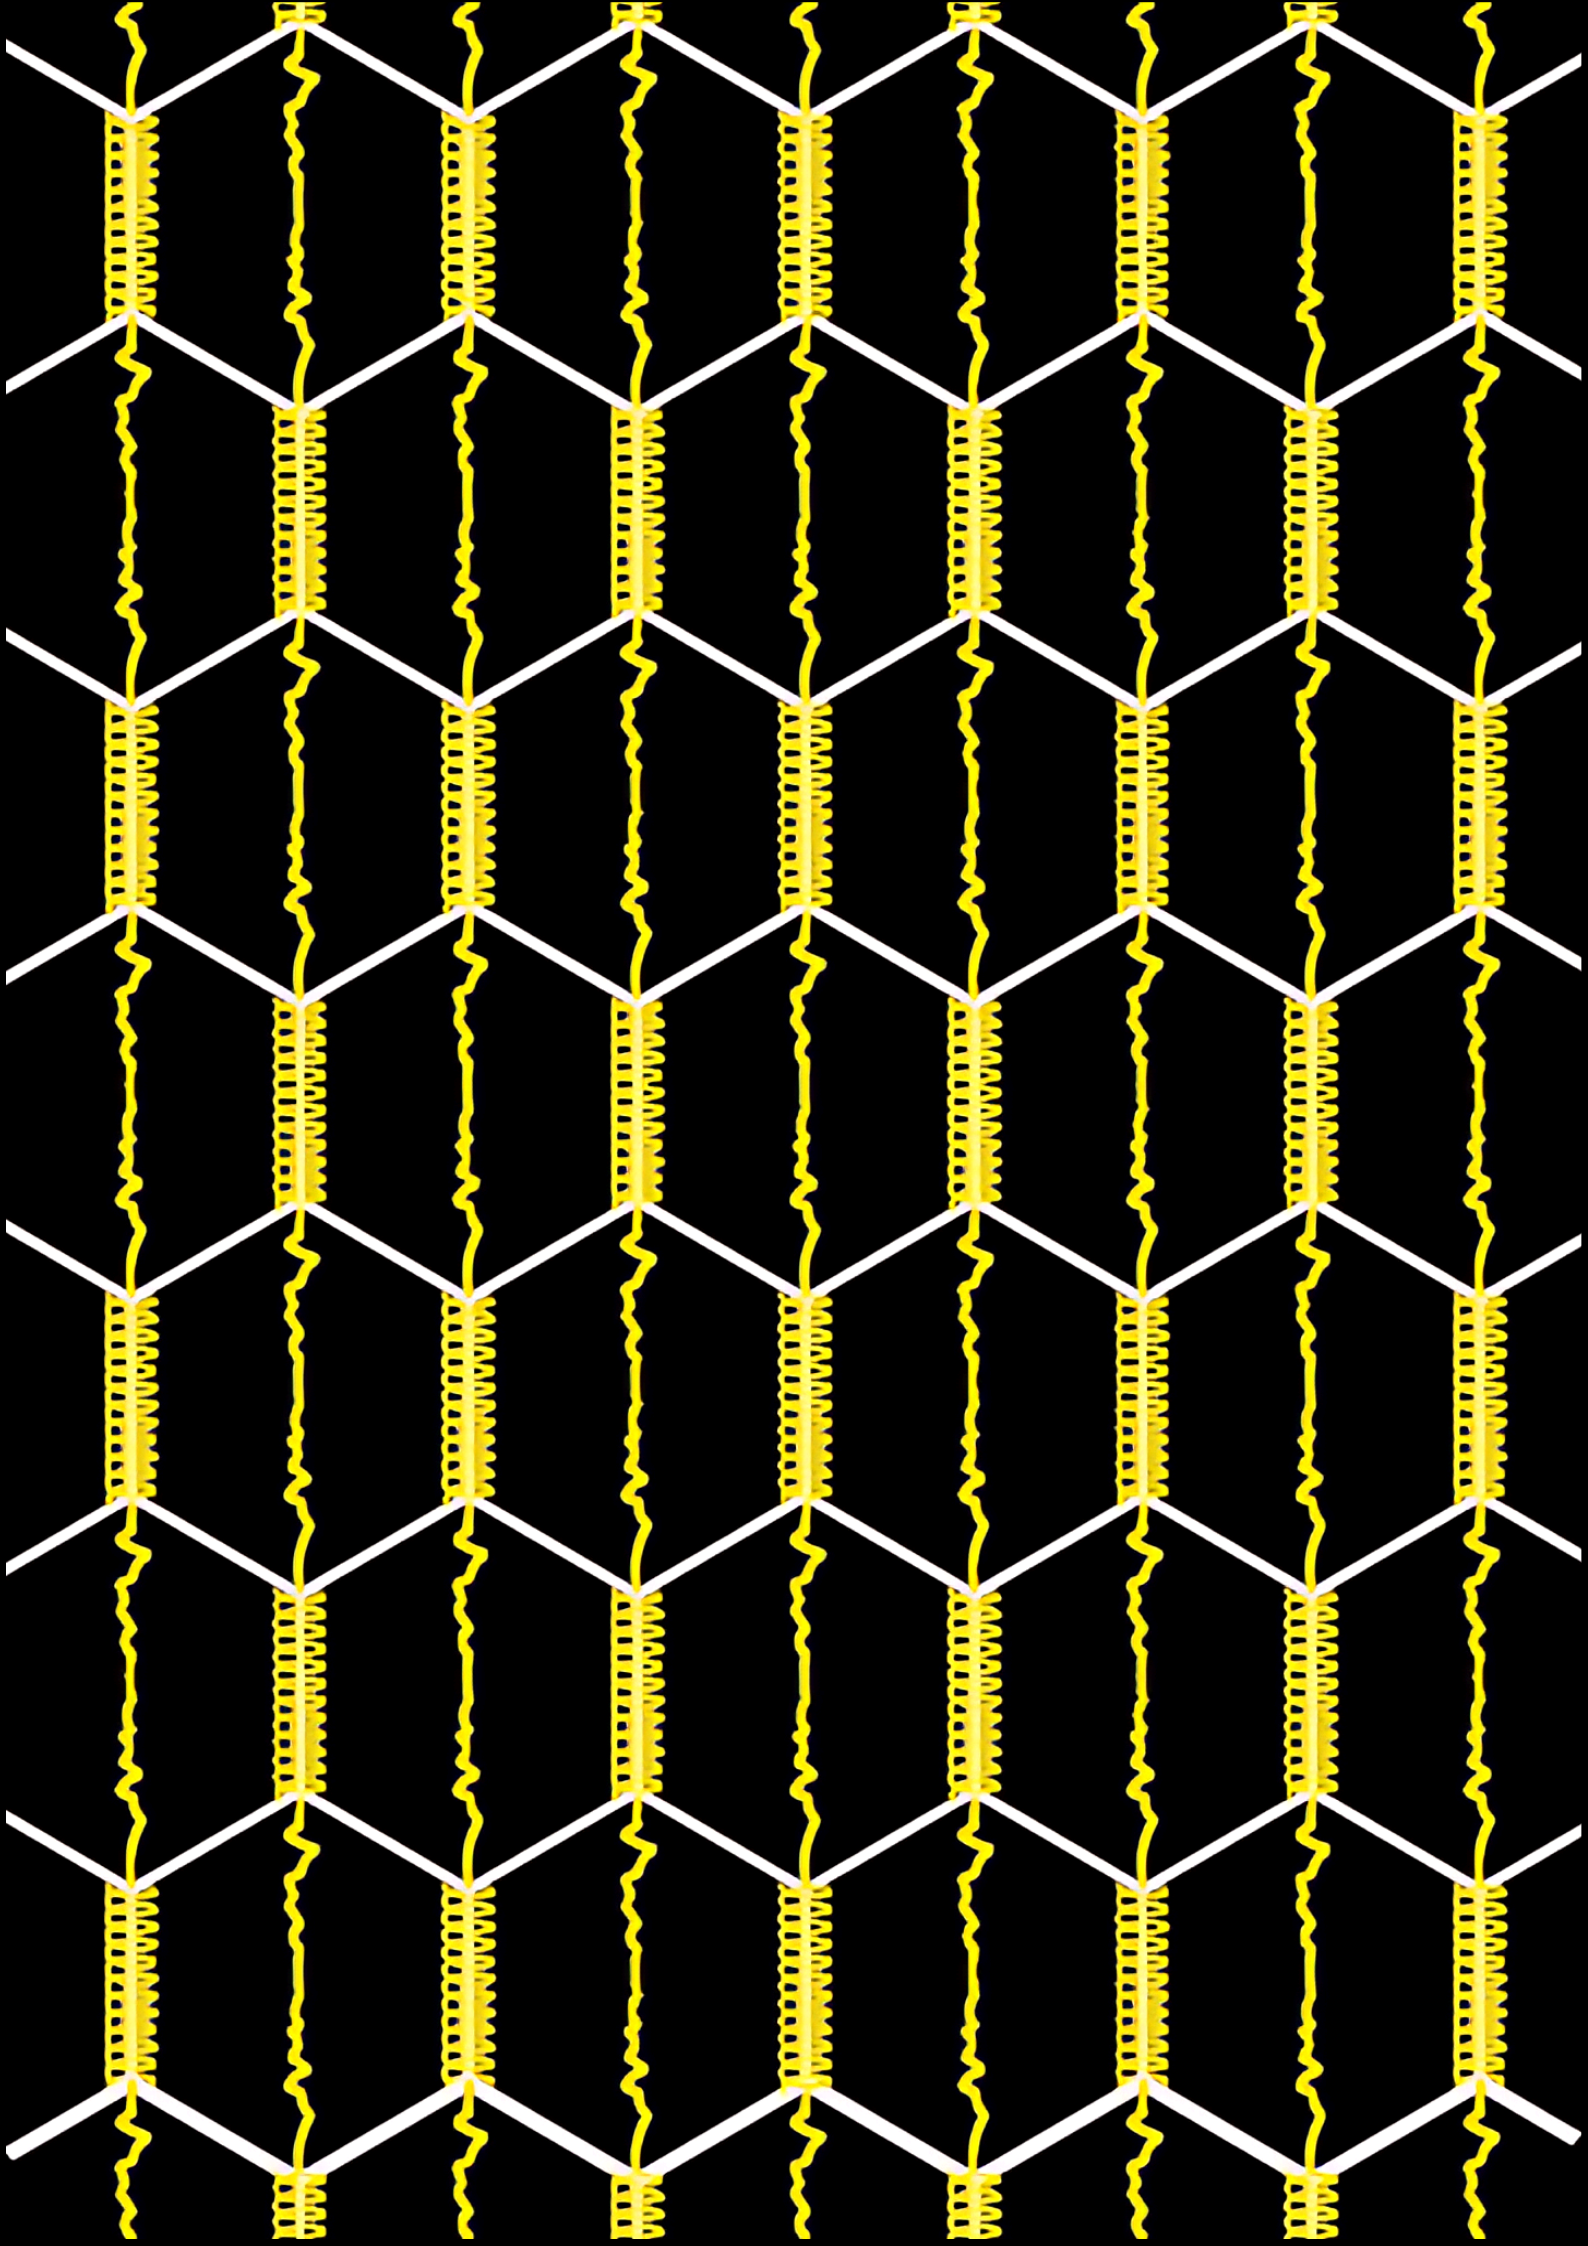

Ideal for all intents related to protection and cleansing from negative thought forms and "presences." This is the Matrix of "D'lo," of Anima Mundi, and that's why it's the best Matrix for reconnecting with the Source and cleansing ourselves from any type of interference.

And here is THE BODY OF SOUL HERE. You just need to imagine these spheres within your body, probably 12 or 9 (it's hard to say), that breathe, pulse, and become smaller and larger. This is the REAL NATURE OF OUR SOUL BODY HERE.

This is another image that is not SYMBOLIC but is almost a PHOTOGRAPH of what it is.

Ideal for all intents related to the Soul, Self-Esteem, Talent Development, and connection with our Soul Body Here, in this Dimension.

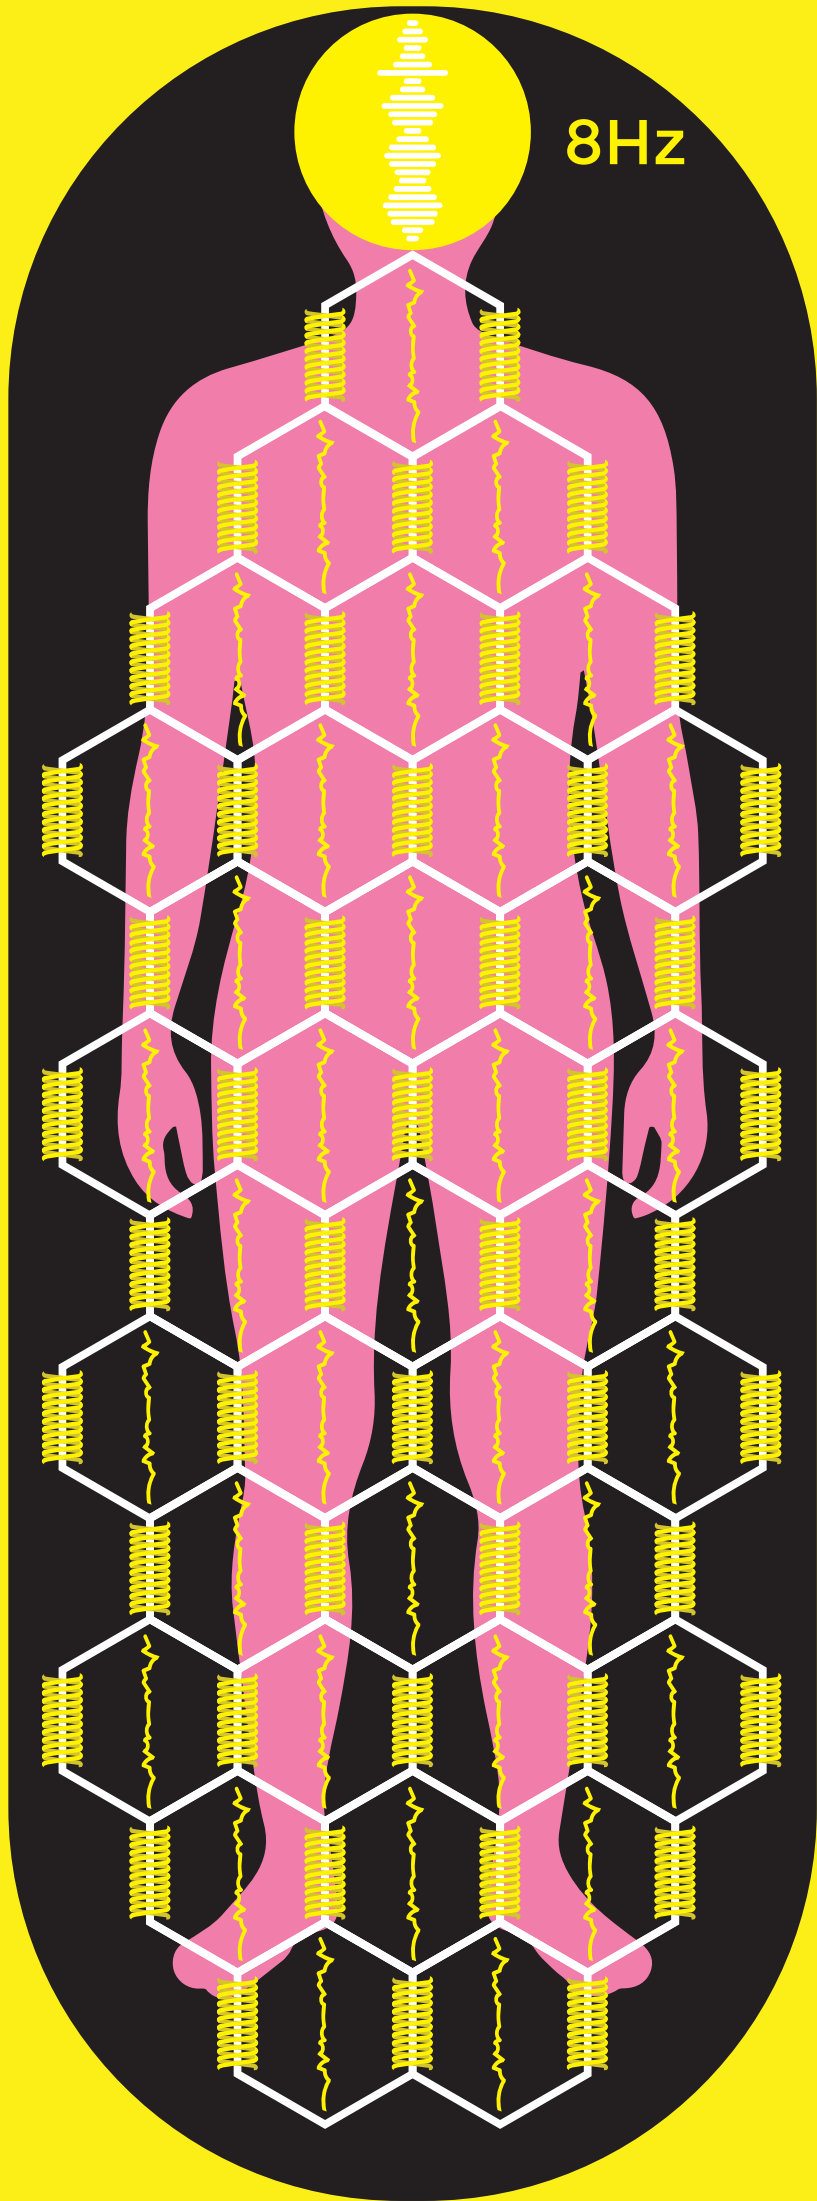

This image, however, is an artifact. It is my composition that brings together energy, space, and time. But it is NOT WHAT IS. It is a way of composing the Matrices of the universe to create powerful energetic designs. In this case, the symbol still follows the science of the zero point. In fact, they have discovered, for example, that electrical charges form at the corners of carbon (hexagons)! So, it is an artifact but one that always follows what is.

Ideal for all intents related to the energetic healing of the body. From what I have tested, this is the best matrix for all times when we want to work energetically on a physical problem. Here, we combine energy, space, and time.

The Cardioid! Another ARTIFACT symbol. The cardioid EXISTS AS A SHADOW, but it does not exist in the TRUE NATURE OF ENERGY. The cardioid is the Shadow of the Sphere. In fact, the shadow inside a cup (circle) will become a cardioid. A shape that is found everywhere in Nature because it is the shadow projected by the sun of all the spheres/Matrices in which we live!

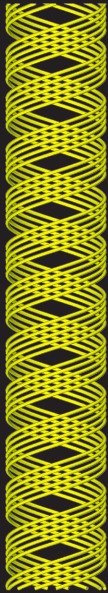

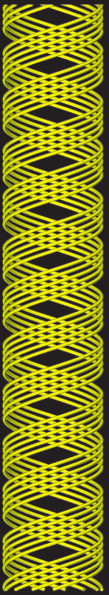

Ideal for all intents related to Abundance and the Opening of the Heart!

8Hz

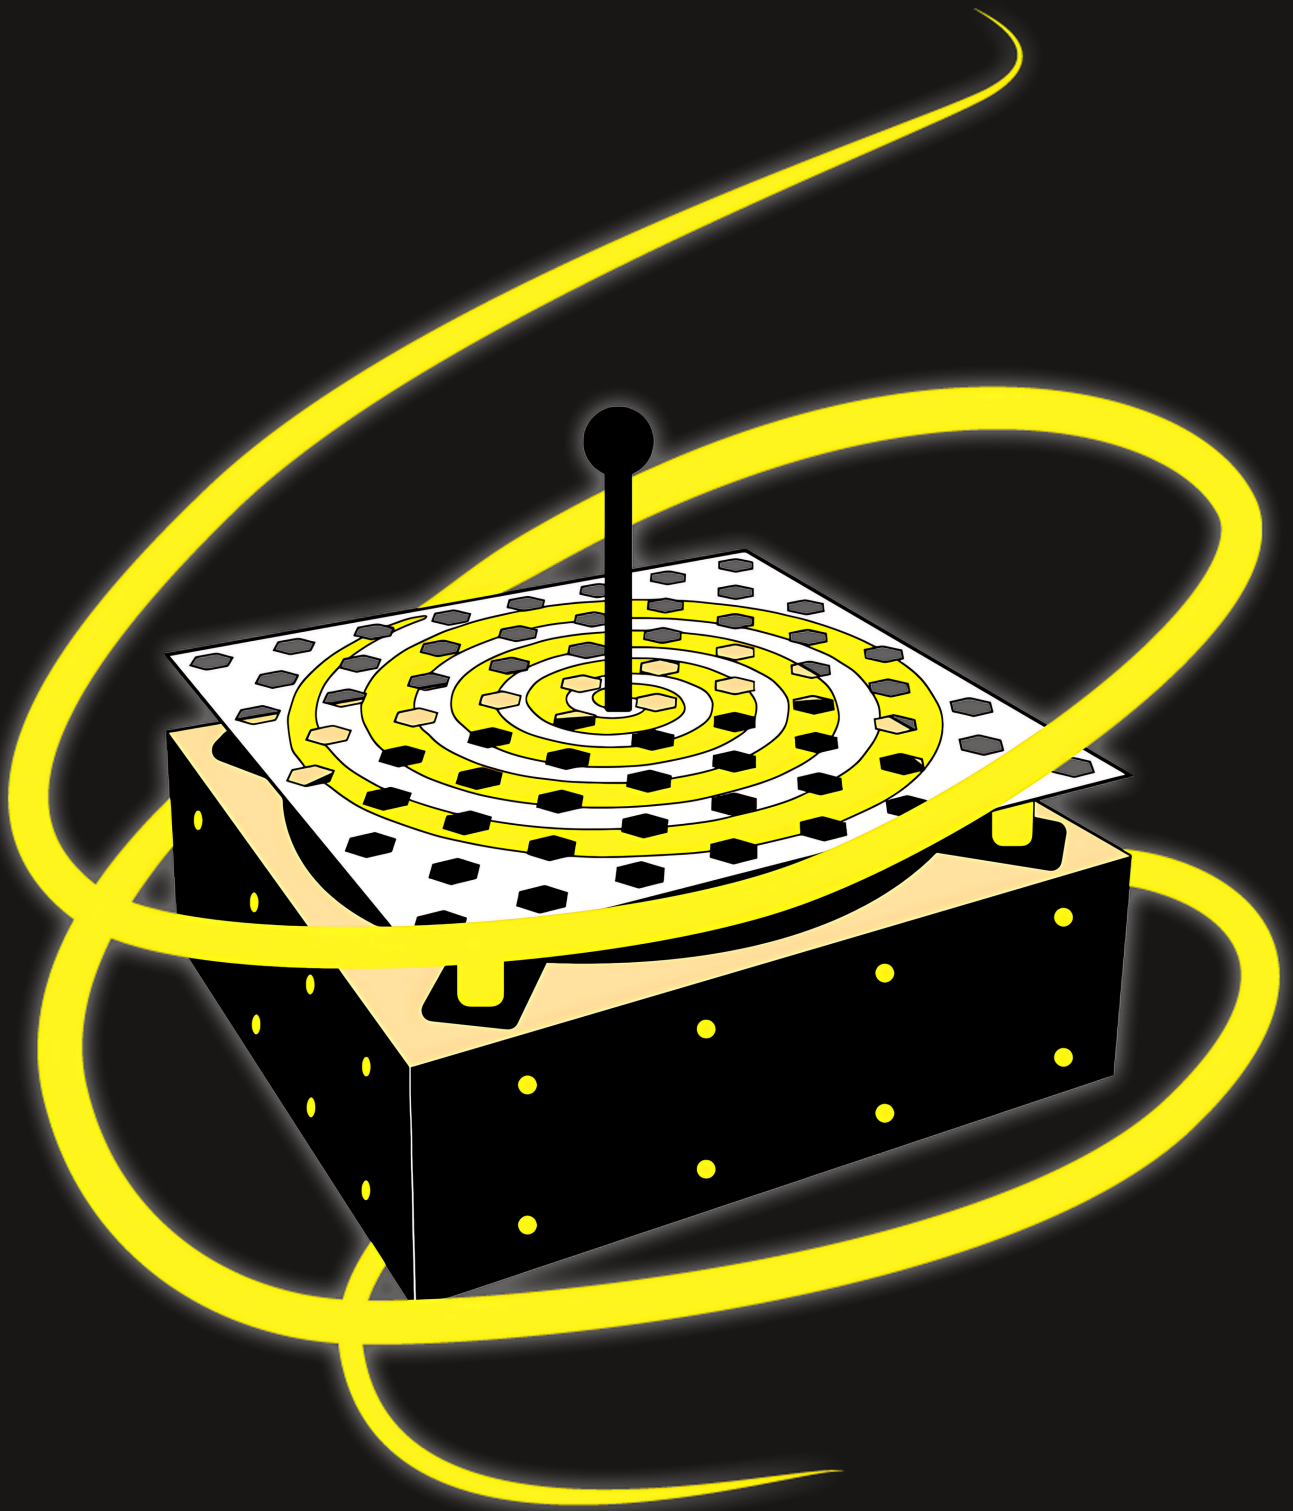

This is another artifact that I have called 8Hz LAEF. It represents how our entire body might function, from biophotons to Carbon, starting from the Sphere at the top that gives rotational/frequency instructions to all the pairs of vortices/rotating electrons in our body.

Ideal for all intents related to body detoxification, as well as centering and dreams.

This is another drawing that combines Space-Time-Energy. Here it is a mix between artifact and reality. The scenes are two in succession. First, the sphere divides into two vortices with electricity in the center. Then, the sphere, at a later moment, travels through space and creates the matrix of hexagons to its right. So in reality, we either find the HEXAGONS AND THE SPHERE or the Pairs of Vortices/Energy. Here I have put everything together.

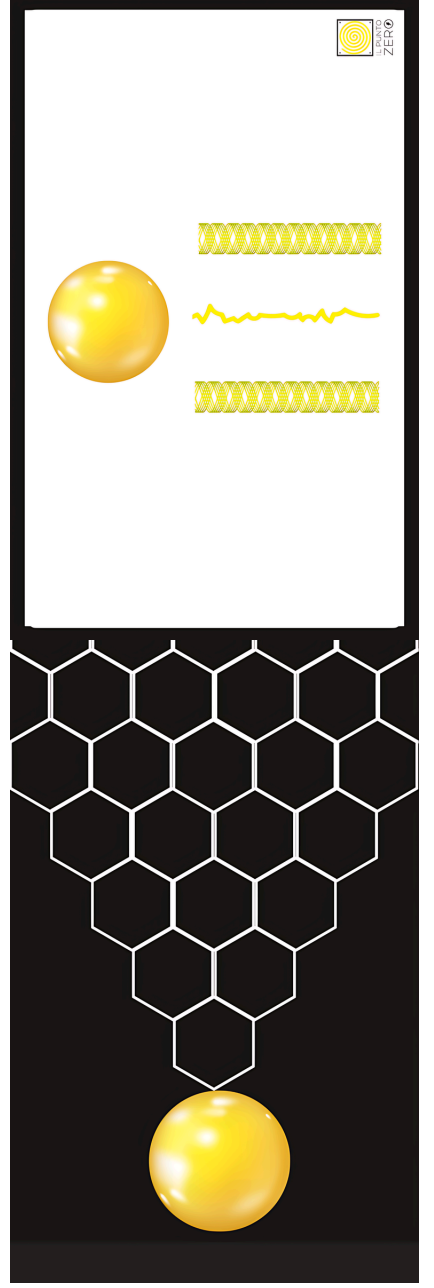

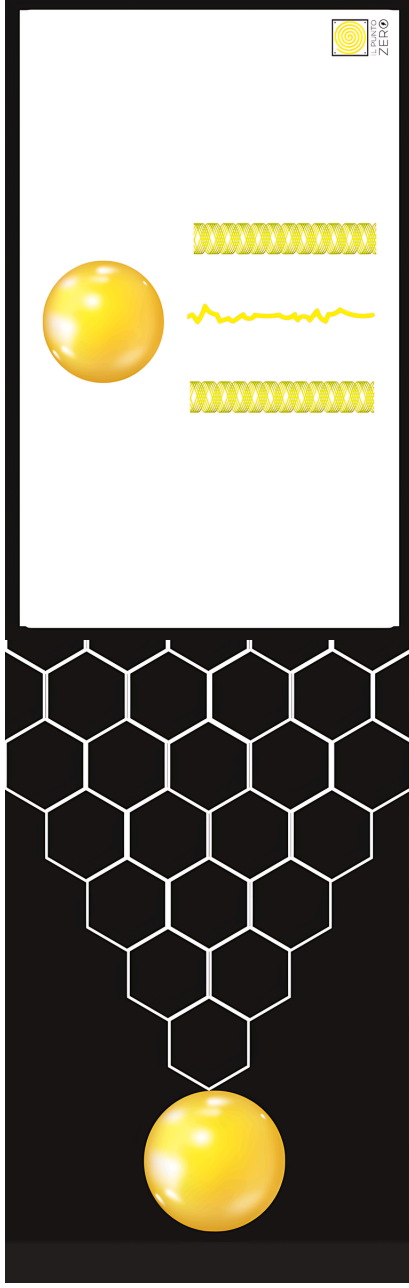

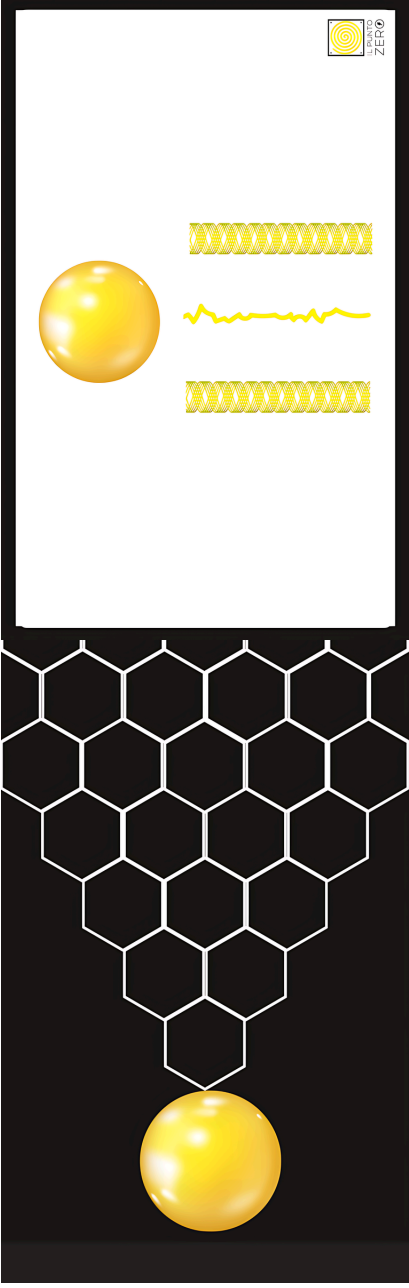

Ideal for all intents related to the Body, Energy, and Intents in Space and Time. We can say that this Matrix is recommended for any intent.

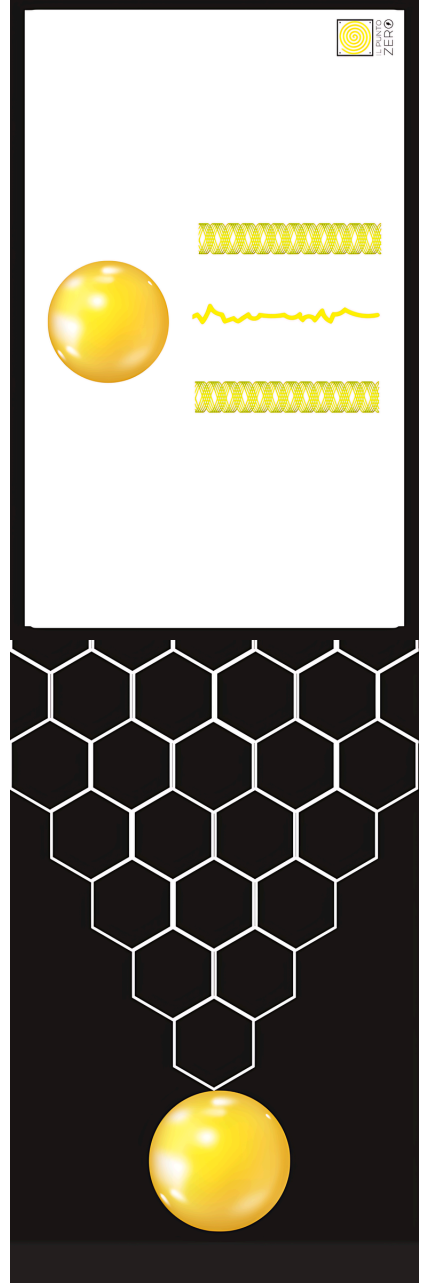

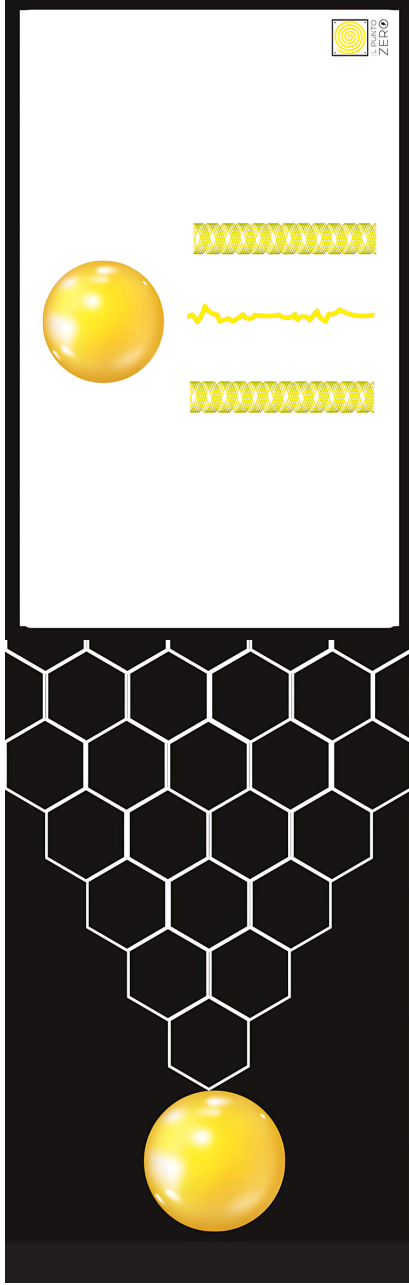

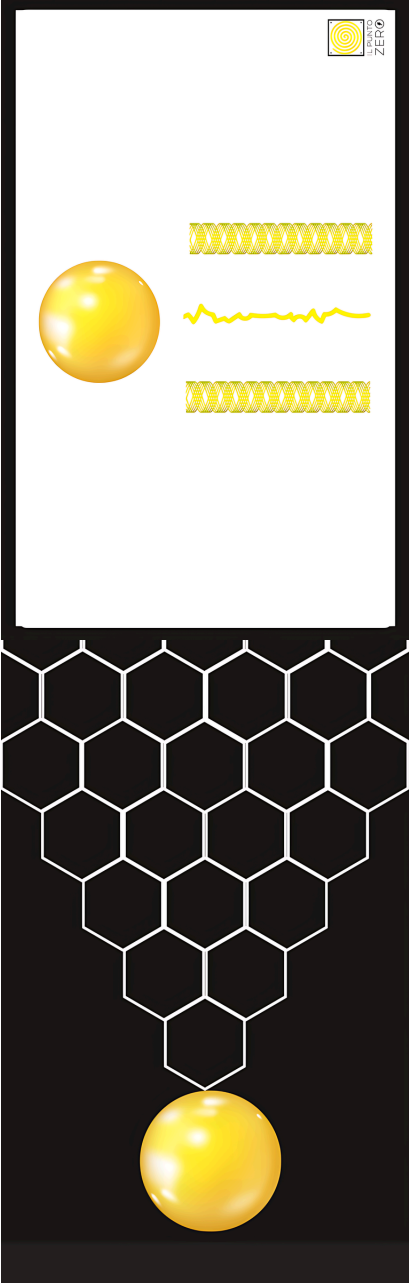

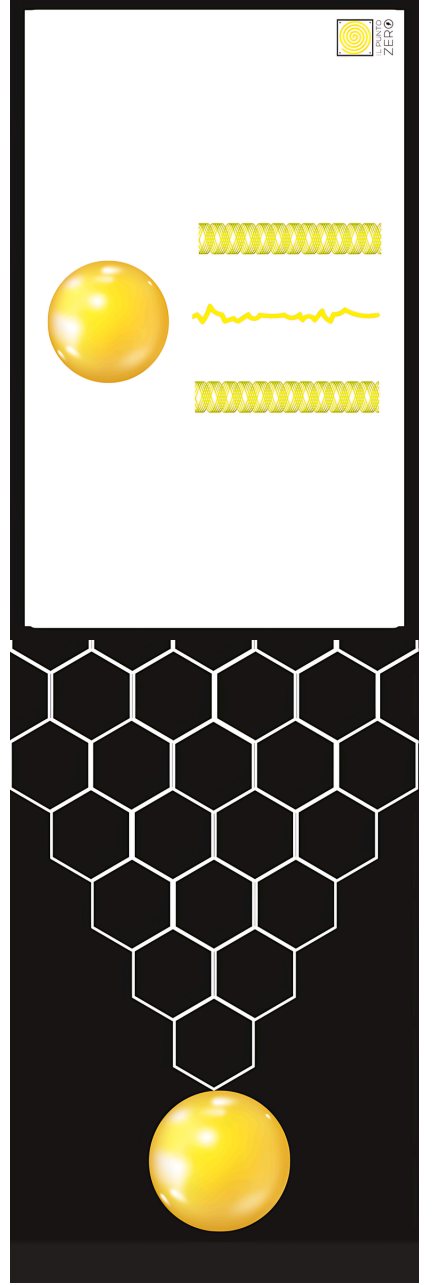

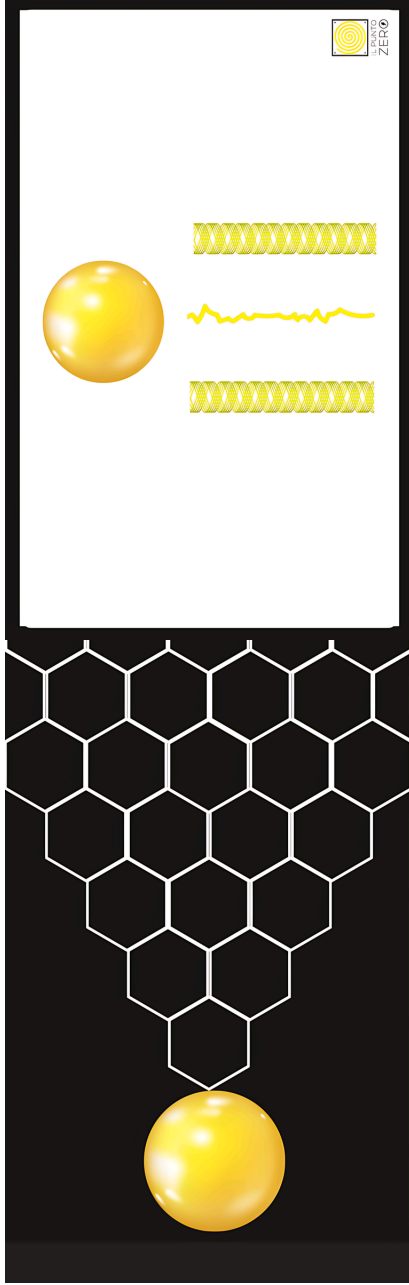

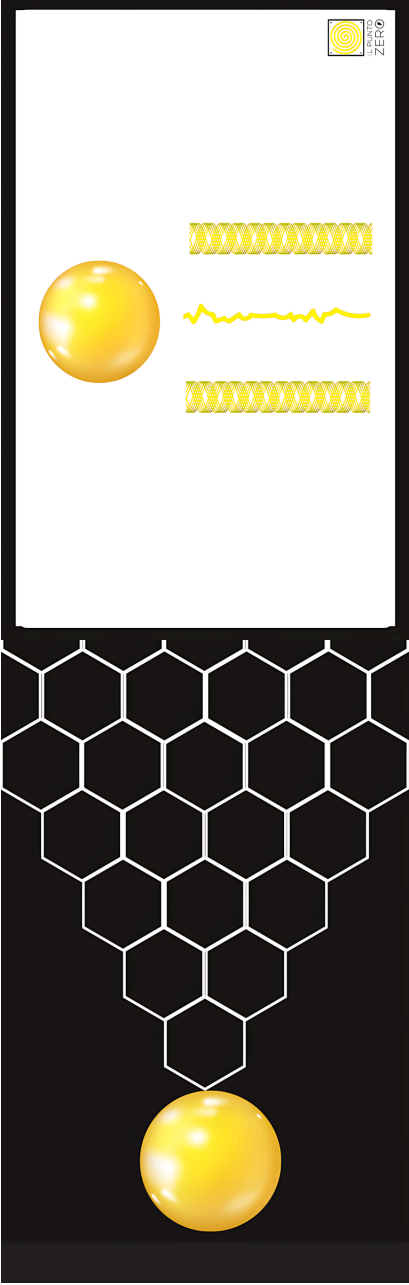

And finally, we have the design of the Zero Point Machine, the flagship tool among my creations! This tool was created to encapsulate in a single device all the Matrices you have found in this PDF. It is a tool capable of emitting energy from nothing, bio photons, helping us remember dreams, and somehow putting us in communication with the Soul! Using the drawing is similar to using it in reality.

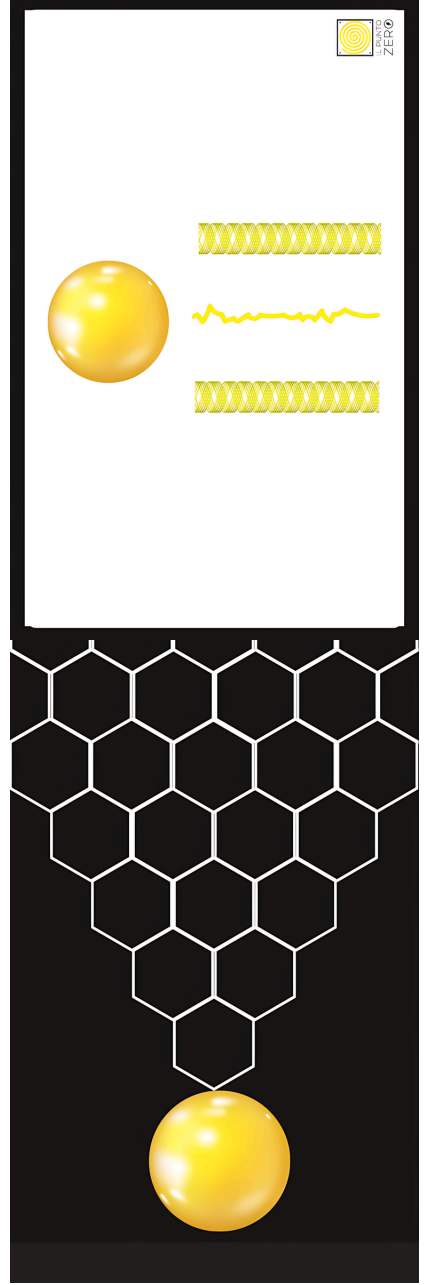

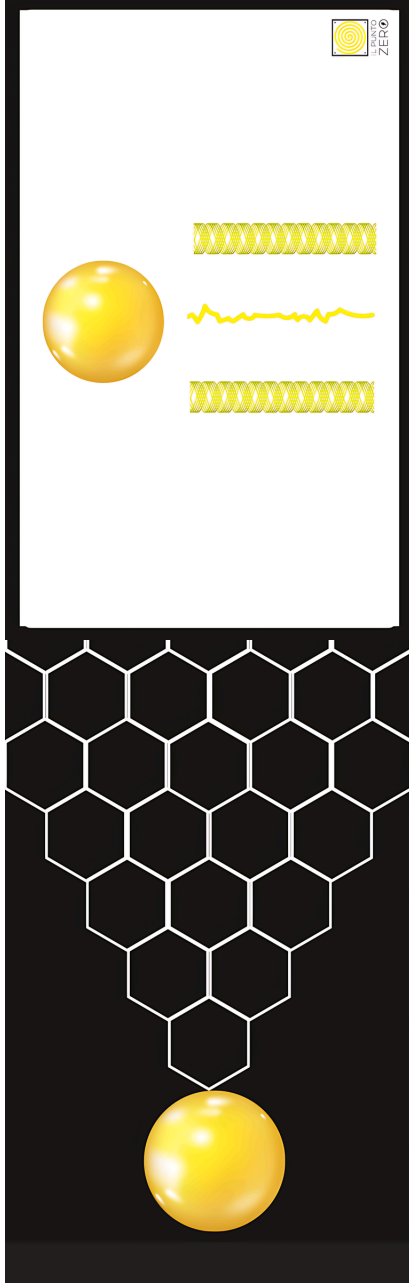

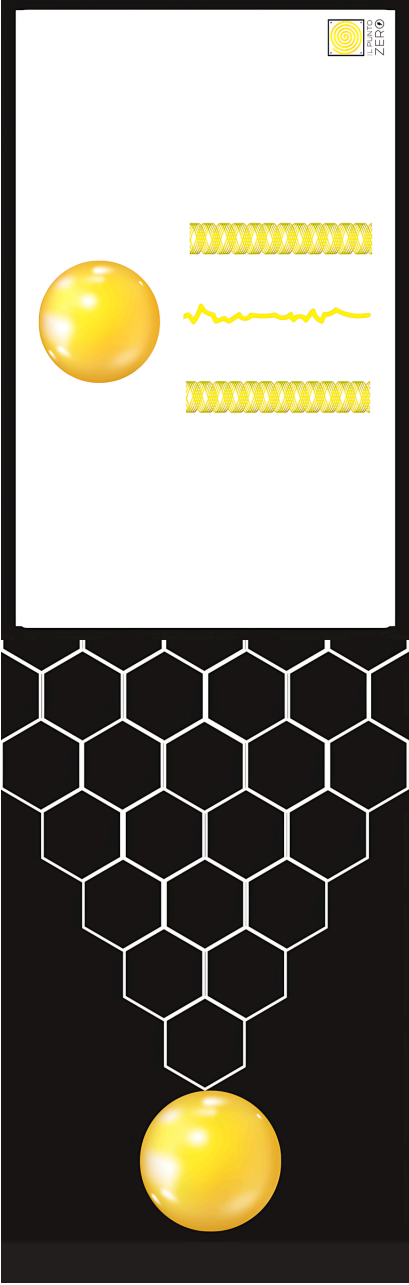

Ideal for all types of Desires, consider it a friend of your Soul!

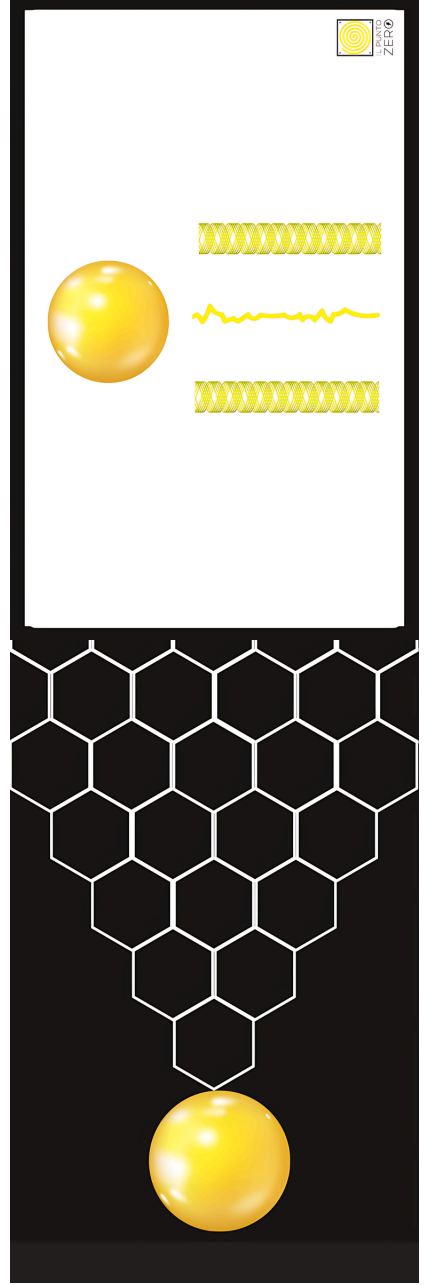

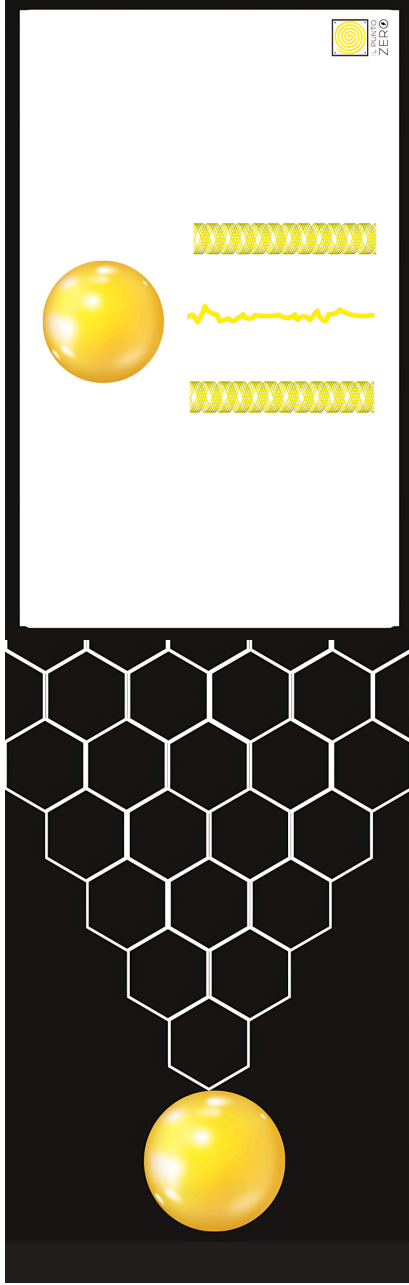

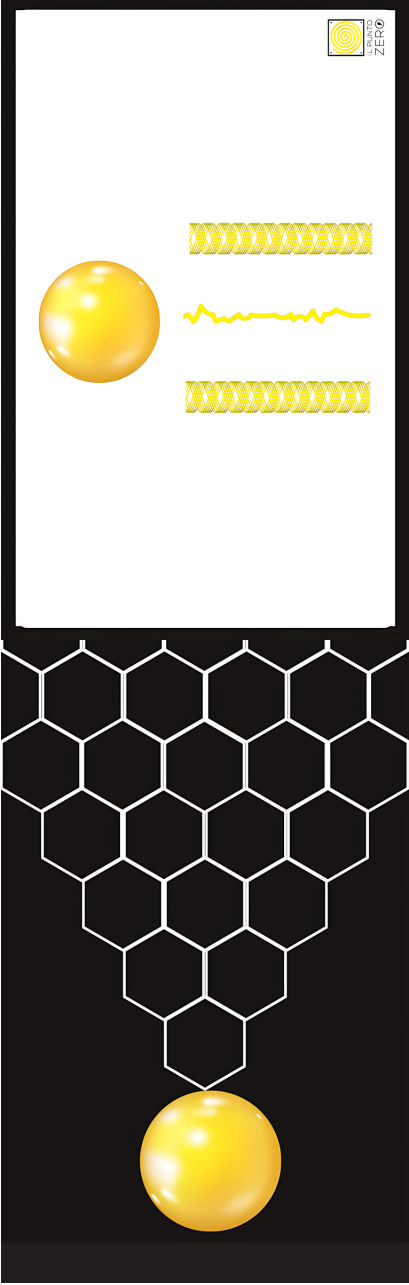

The sheets you will find from the next page onwards should be printed in color on any type of cardstock. Then cut out the cards and fold them in half, so that the drawing is on each side. On the inner side, you can also write your intent! Tell the print shop to print from page 25 onwards. For the body, all three images are fine, but I specifically recommend trying 2 and 3. Page 30/34 and page 35/39.
