

Play is...

Print the colors & shapes that you will enjoy in YOUR settings!

NOTE: This is where children are at developmentally. This is where their brain lives. When you chose to put yourself into this viewpoint, you WILL be able to connect more deeply and the lessons you teach will take root more easily. These printouts are intended to be posted strategically in your home as a reminder to enter this mindset; this curious disposition when interacting with your kids. You will be surprised by what you discover! Enjoy!

With Love From,

Dina Lynn
