HOW TO SELL

New to selling Canva files?

HERE'S HOW TO SELL YOUR PRODUCTS!

- STEP 1 - Signup for a free Canva account here if you don't already have one.
- STEP 2 - Click the link for each template and save a copy of the template to your Canva account
- STEP 3 - Edit the files to your liking adding your colors, branding, font styles, etc to make it your own. (Etsy prefers non-identical products)
- STEP 4 - Next create a file for your customers, make a separate new guide (like this one) in Canva to share your own template links. Use Canva's templated ebooks to make it super simple or just create a basic 1 page document with the links
- STEP 5 - Once your guide is ready. Go to your product in Canva, click "share". Click "template link" and create a new template link for your buyers.
- Place this template link in your guide so your buyers can copy the template into their own account. (this was recently made a Canva Pro feature, you can start a free 30 day trial to make your link)
- STEP 6 - List your product for sale on Etsy or any store of your choice, StanStore, Beacons, Systeme or website.
