FAST- VALIDATION WORKBOOK

***Test Your PLR Product Idea in 24 Hours –
Before You Waste Time Building It***

Why You Need This Workbook

Most digital entrepreneurs spend weeks creating, designing, and “perfecting” their offers... only to realize no one actually wants to buy them.

Validation is the secret shortcut to profitable launches.

This workbook helps you confirm your product’s demand before you spend another hour building.

Section 1: Your PLR Product Snapshot

Write down your product idea in one sentence.

Example:

“A step-by-step guide that helps beginners turn PLR products into their first \$500 online.”

Now answer:

- Who is it for?
- What problem does it solve?
- What transformation does it promise?

If you can't answer all three in 30 seconds, your offer needs focus.

Section 2: Audience Validation

Answer these 3 truth-check questions:

Are people already buying something similar?

(Search on Etsy, Gumroad, or Udemy)

Are people asking questions about this topic online?

(Check Facebook Groups or Quora)

Can you explain the value of your offer in one sentence without losing interest?

If you answered “yes” to at least two – your idea is validated enough to test.

Section 3: 10-Minute Audience Ping

Post one of these quick messages in a Facebook group or community:

“Hey! I’m putting together a short guide on [your product topic].

If it showed you how to [specific result], would you be interested?”

Track the replies.

If you get 5+ people saying “yes” or showing curiosity – congratulations, your product has real potential.

Section 4: Create a Micro Offer Test

Don’t launch the full product yet – test the idea first.

Options:

- Sell a pre-order (add urgency).
- Offer a beta version for feedback.
- Create a free opt-in to test interest.

If people opt-in or pay, your validation is done.

✔ **Section 5: Decision Matrix**

Questions

Did at least 5 people show interest?

Yes

No

Can I clearly explain what problem it solves?

Yes

No

Do I feel confident I can deliver quick results?

Yes

No

✔ *If you have 2+ "Yes" answers – move forward with your funnel.*

✘ *If not – tweak your product promise or headline and revalidate.*

✈ **Section 6 – Next Step**

Now that your idea is validated, it's time to launch.

You already have everything you need inside your Autopilot Earnings Bundle to build your funnel in a day.

💡 **Final Thought**

"You don't need to build perfect products.

You just need to build products people already want – faster."

This workbook gives you the clarity to do just that.
