

Making Hiss-story!

St. Patrick's Secrets for Driving out the Snakes

01/ Research

Identify where snakes are likely to live and gather. Study their behavior and habits to develop effective strategies for their driving them out.

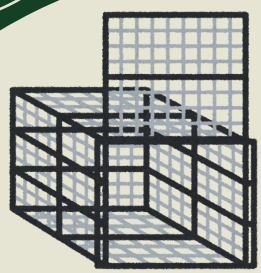

02/ Form a Task Force

Call in your expert herpetologists as well as volunteers. Assign roles and responsibilities including scouting, trapping, and relocation teams.

03/ Implementation of Deterrents

Utilize rock salt, garlic, traps, and barriers to guide the snakes. Play bagpipe music to liven your spirits and step, but lure the snakes with a food source such as rodents.

04/ Monitor and Assess

Conduct patrols and observations to collect data on the removal efforts. Educate the public on how to keep a snake-free status while peacefully coexisting with wildlife.

Snakes no more in 2024!
