

COURSE CONVERSIONS & MIGRATIONS

When a **major online marketplace needed to convert over 400 training modules from Lessonly to Rise**, they called us in to make it happen quickly and cleanly.

We kicked things off with a small team of 10 instructional designers, then scaled up to **35 IDs, 2 project managers, and 3 QA specialists** to meet their evolving timeline.

In just **11 weeks, our team converted 415 courses**, staying on track and on budget despite shifting deadlines on the client side.

As their review capacity changed, we flexed to keep work moving smoothly, delivering content in organized batches that were ready for upload the moment they were cleared.

The result? A large-scale content transformation that didn't derail the client's internal team. Just steady progress, clear handoffs, and a lot of Rise files delivered exactly when they were needed!
