CloverOps: Leprechaun Capture Training

Welcome to CloverOps, an agency specializing in the safe, ethical capture of leprechauns in the wild.

CloverOps professionals are dispatched when leprechauns cause disruptions—hoarding luck, interfering with operations, refusing to stay on their side of the rainbow, or just being creepy lil' dudes. New hires are expected to be field-ready quickly.

Your task is to design a short onboarding training that prepares a brand-new CloverOps recruit for their first leprechaun capture assignment.

The Challenge

Create a 4–6 slide eLearning module in Articulate Storyline that trains new CloverOps hires on how to catch a leprechaun.

This challenge **must include at least one vibe-coded element.**

As you build, keep the following in mind:

- **Audience:** Brand-new CloverOps employees. Smart, capable, and completely new to leprechaun capture.
- **Tone:** Straight-faced professionalism with moments of absurdity.
- **Length:** 4–6 slides total.
- **Format**: Articulate Storyline (Submit as a Review link)

CloverOps Assets

Download Assets

We designed a logo for CloverOps and chose a color palette to help tie your onboarding experience together. Use 'em, remix 'em, and build from there!

Submit

Submit Your Work

When your Storyline masterpiece is ready, submit it using the button above. Please be sure to include your name, email, and a shareable link to your finished module. **Submissions are due by midnight on Monday, March 9. One lucky winner will get a $50 Amazon gift card!**
