Special Elite - This is Special Elite

This list is subject to change as Printify is often adding to the list of available fonts. If you find selecting a font as challenging as I do, I hope you find it helpful as a starting point.

Using fonts in Canva that also appear in Printify makes it easier for you to create an artwork file in Canva to use on beautiful personalized mockups as well as quickly edit your personalized orders in Printify by using Printify's font layer option.

Please also note that if you have a Canva Pro account you can add fonts to your Canva account from resources such as dafont.com or typewolf.com to name a few.
