03\_DESKTOP\_4K: 10 landscape JPG wallpapers (3840 x 2160).

04\_MOTIVATIONAL\_LOCKSCREENS: 10 vertical JPG lock screens.

05\_GUIDES: quick compatibility notes.

# PHONE + LIVE INSTALLATION

Static is universal. Live behavior depends on your device and operating system.

iPhone static: Photos > Share > Use as Wallpaper, then reposition and set Lock Screen or Home Screen.

iPhone motion: current iOS support varies by model and version. An MP4 may need conversion to a Live Photo with a third-party app; native continuous video wallpaper is not universal.

Android static: open the image, choose Set as wallpaper, and select Lock screen or Home screen.

Android motion: some devices accept MP4 directly; others require the manufacturer's wallpaper picker or a third-party live-wallpaper app. Check battery settings if motion pauses.

# DESKTOP + BEST RESULTS

A polished setup in under a minute.

Windows: right-click the JPG and choose Set as desktop background. Select Fill for most 16:9 displays.

macOS: System Settings > Wallpaper > Add Photo. Choose Fill Screen.

For lock screens, keep clock widgets in the clear upper area. If your phone crops aggressively, pinch to zoom out. Color appearance can vary by display.

# TROUBLESHOOTING + LICENSE

Keep your download safe and enjoy it on your personal devices.

MP4 will not animate: confirm that your device supports video or Live Photo wallpaper; use a reputable converter if required.

Image looks cropped: choose Fit or zoom out before applying.

File will not open: re-download and unzip the full archive first.

Personal use only. Do not resell, redistribute, share download links, upload to wallpaper sites, claim authorship, or use the assets commercially. See LICENSE.pdf for details.
