

Surrogate Em - Surrogate For Client (People)

By the laws of quantum physics we are all one vibrational field, the space between us is an illusion. So we can intentionally plug into this field, by utilising quantum entanglement, to have one beings energy field give information on behalf of another.

We can use surrogation as a tool in our sessions to have another person surrogate their muscles to be tested on behalf of the client. Eg a child too young to test, someone who is injured or an animal. We can also surrogate test ourselves on behalf of the client in an online / distance session.

This process is to use when a client is not testable and you require a surrogate to work with the client. The surrogate becomes your testing 'vessel' whilst the client still remains the person you do the corrections on.

At this stage, 'surrogate person' is a clinical tool rather than a balance.

Set Up:

1. Obtain verbal permission from surrogate and surrogatee (where possible, if not use your IM to confirm)
2. Check you have a clear IM on the surrogate, including prechecks.
3. Ensure a lock when CL thymus LE. If not establish the % thymus LE and balance. Recheck % and that surrogate has sufficient thymus LE to proceed.
4. "My name is X insert surrogates name" IM lock
5. "My name is Y insert surrogatee name" IM unlock
6. "Indicate with a change when XXXX is YYYY" IM will gradually unlock
7. "Give me a lock as YYYY"
8. Retest prechecks as the surrogatee (balance if necessary)

Balance:

1. Do balance as required.

NOTE: Always do corrections (where possible) on the **surrogatee** if present. If not possible, do all corrections on the surrogate.

Checking The Changes:

1. When balancing process is finished "Indicator change when XXXX is back to being 100% themselves"
- 2 "My name is _Y insert surrogatee name" - unlock
- 3 "My name is _X insert surrogates name" - lock
- 4 Give me a lock as "XXXX"
5. Recheck surrogates %Thy LE
