

Using C1 & Ear Acu Point to Test Food

We are testing always testing food against three measures: Biogenic : Biostatic : Biocidic

- Unlock on parotid = Biocidic
- Unlock on ear acu + C1 = Biocidic
- Lock on parotid + ear acu + C1 = Biogenic
- Lock on parotid + ear acu OR C1 = Biostatic

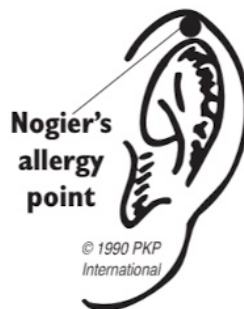

Testing Method

1. Hold the substance (or word written on paper) to the parotid gland
2. Test IM - If Lock test C1 and Ear Acu as per below

3. C1 Test

- Using a clear circuit indicator muscle, CL C1.
- If locks, go to step 4.
- If unlocks: Stimulate reflex points for Central - VR, NL, NV test between each one until IM locks on CL.

4. Ear-Acu Test (Nogiers Allergy Point)

- Using a clear circuit indicator muscle CL ear acu point
- If locks, ready to use and to test in relation to balance.
- If unlocks - Tap around ear (forward or backward)
 - CL ear act and IM should now locks - ready to use and test in relation to balance
- If still unlocks, tap around ear in the other direction (forward or backward). One direction will lock the point at which time you are ready to test as per the balance.
