

How to Use NotebookLM for Beginners

Tool Stacking

Ready to turn your notes into a personalized AI assistant?

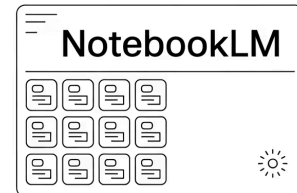

Transform the way you work with information using Google's powerful AI research tool

Your Personal AI Research Assistant

What is NotebookLM?

NotebookLM is Google's innovative AI tool that transforms your personal documents into an intelligent research assistant. Simply upload your sources, and watch as it becomes an expert in your specific material.

Smart Summaries

Get instant, comprehensive summaries of your uploaded documents

Interactive Q&A

Ask questions and get answers with precise citations from your sources

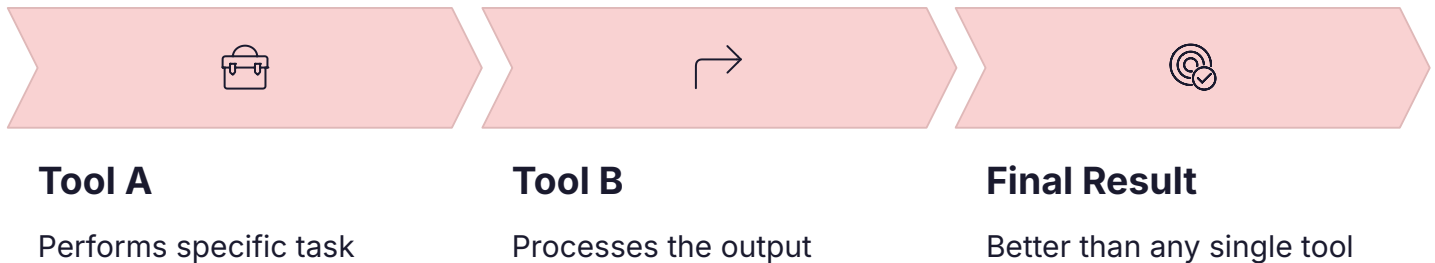

Idea Generation

Brainstorm and explore connections between your ideas seamlessly

Upload PDFs, notes, articles, and more to create your personalized knowledge base

Combining Tools for a Better Workflow

What is "Tool Stacking"?

i Think of it like a production line: One machine shapes the metal, another paints it, and a third assembles the final product. Each tool leverages its unique strengths to create something more powerful together.

Tool stacking allows you to leverage the strengths of different applications, creating workflows that are more efficient and effective than using any single tool alone.

Tool Stacking in Action with NotebookLM

Scenario: Understanding a Complex Research Paper

01

Start with Your Source

Begin with your complex research paper (PDF format)

02

Upload to NotebookLM

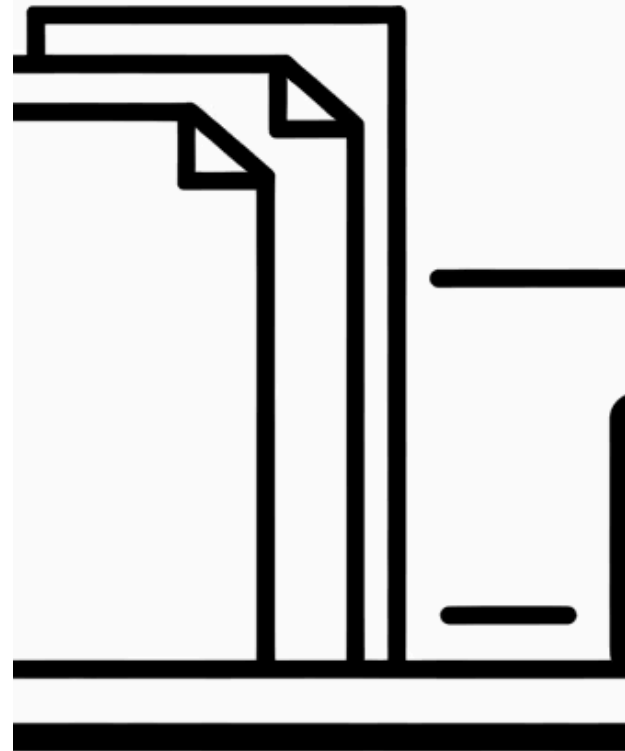

- Generate comprehensive summaries
