

1. VISUAL CHEAT SHEET

CryptoCycle PRO™ — Indicator Quick Reference

◆ BTC • MACRO & ALT • MACRO — Band Meanings

Band Hierarchy (Bottom → Top):

- **Purple** — Bottoming Zone / High-Conviction Accumulation
- **Blue** — Deep Value / Strong DCA Opportunity
- **White** — Fair Value / Early Expansion
- **Orange** — Realistic Top Zone / Begin Scaling Out
- **Green** — Parabolic Zone / High Risk / Take-Profit Zone
- **Red** — Exhaustion Zone / Blow-Off Top Region

◆ BTC • DCA — Daily/Weekly Momentum Zones

Bottom → Top:

- **Blue** — Strong DCA Zone
- **White** — Neutral / Light DCA
- **Orange** — Overheated / NO DCA / Take-Profit

◆ ALT • DCA — Daily Momentum Zones

Bottom → Top:

- **Blue** — Strong Alt-DCA Zone
- **White** — Neutral / Light DCA
- **Orange** — Overheated / Avoid / Take-Profit

Which Charts to Use Each Indicator On

- **BTC • MACRO** → BTC/USD (Weekly or Monthly)
- **ALT • MACRO** → TOTAL3 (Weekly)
- **BTC • DCA** → BTC/USD (Daily or Weekly)
- **ALT • DCA** → TOTAL3 (Daily)

Quick Interpretation Guide

Bottoming Region (Purple/Blue)

- Cycle is early
- Strong accumulation opportunities
- High reward / lower risk zone

Mid-Cycle (White/Orange)

- Momentum building
- Healthy uptrend
- Orange = mid-to-late stage warning

Top Region (Green/Red)

- Market overheated
- Prepare exits
- Red = peak blow-off probability

2. MINI-GUIDE: “How to Use ChatGPT With CryptoCycle PRO™”

A Beginner-Friendly Step-by-Step Guide

STEP 1 — Open Your Chart

Load the chart with the appropriate indicator:

- BTC Macro
- ALT Macro
- BTC DCA
- ALT DCA

Make sure the indicator bands are visible.

STEP 2 — Take a Screenshot

Capture your TradingView screen showing:

- The candles
- The band levels
- The price scale

Ensure the full indicator is visible.

STEP 3 — Upload Screenshot to ChatGPT

Drag and drop the screenshot into ChatGPT.
Wait for it to attach before sending your prompt.

STEP 4 — Choose the Correct Prompt

Use the right prompt based on what you want:

BTC Analysis

- Use **BTC Macro Prompt** for full-cycle analysis
- Use **Top Finder Prompt** when BTC is near upper bands
- Use **Bottom Finder Prompt** when BTC is near lower bands
- Use **BTC DCA Prompt** for daily/weekly accumulation guidance

Altcoin Analysis

- Use **ALT Macro Prompt** to track altseason
- Use **ALT DCA Prompt** to time altcoin accumulation

Full Market Overview

- Use **Universal Macro + DCA Prompt**

STEP 5 — Insert Prompt Below the Screenshot

Paste the full prompt in the message box **AFTER** your screenshot.
This ensures ChatGPT links the prompt with the image.

STEP 6 — Read the Output

ChatGPT will show:

- Current cycle position
- Trend maturity
- Risk level
- DCA conditions
- Potential band-based targets
- Estimated timing windows
- A clear verdict
- A 4–10 bullet summary

IMPORTANT RULES For the Best Results

Rule 1: Always use SCREENSHOT-ONLY prompts.

Never allow external data.

Rule 2: Use the correct chart.

ALT indicators must be run on TOTAL3, not individual altcoins.

Rule 3: Run prompts after significant moves.

These tools are best on daily/weekly/monthly candles.

Rule 4: Interpret bands, not exact prices.

Bands reveal cycle structure, not exact price targets.

Troubleshooting

If ChatGPT gives outside data:

! Make sure the prompt includes:
“**Analyze ONLY the screenshot. Do NOT use external data.**”

If colors look odd:

! ChatGPT uses the **band hierarchy**, not brightness.

If ALT Macro looks weird:

! Make sure you're using TOTAL3 (altcoin market cap).

3. FLOWCHART — “Which Prompt Do I Use?”

Text Blueprint for Visual Diagram Creation

Start Here

Do you want Bitcoin analysis or Altcoin analysis?

BITCOIN →

Is BTC near the lower bands (Purple/Blue/White)?

→ Yes → Use Bottom Finder Prompt

→ No → Continue

Is BTC in mid-cycle (White/Orange)?

→ Yes → Use BTC Macro Prompt

→ No → Continue

Is BTC in Green or Red bands (top region)?

→ Yes → Use Top Finder Prompt

→ No → Continue

Are you deciding how much to DCA?

→ Yes → Use BTC DCA Prompt

ALTCOINS →

Are you analyzing the entire alt market?

→ **Yes** → Use ALT Macro Prompt

→ **No** → Use individual TA (not CryptoCycle PRO)

Are you deciding when to accumulate alts?

→ **Yes** → Use ALT DCA Prompt
