If you want to know what exactly I taught all of these amazing people that make them sing my praises this way...

...please continue reading:

Years ago i got admission to study at UNN. and before i went to school i told everyone who cared to listen that: "I'd get a first class & a good job when i graduated"

After graduation I did not have a first class & i did not have a good job.

As a matter of fact, I ended up with a Job that paid just ₦15,000 a month. I could not afford new clothes, the cheapest android phones of ₦150,000 would have taken me 10 months to save up for (and that is if i don't spend a dime on feeding & accommodation)

That was when I saw THE MAIN PROBLEMS that make most people die poor.

Which is why this *little* eBook is very important - because it shows you what those reasons are, so you can avoid them.

...because fast forward to today and I now own a business (with my coFounder) that has over 100,000 users & has generated over 200,000 Million Naira in one year.

What if i told you that, with just ONE LINE of code that i'll give you - you can completely change your life; just like i did?

However - before I give you the code. First - *here are the MAIN PROBLEMS Behind why people die poor plus how to avoid them.*

**Problem #1: I Did Not Know What to Do to Earn
“Real” Money**

One day i was trekking home, i saw a big car drive by - and i asked myself “How did this person make enough money to buy this kind of car?”

Has this ever happened to you? “Where do these people see all that money?”

Why do they make so much money, while you struggle to make money?

Hint: it is NOT hard work, in fact working hard can even keep you poor if you do it the wrong way - if it was by hard work Laborers will be rich.

The answer is simple - “*It is what you know that help you make money, not how hard you work*”

Take for instance during a house construction, a Laborer that carries cement makes very little.

...but the Engineer in charge of inspecting them makes way MORE than the laborer; even though the Laborer works & sweats more than him.

When I realized this, as a school teacher; i looked at my proprietor at the school where I was working as a school teacher.

He did not come to work EVERY DAY, like I did.

He did not write lesson notes, like I did.

...in fact, I worked way harder than him, but he made way way way more than me. I got paid 15,000 Naira while he takes millions home.

And this was because he knows **how to build & grow a school**

So I asked myself - *should I start a school?*

And that was when I got hit by the second problem.

Problem #2: When I Found What to Do I Had No Startup Capital to Get Started.

After people figure out what to do; the next problem they face is - "Where is the money to do it".

So when I decided to "*build a school*" - the next issue I faced was how I could do it when I was broke, with a job that paid less than \$20 a month.

I could not afford a lot of things. Even something as little as a brand new iPhone - so how on earth can I even build a school.

This could be the same for you

Say you need to build a business.

To Relocate & chase your dream Abroad

Or buy that one item you've always wanted to buy.

Or just never be broke again.

...one thing that seems to hold people back is startup capital, because usually to make MILLIONS you need to invest hundreds of thousands & even millions

Take for example: A Fish pond costs at least N2M (\$2,500)

Capital Needed to Start Fish Farming

To start a small-scale fish farm you will need a capital of #2,000,000 and to start a large-scale farm you will need a capital of #5,000,000. This capital will be majorly used to buy fish feed, trampoline ponds, and treatment. 10 Aug 2023

To start a school you need at least ~~N500,000~~ - ~~N5M~~

About 3,750,000,000 results (0.42 seconds)

It costs more to start a nursery and primary school than to start a secondary. The cost of your school also depends on the tools or equipment you want to be available to your pupils or students. However, with a capital of about #500,000 – #5,000,000, you can start a successful school business in Nigeria. 21 Jun 2023

That is N1.2 Billion **Every Seconds Spent By Internet Users Like You & Me.**

The Question is - Where do They Spend All That Money?

The Answer is “**Digital Real Estates**”. These are “**Specially designed**” Websites that people rush to buy information from.

For example - this website <https://pinchofyum.com> makes \$10M teaching people how to cook! (something i am sure that you know how to do)

How can you CREATE that kind of website, from what you know - that can make a lot of money? And how can you get people to visit and buy from it.

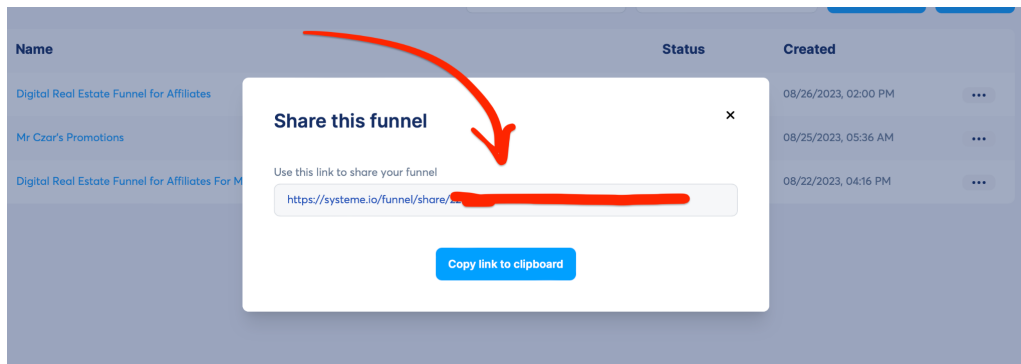

If you asked this question in your mind then i like you already! It means you have an inquisitive mind and therefore have what it takes to make money!

I will teach you all about this in my upcoming masterclass!

But to get started you'd need to create a money making website (also known as Digital Real Estate).

That is Where the Single Link I Told You About Comes in

This Link Removes Every Sort of Barrier & Get You Started in This Business FAST!

When I share this link with you, and you ENTER it in your browser - it instantly gives you - a fully built website. INSTANTLY

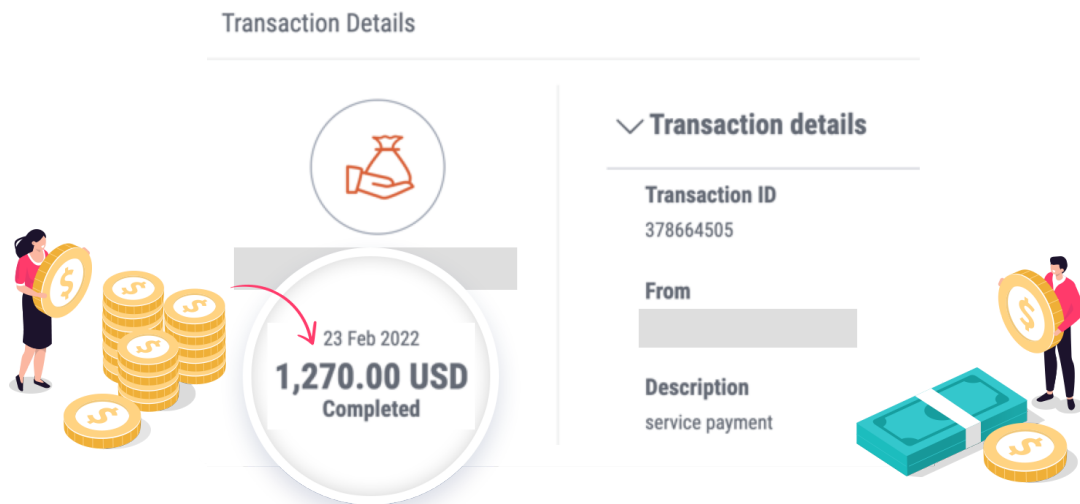

With this you do NOT need to build a website from scratch

...or pay a programmer a boat-load of money to build one for you.

And once you have that website ready, I'll then show you - how to put it online so that people that are browsing the internet will come to it & buy from you.

Guess what? It works -

People Are Making as Much as \$1,000 from Websites like Those One You Get From a Link Like That!

This is Just how powerful this little simple link is & you can post it on your browser now, and instantly - you get a FULLY BUILT website that can send you DAILY income every day.

And I'll give you this link for FREE in my upcoming Masterclass & even show you how to use it to generate a "regular paying" website for yourself.

So Let Me Ask You...there are 8.5 billion web searches on google every day; *If all this does is BRING you just ONE person everyday on a website you will generate with that link, and that one person spends ₦12,500*

Let's say one person spends just ₦12,500 every day on your website

That'd be ~~N~~12,500 x 30 in a month.

Which is ~~N~~375,000 - every single month

Will it be worth it for you?

Does Getting Daily Income Alerts Make You Tired?

The reason I asked is because once you activate this link right now & follow other instructions i'll give to you on the live masterclass...

...you'll start getting a consistent flow of credit alerts and a massive flow of website visitors desperate to give you money to sell them this "hot-selling" product that we have put inside this link we'd share with you in our Live Masterclass (so make sure you do not miss it!)

The inflow might happen every single day & if you are not ready for the massive demand, it might wear you off.

So...

Just Keep it Simple

Imagine if all it takes to make good money is only one line of link that'd give you.

The truth is - there are really just 2 things you need to make money online: A hot product & a way to get people to pay for it. As simple as that.

It doesn't have to be hard, or complicated or take time to set up.
