TINY PROMPTS™ Prompt Builder Vol. 1

Copyright © 2026 Makes It With AI. All rights reserved.

This publication, including its written content, original examples, prompt collections, organization, graphics, illustrations, and other original material, is protected by copyright.

See the license terms below for what you may and may not do with it.

Individual license. Your purchase licenses one individual (you) to use the Tiny Prompts Prompt Builder Vol. 1 app. You may use the resulting designs in your own creative projects, images, videos, designs, educational materials, and other personal or commercial work, subject to the terms of the AI tools and resources you use.

No resale or redistribution. You may not resell, repackage, redistribute, or share this library as a standalone product, or use substantial portions of it to create a competing prompt library, course, book, app, database, or similar product.

Important: Tiny Prompts are creative techniques, not official ChatGPT commands or guaranteed software features. The slash is simply shorthand for a short creative direction. AI tools and models change over time, and results can vary.

AI-generated images can contain errors or inaccuracies. Educational, scientific, historical, or other factual visuals should be reviewed before use.

You are responsible for ensuring that images, photos, artwork, fonts, logos, trademarks, characters, and other third-party content you use are properly licensed or otherwise permitted. AI-generated content may also be subject to the terms of the platform used and applicable law.

The TINY PROMPTS™ Prompt Builder was created and curated with ChatGPT image generation in mind, and all prompts have been tested using ChatGPT. Many others are creative visual directions intended to encourage experimentation with other AI image generators. Results may vary by tool and model.

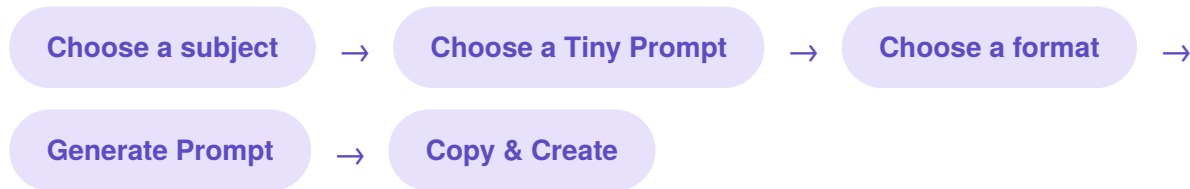

Created by Makes It With AI

GETTING STARTED

Welcome to the Tiny Prompts™ Prompt Builder, Vol. 1

Tiny Prompts™ are simple creative shortcuts designed to help you create more interesting, imaginative, and useful images — without having to write complicated prompts from scratch.

Instead of starting with a huge prompt, you simply:

The Tiny Prompts™ Prompt Builder does the rest.

What can you create?

A single subject can become completely different visual concepts depending on the Tiny Prompt you choose.

- A camera can become an **exploded view**.
- A butterfly can reveal **microscopic details**.
- A telephone can show its **evolution through history**.
- A refrigerator can **explain how it works**.
- A fantasy kingdom can become a **detailed map**.

That's the idea behind Tiny Prompts™ Prompt Builder, Vol. 1.

Before you begin

If you have access to the Tiny Prompts™ Prompt Builder, Vol. 1 Quick Start Video, watch that first. You'll see the Prompt Builder in action and several examples of what you can create.

Then you're ready to start experimenting!

Creating a Tiny Prompt Takes 5 Simple Steps

1

Enter Your Subject

Type what you want to create.

a vintage camera

Your subject can be almost anything — an object, animal, place, person, scene, concept, or idea.

2

Choose a Tiny Prompt Button

Browse the 25 Tiny Prompt shortcuts and choose the visual direction you want.

/parts

This tells the Prompt Builder to turn your camera into an exploded view of its important components.

3

Choose Your Format

Select the format you want for your image:

16:9 — Landscape • **4:5** — Portrait • **9:16** — Vertical • **1:1** — Square

Choose the format based on where you plan to use the image.

4

Generate Your Prompt

Click **Generate Prompt**.

Tiny Prompts™ Prompt Builder Vol. 1 combines your subject, your selected shortcut, and your chosen format into a finished image prompt.

5

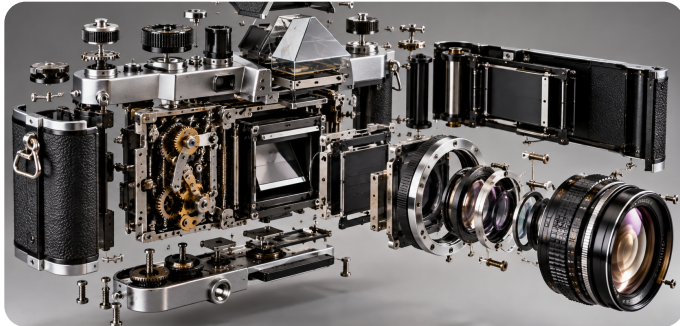

Copy & Create

Click **Copy Prompt**, then paste the generated prompt into ChatGPT or your preferred image-generation workflow.

That's it! Try the same subject with different Tiny Prompts to discover completely different visual possibilities.

See What Tiny Prompts Can Do

These examples were created while testing the Tiny Prompts™ Prompt Builder library.

Vintage Camera + /parts

Turn a familiar object into a clear exploded view that reveals its important individual components.

TRY IT WITH: A typewriter • bicycle • vintage radio • mechanical watch

Butterfly + /magnify

Reveal details that normally can't be seen with the naked eye by dramatically enlarging intricate features.

TRY IT WITH: A flower • leaf • insect • fabric • gemstone

Telephone + /timeline

Show how a subject evolves through distinct stages from earliest to most recent.

TRY IT WITH: Cars • computers • cameras • airplanes • musical instruments

German Shepherd & Doberman + /comparison

Clearly compare two subjects side by side, highlighting their differences and similarities.

TRY IT WITH: Two car models • two eras • two animals • before and after

Refrigerator + /howItWorks

Visually explain how something works by showing its important stages, components, actions, and relationships.

TRY IT WITH: An engine • camera • washing machine • air conditioner • bicycle

1950s Corvette + /era

Reimagine a subject in a different era, complete with period-accurate styling, fashion, and atmosphere.

TRY IT WITH: A city street • a smartphone • an outfit • a diner • a living room

REFERENCE

The 25 Tiny Prompts Included in Vol. 1

Your Tiny Prompt reference — browse anytime for inspiration.

SHORTCUT	WHAT IT DOES	SHORTCUT	WHAT IT DOES
/mindblown	Creates an unexpected visual concept	/transformation	Shows a subject changing into a new state
/extremePerspective	Creates a dramatic viewpoint	/timeline	Shows the evolution of a subject over time
/worldwithin	Reveals a hidden world inside a subject	/magnify	Reveals enlarged fine-scale details
/cityinside	Integrates a functioning city into a subject	/underwater	Places a subject convincingly underwater
/mechanism	Reveals how something works internally	/comparison	Clearly compares two subjects
/parts	Creates an exploded view of components	/skeleton	Reveals the skeletal structure
/schematic	Creates a technical schematic	/moviePoster	Creates a cinematic movie poster
/characterSheet	Creates a character reference sheet	/posepack	Creates a varied pose reference pack
/pov	Creates an immersive first-person viewpoint	/howItWorks	Visually explains a process
/flyer	Creates a functional real-world flyer	/snowglobe	Creates a miniature snow-globe world
/era	Reimagines a subject in a different era	/storybook	Creates a storybook illustration
/visualMetaphor	Turns an idea into a visual metaphor	/map	Creates a detailed illustrated map
/fusion	Combines two subjects into one creation		

Don't Overthink It

**Try a subject.
Pick a Tiny Prompt.
See what happens.**

Tiny commands. Big visual ideas.
